Water for Today and Tomorrow

# Paulding County Water System News

Richland Creek Reservoir Water Supply Program – March 31<sup>st</sup> 2016

## Launch of Careers in Water

With this announcement, we're pleased to let everyone know that the first of this new ongoing series is launching.

Called "Careers in Water", it will focus on a range of key staff working with a variety of firms involved with the Richland Creek Reservoir Water Supply Program. It's anticipated that these will include Paulding County Water and several of the contractors involved in construction, along with engineering and surveying firms supporting design and construction.

The intent of this new series is to spread the word about a few of the wide array of careers available working in the water industry. Why? Because it's a great industry to work in, but it may not be one that everyone knows about. The snapshots you'll see will include some young professionals and some that have transitioned into the field as second careers.

We hope that everyone will look out for these as they're published on the website periodically throughout the construction phase of the program, and that you enjoy learning something about a few of the many careers available in the water industry from some of the great folks working in it now!

**The Richland  
Creek Reservoir  
(RCR) is a  
new 305-acre  
reservoir that once  
completed, will  
supply over three  
billion gallons of  
drinking water to  
existing and future  
populations in and  
around Paulding  
County.**

**There are a lot of great careers in the water industry!**
