RADIODETECTION Genny4

The Radiodetection Genny4 emits a class-first simultaneous dual-frequency signal output design and when paired with the gCAT4+ enhances the detection of buried pipes and cables.
To help the user locate smaller cables such as street lighting and telecoms, the Genny4 introduces a second frequency to work alongside the standard 33KHz locator signal.

KEY FEATURES

- Dual-frequency output
- Signal boost function
- 12 month warranty
- Batteries - 4X LR20 1.5V alkaline
- Accessory storage tray
- Backwards compatible with Genny3 accessories
