## 62nd IWCS Conference in Charlotte, USA: the International Cable Connectivity Symposium

**Published:** 31/10/2013 **Author:** Redazione
**Categories:** International partnerships and events

### Vademecum

In this section you will find handouts, technical documentation, calculations and tables that were previously on the first version of this site which at the time was called trafilatura.it. The transfer of all documentation will take place over the coming months.

On November, 10th – 13th, the Charlotte Convention Centre in Charlotte, NC (USA) will gather together speakers, exhibitors and visitors from all over the world, for the 62nd IWCS Conference - the International Cable Connectivity Symposium.
Engineers and scientists from major companies in the international wire and cable industry will present their latest discoveries.
Furthermore, one-on-one exchange sessions between the authors and the participants will give the possibility to benefit from...

## Wire & Plastic Machinery Corp: Wire Southeast Asia 2013 Show Report

**Published:** 28/10/2013 **Author:** Editorial Staff
**Source:** Wire & Plastic Machinery Corp.
**Categories:** Exhibitors' news

Wire & Plastic Machinery Corp exhibited at Wire Southest Asia in Bangkok from September 17th-19th. It was an opportunity to meet clients and agents in the ASEAN countries as well as clients from India, Middle East and Australia. The flow of visitors was steady and several discussions about new projects took place. The show attendance was better than two years ago. Rahul Sachdev, who is also President of WCISA (Wire & Cable Industry Suppliers Association), took part in the opening ceremony celebrations.

## Fornitore Offresi 2014: excellence in machining

**Published:** 26/10/2013 **Author:** Redazione
**Categories:** International partnerships and events

**6-7 February 2014, Erba (Italy)**

Fornitore Offresi
EXCELLENCE IN MACHINING
6-7 february 2014
LARIOFIERE ERBA
www.fornitoreoffresi.com

Two days exhibition where the subcontractors companies in the engineering sector will promote their skills and make new business relations. Fornitore Offresi is an opportunity to spread the knowledge of a territory rich of synergies between different and complementary companies.
An innovative event in which Italian and foreign companies will show and exchange their know- how and excellent skills in the mechanical manufacturing. The visitors will have the opportunity to meet all the niches of the mechanical production market, which in Italy is characterized by high technical skills, versatility in production, customized products, short time to market, flexibility and know- how well-known all over the world.

**THE NUMBERS OF FORNITORE OFFRESI**
- 6th edition;
- 300 exhibitors;
- 6,000 qualified visitors from all over the Country;
- Many BtoB round tables between subcontractors and buyers of the major companies in order to create new business opportunities;
- Meetings with foreign buyer delegations

**FORNITORE OFFRESI ADDRESSES THE FOLLOWING TYPES OF MACHINING:**

**- Blanking, cold-drawn, thread machining, cold forming;**
**- Production machining:** milling, polishing, threading, welding, broaching, metallic, grinding/sharpening tool;
Machining: drilling, polishing, threading, welding, brazing, three five-axis milling, grinding, EDM, laser cutting, plasma, water, structural;
**- Construction and molds:** contraction leads to molds, puncture, matrices, bevel gears, gear, hot pressing;
**- Surface treatments and coatings:** heat treatments in general, reclamation, hardening, galvanizing, surface treatment, carbide coating, finishing, painting, sand blasting...

## FIB developed a new tool to make the dedrossing of your patenting lead bath much easier

**Published:** 18/10/2013 **Author:** FIB
**Source:** FIB BELGIUM s.a.
**Categories:** Exhibitors' news

Generally, the dedrossing operation is quite neglected because this operation is not easy to handle. The location around the heat exchangers concentrates dross and the cleaning of this critical location is rather difficult in spite of the fact that it is very important for the control of the process.
FIB has developed a new tool...

## Gimax REV respooling line - top flexibility and line speed

**Published:** 15/10/2013 **Author:** Redazione
**Source:** GIMAX srl
**Categories:** Exhibitors' news

Gimax Srl launched the company's revolutionary fully automated REV respooler several years ago and since then it has undergone several updates that saw it increase the level of flexibility and line speed.
The concept is totally different to the traditional respooling machine. It was designed to reduce downtime to a minimum between one spool and the next.
The REV can handle **100 mm and/or 200 mm plastic spools** of various widths, and in the past few years has been used to respool **solid welding wire (steel and aluminum)** as well as **tubular wire (flux cored wire)**, both random and...

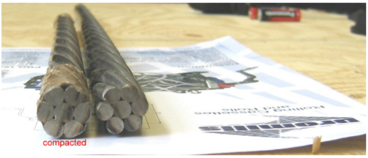
## Promills: Compacting of wire ropes

**Published:** 10/10/2013 **Author:** Redazione
**Source:** Promills srl
**Categories:** Exhibitors' news

**What is the matter?**

A normal strand (not compacted) is made of round wires brided around the same longitudinal axis. By analyzing its section we note that there is basically a metallic area plus an empty space normally filled of lubricant and/or textiles fibers.
While working, the wires slide among them along an ideal point of contact. The wear is very fast and this produces an elongation of the rope that reduces its life.



**How to improve?**

## More reliable than the eye: Systematic measurement of flat profiles and shaped wire

**Published:** 03/10/2013 **Author:** Editorial Staff
**Source:** Zumbach Electronic AG
**Categories:** Exhibitors' news

Shaped wires are today indispensable in industry sectors such as aerospace, watch and jewellery making and dentistry. In other words, wherever there is a demand for absolute precision and an extremely long service life.

Shaped wire can be used to quickly create near net shape complex geometries and profiles at a significantly lower cost than with other production methods which require finishing work such as abrading.
Zumbach understands your needs and has products to enhance your bottom line.

Although flat profiles and shaped wire are used in a huge range of environments, all application areas have one thing in common: **mediocre quality is not an option**. Manufacturing tolerances are extremely tight, the surfaces of the cold-rolled profiles must be cleanly worked and exhibit no anomalies. It is surprising that manual measurements by skilled workers are still widespread today. The manual checks do not just interrupt the production flow but also consume valuable time and involve a certain margin of error. Nobody can afford to make errors. Zumbach is there to help.

Click on "Read news" to read about Zumbach's laser measuring solutions and image processing profile measuring systems.

1 – 3 October 2013
Imigrantes Exhibition Centre
São Paulo, Brazil
wire®
South America
International Wire and Cable Fair
TUBOTECH

Brazil is ready to stage the premiere of wire South America - International Wire and Cable Fair - at the Exposições Imigrantes exhibition centre from 1 to 3 October 2013.
The inaugural edition of the trade fair for wire and cable production and finishing will take place in parallel with TUBOTECH – 7th International Trade Fair for Pipes, Valves, Fittings and Components.

**Brazil: a promising market for wire, cable and tube**

The conditions for events such as wire South America and TUBOTECH in São Paulo are promising: Brazil's economic growth is continuing steadily. The country is the sixth-largest economy of the world with a gross domestic product of approximately USD 2,500 billion (2011).
