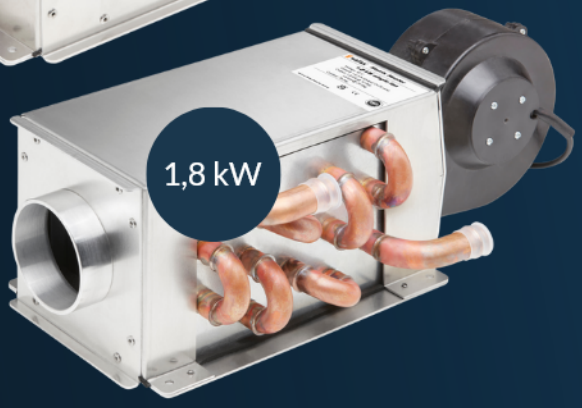
## MATRIX MASTER

**3,6 & 1,8kW | Diesel Air Heater**



| | 7400 | 7300 |
|---|---|---|
| **Output:** | 3600 W | 1800 W |
| **Air flow min/max:** | 22/353 $m^3$/h | 14/222 $m^3$/h |
| **Current min/max:** | 0,1/5,5 A | 0,04/2,3 A |
| **Power consumption min/max:** | 1,2/66 W | 0,5/27,5 W |
| **Dimensions:** | L 420 mm | L 420 mm |
| | W 330 mm | W 215 mm |
| | H 138 mm | H 138 mm |
| **Weight:** | *5,2 kg / 11,4 lbs.* | *3,2 kg / 7,0 lbs.* |

Wallas Matrix heaters are designed to complement the Wallas water heating system. The **heater enables air heating** using the hot coolant cycling in the system.

The **steplessly** and **thermostatically controlled** matrix heaters blow exactly the amount of warm air needed keeping the temperature constant.

There are two new matrix heaters available in the market with different powers; 1,8 kW and 3,6 kW. Both have **wide heating range.**

Heaters **can be fitted in almost every vehicle or boat** due to automatic 1-100 power control. Matrix heaters can run **extended time periods** on near zero power.

Wallas matrix heaters are **the most silent** in the market.

The installation location can be chosen flexibly. The location can be close to the heater or further away from it.

Many different model variats to choose from.

7300
1,8 kW

WARRANTY
2+1 YEARS

**TRUE STEPLESS CONTROL**

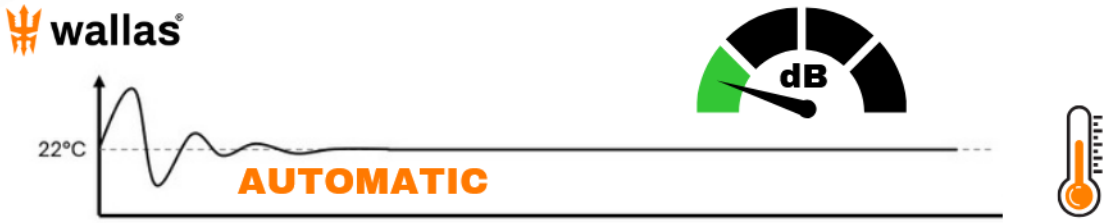
**THE MOST SILENT HEATER**

**PREMIUM COMFORT**

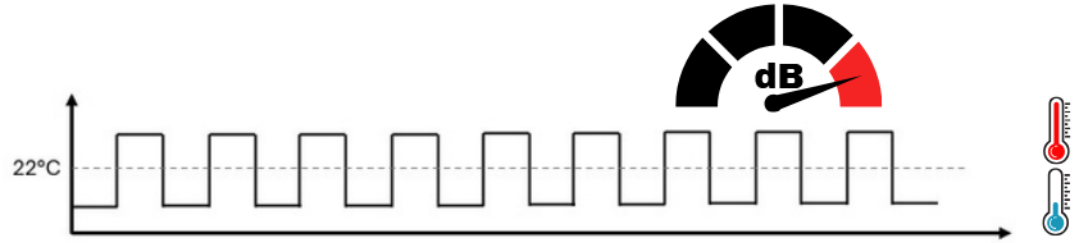
**VERSATILE INSTALLATION**

# COMPARISON

**Wallas Matrix Heaters** will keep the temperature near the target temperature automatically. Constant and low RPM's will reduce noise and electricity consumption.



**Typical matrix heaters** are either on or off. So the temperature is not stable and they stop and start constantly which will increase noise, electricity consumption and lead to the situation where the room is either too cold or too hot.



## INSTALLATION KITS

| Recommended builds | Diameter | MatrixMaster | Accessory kit |
|---|---|---|---|
| CAMPER VANS | ø 60 mm | 7305 / 7405 | 3760 |
| BOATS | ø 75 mm | 7300 / 7400 | 3775 |
