

# Careers in Water

## Lester Smith

Company Name – PC Construction  
Position Title – Sr. Project Engineer

**Lester's Role:** CMAR Contractor on the WTP/Intakes construction.

**What kinds of things do you do in your current position?**

I am part of the Construction Management team managing 25+ subcontracts and bid packages for the Water Treatment Plant portion of the program to ensure that the project is delivered on time and on budget.

**What do you like most about your job?**

Each project presents its own unique challenges to overcome.

**What led you to a career in water and to this position in particular?**

I got started in the water industry when I was in college. I was required to do three internships and the company I hired on with specialized in water and wastewater treatment plant construction.

**How does technology influence your work?**

I can perform my job duties from just about anywhere as long as I have an internet connection.

**What advice would you have for people who may be interested in a career in the Water Industry?**

It is a good field to get into because there is always a need for clean water.

**There are a lot of great careers in the water industry!**
