THAT TIME OF YEAR AGAIN

A welcome to summer from Carlos Brana

Whether you head to the mountains, beaches or enjoy quiet time at home, summer is a time to relax, refresh and regroup with friends and family. We wish each of you a pleasant summer as we look forward to more Falcon milestones.

Carlos Brana, EVP, Civil Aircraft, Dassault Aviation

FALCONS ON THE RISE

BALLET IN THE SKY

6X shows off its moves in Paris

We often say that nothing flies like a Falcon. At the recent Paris Air Show, Dassault pilots Philippe Duchateau and Fabrice Valette tested the limits of the Falcon 6X to demonstrate its extraordinary handling qualities made possible by its new Digital Flight Control System. Visitors marveled as the 6X graced the sky above Le Bourget in a bravura performance. The Falcon 6X is on track for certification this summer.

OOH LA LA

The Falcon 10X cabin wows Paris

It looked a lot like Fashion Week at the Paris Air Show, but it wasn't on the runway. It was in the static display where the Falcon 10X cabin mock-up was on display in all its glory. The spaciousness, the elegance, and the attention to every detail make the 10X cabin "magnifique." If you weren't there, this video should give you a taste of the future that awaits you.

THE 10X FLYING EXPERIENCE

A pilot's-eye view from the flight deck

An informative new video from Aviation International News features Dassault's Chief Test Pilot, Phillipe Duchateau, who explains how the innovative NeXus flight deck of the 10X takes the company's EASy platform to new heights. Its intuitive touchscreen environment and increased automation dramatically reduce pilot workload. Advanced flight controls like a fighter-derived Smart Throttle not only help pilots, but give passengers a safer, smoother ride.

WHERE THE RUBBER MEETS THE RUNWAY

10X to feature innovative tire from Michelin

The Michelin Man came to the Paris Air Show with a new world's first. It's the Air X Skylight aviation tire, which weighs less and will last longer than previous generations. And the first aircraft to benefit will be the Falcon 10X. It's estimated that the weight reduction will yield dramatic savings in fuel consumption and emissions, making it incredibly economical and eco-friendly. It's an amazing story with numbers that are just as amazing.

COMING ATTRACTIONS PREVIEW

A 2000LXS feature is headed your way

As part of a general refresh of promotional material for the popular Falcon 2000 series, new videos from Dassault are in the works. The award-winning producer/director Eric Magnan is famous for his exciting aviation cinematography. Recently, he's been shooting air-to-air footage of the 2000LXS in the skies over Brittany, France and he's put together a behind-the-scenes look at what's to come.

UPDATE FROM DUBAI

New MRO Facility is ready for prime time

Dassault's ExecuJet MRO Services will soon be celebrating the grand opening of its new maintenance, repair and overhaul facility at Dubai South's Al Maktoum International Airport (DWC). But it's already hard at work. The new service center spans 163,000 square feet and can service 16-20 aircraft at once, including the Falcon 6X and Falcon 10X. Dassault is upgrading its service center network worldwide, and Dubai is a good example.

A MILESTONE IN PARTNERSHIPS

1,000 engines for the Falcon 2000 series

Pratt & Whitney Canada made history this year when it delivered the 1,000th PW308C engine to Dassault for the Falcon 2000 series. P&WC CEO Maria Della Posta marked the occasion by posting a video on social media in which she celebrated P&WC's longtime partnership with Dassault. P&WC engines, with their proven efficiency, reliability and compatibility with SAF, have helped power the Falcon 2000LXS to remain the world leader in its class.

A BLAST FROM HIS PAST

Fred George flies a classic Falcon 20

To mark the 60th Anniversary of the Falcon line, Fred George recently flew a vintage Falcon 20 that looks and flies like brand new due to the significant number of upgrades that in-service Falcons have received over the decades. Fred's flight has been preserved in a video produced by Dassault Falcon and aviation journalist Miles O'Brien. In it, Fred recounts the history and the military heritage of the Falcon 20 in a nostalgic look back.

OCTOBER IS SHOWTIME IN VEGAS

Reserve this Fall's hottest ticket in town

An NBAA Convention is always a glamorous event, especially when it's in Las Vegas. Dassault will be there, of course, and bringing its best and brightest stars. You can see the Falcon 6X, 8X and Falcon 2000LXS on the static display. There, you'll find a fashion show worthy of any runway—the fabulous 10X cabin mockup. If that isn't enough, book a demo of Dassault's new smart app called FalconWays which has the potential to be a major fuel-saving tool on long flights. It's magical.
