Tillykke med Deres nye udendørslampe!

Garanti
Nordlux giver 15 års garanti på alle udendørslamper i kobber, messing, tombak og galvaniseret udførelse. Denne garanti gælder rustangreb med gennemtæring og er **gældende mod fremvisning af købskvittering.**

Der ydes ingen garanti på dele som er beskadiget ved slidtage eller på fejlbehandling af lamperne.

SE

Grattis till Er nya utomhuslampa!

Garanti
Nordlux ger 15 års garanti på alla utomhuslampor i koppar, mässing, tombak och galvaniserat utförande. Denna garanti gäller rostangrepp med genomfrätning och är **giltig mot framvisning av kvitto.**

Det ges ingen garanti på de delar som är skadade genom slitage eller felbehandling av lampan.

NO

Gratulerer med Deres nye utendørslampe!

Garanti
Nordlux gir 15 års garanti på alle utendørslamper i kobber, messing, tombak og galvanisert utførelse. Denne garantien gjelder rustangrep med gjennomtæring og er **gjeldende mot fremvisning a v kjøpskvittering.**

Det ytes ingen garanti på deler som er beskadiget ved slitasje eller ved feilbehandling av lampene.

FI

Onneksi olkoon uudesta ulkovalaisimestanne!

Takuuehdot
Nordlux antaa 15 vuoden takuun kaikille kuparista valmistetuille messinki valmistetuille, tombac valmistetuille ja galvanoiduille valaisimille. Takuu käsittää ruostumisen ja läpisyöpymisen ja on voimassa **kuitin näyttöä vastaan.**

Takuu ei ole voimassa, jos osat ovat vahingoittuneet kulumisesta tai valaisinta on käsitelty väärin.

GB

We congratulate you on your new outdoor lamp!

Guarantee
The Nordlux Outdoor lamps in copper, brass, tombac and galvanized are guaranteed for up to 15 years. This guarantee applies to extensive corrosion in the form of holes in the metal caused by rust. **The guarantee is subject to presentation of receipt.**

There is not guarantee on the components which have been damaged by wear and tear or mistreatment of the lamps

DE

Wir gratulieren Ihnen zu Ihrer neuen Aussenleuchte!

Garantie
Nordlux leistet bis zu 15 Jahre Garantie für alle Aussenleuchten in kupfer, messing, tombak und feuerverzinkter Ausführung. Diese Garantie gilt für Rostbildung in Form von Angriff der Metal und **gilt nur gegen Quittungsleistung.**

Nurdlux leistet keine Garantie für Ersatzteile, die beschädigt sind durch Abnutzung oder Fehlbehandlung der Leuchten.

FR

Tous nos vœux pour votre lampe d'extérieur!

Garantie
Les lampes Nordlux en cuivre, laiton, tombac et galvanisation bénéficient d´unegarantiee de 15 ANS àcompter de la date d´achat sur le bon d´achat. La garantie couvre formation de rouille (la surface est entamée) **et n´est que valable que si la date d´achat figure sure le bon d´achat.**
La grantie ne couvre pas les composants, endommagés par l´usure normale ou un emploi abusif.

NL

Gefeliciteerd met uw nieuwe buitenverlichting!

Garantie
U heeft 15 jaar garantie op alle buitenverlichting in koper, messing, tombac en verzinking. Deze garantie is enkel geldig voor roest in de vorm van de oppervlakte. **Uit de aankoopfactuur dient de datum van aankoop te blijken.**

De Garantie geldt niet voor onderdelen, die door normale slijtage of een verkeerde behandeling beschadigd zijn.

Alumiinilamppujen asentaminen rannikko-, maatalous- ja teollisuusalueille ei ole suositeltavaa, koska nämä aggressiiviset ympäristöt voivat aiheuttaa lampun syöpymisen, mistä voi seurata pinnan lohkeilemista, pinnan kuplimista ja valkeaa päällystettä lampun pinnalle.

-Huom! Mahdolliset kuivatusreiät tulee pitää puhtaina.
MUISTA PYYHKIÄ KAIKKI OSAT ENNEN KUIN ASENNAT LAMPUN UUDELLEEN!

GB

We congratulate you on your new outdoor lamp

Stainless steel
Remember to take care of your lamp. Just follow the guidelines below.

The shiny, uniform and decorative surface of stainless steel makes it very suitable for outdoor use.

It is an alloy consisting of iron, chrome and nickel. During bath pickling, a thin, rustproof oxide layer forms on the surface.
The surface is continually vulnerable to atmospheric conditions, and from other effects of the close environment. This means that the lamp must be regularly maintained if its surface is to remain shiny and untarnished by rust.
Before setting it up, treat your lamp with acid-free oil, and dry it off with a soft cloth. Repeat this three or four times a year.
Stainless steel lamps are not recommended for use in aggressive environments such as coastal, agricultural or industrial areas.

Copper, Brass and Tombac fixtures
Our copper, brass and tombac fixtures are made from respectively solid copper, brass and tombac. The mechanical machining will leave small scratches in the surface, as well as residues of rinse aid. This rapidly disappears in the patina process. After the first rain showers the copper / brass / tombak surface will appear stained, but the aerated air and moisture will soon make the lamp appear with dark brownish color. Over the years, the material copper will get a beautiful patina-green color and brass / tombac will get a darker and more uniform color. The uniformity of the patina surface, as well as the rate at which the process occurs is dependent on the environment that affect the fixture.

Hot-galvanized lamps
The zinc treatment of the steel lamps is executed manually in plants. The temperature of the melted zinc is about 460 degrees. When the lamps are dipped in melted zinc a reaction between the metalls occurs, which develops alloys in the surface.
The lamp and the components of the lamp are manually dipped in the hot zinc. This treatment leaves variations in the coating in the form of partly an uneven surface and partly minor formations of drops.
Thin »zinc curtains« might also occur on the surface and they show as a thin film which hangs down from the edge of the lamp. This film can easily be removed or brushed off with a soft brush.

Condensation
Condensation is a natural phenomenon arising under specific atmospheric conditions. Damp heat and cold air meet, which causes condensation of water on the surface.
When water heats up it leads to rising water vapour, which will be able to affect electric components.
Condensation is not included by Nordlux warranty, unless it is possible to prove that a technical /production error in the lighting causes entry of water.
In case of condensation please check:
- If the lighting is mounted according to instructions. Washers should seal tightly. Make sure to tension screws and lenses.
-In garden lightings rising damp from the ground may cause condensation in the metal post. This problem can be defeated by filling sealing material into the metal post.

Aluminium fixtures
Our aluminium light fixtures are made from die-cast and/or extruded aluminium, where the light fixture's design determines whether both types of materials, or just one of them, are used for different parts of the same light fixture. Aluminium light fixtures in raw aluminium are subsequently coated with a special clear coat, which seals the surface to safeguard against corrosion. Painted aluminium light fixtures are powder-coated and have a uniform and smooth surface. To avoid the light fixture tarnishing, it is recommended to clean and wipe the light fixture after mounting, and repeat this process 3-4 times each year. This is done with a regular cleaning agent. Black light fixtures which are bleached by strong sunlight can also benefit from treatment with silicone spray as needed, to maintain the black color. Mounting light fixtures in coastal, agricultural or industrial areas is not recommended, as these aggressive surroundings may cause the light fixture to corrode, which may entail spalling, bubbles in the surface and a whitish incrustation on the light fixture's surface.

-It is highly important that drainage holes are kept free of impurities if any.
BEFORE ASSEMBLING THE BOLLARD AGAIN DO REMEMBER TO WIPE OFF ALL PARTS!
