
Domestic Content Solutions

Manufactured in America. Built for ITC Bonus Credit Success and Long-Term Compliance.

Your Partner In Domestic Content Success

Since 2007, SnapNrack has engineered industry-leading solar mounting and wire management solutions designed to cut rooftop labor and deliver uncompromising structural reliability. Today, SnapNrack leads the industry with a comprehensive U.S.-manufactured racking portfolio—covering railed, railless, and ground-mount architectures across composition shingle, tile, metal, and flat roofs.

Comprehensive '-USA' Product Portfolio

Every domestically produced rail, clamp, splice, attachment, and skirt carries a clear '-USA' suffix and '(USA)' description designator for effortless procurement, warehouse tracking, and tax-equity documentation.

Full Safe Harbor Racking MPC Qualification (Annex I)*

Both Ultra Rail and TopSpeed® Universal qualify across both Manufactured Product Component (MPC) categories—Rails and Structural Fasteners—unlocking the full domestic production bonus under Notice 2025-08.

2026+ Non-PFE / FEOC Readiness (Notice 2026-15)

All SnapNrack Annex I '-USA' components—as well as standard non-USA counterparts in Annex II—are certified Non-PFE Produced, helping projects commencing construction on or after January 1, 2026 meet the 40%+ non-FEOC threshold.*

No Compromise on Speed or Quality

SnapNrack '-USA' components retain the exact engineering, UL 2703 listings, SpeedSeal+™ waterproofing, and single-tool 1/2" socket installation crews rely on every day.

Understanding the 10% DCBC & IRS Notice 2026-15 Framework

Under the Inflation Reduction Act, Commercial and Third-Party-Owned (TPO) solar projects can earn an additional 10% Investment Tax Credit (ITC) adder—raising the base ITC from 30% to 40%—by satisfying required U.S. manufacturing thresholds. Under updated IRS Safe Harbor guidance (Notice 2024-41, Notice 2025-08, and Notice 2026-15):

No Manufacturer Cost Data Required

Calculate domestic content percentages using predefined IRS Safe Harbor tables rather than proprietary supplier cost breakdowns.

System Size Does Not Impact Eligibility

Apply the same standardized IRS percentage methodology regardless of residential TPO or commercial project capacity.

High-Impact Racking Contribution

Using 100% domestic SnapNrack Rails and Structural Fasteners (Annex I) unlocks the "All-or-Nothing" Production Bonus—contributing up to 19.6% on MLPE systems and 24.5% on String systems toward the 40% threshold.

IRS Safe Harbor Racking MPC Category	MLPE Systems	String Systems	SnapNrack Qualifying Parts
Rail MPC	15.0% - 18.7 %	15.0% - 18.7 %	UR-45 / UR-40 Rails, Ground Rail, SkirtRail
Structural Fasteners MPC	3.5% - 4.4%	3.5% - 4.4%	Annex I Clamps, Splices, Mounts, Links, Spacers
All-or-Nothing Production Bonus	1.1% - 1.4%	1.1% - 1.4%	Awarded when 100% of Rails & Fasteners are USA
Total Domestic Racking Contribution	Up to 19.6%	Up to 24.5%	Ultra Rail & TopSpeed Universal Systems
