The turning signal for turning from W Northern Pkwy westbound into Reisterstown Road northbound is a green arrow first, then changes to a stable green.
However, it is very dangerous to make this turn under a stable green light when the green arrow disappears because W Northern Pkwy eastbound has 3 incoming lanes and they drive fast.
Suggest changing this turning signal to a protected green light (green arrow) only
3 incoming lanes to the eastbound, and they drive fast.
