

# Careers in Water

## Lori Cirami

Company Name – Brown and Caldwell  
Position Title – Resident Engineer

### Lori’s Role: Resident Engineer

**What kinds of things do you do in your current position?**

I complete field inspections, contractor coordination, and interface with the public on the Richland Creek projects.

**What do you like most about your job?**

I get a chance to be helpful to people and support a project that will provide water for the citizens of Paulding County.

**What led you to a career in water and to this position in particular?**

I actually started out as an administrative assistant at a firm specializing in design of dams, and that interested me enough that I went to college for a degree in civil engineering – I worked for Brown and Caldwell while completing my degree and since then have done a variety of engineering and field work including this current assignment.

**How does technology influence your work?**

It makes my work more efficient – as an example, I’m able to look at construction documentation on my phone while out in the field.

**What advice would you have for people who may be interested in a career in the Water Industry?**

This industry has such a wide variety of work, there’s probably a portion of it that would suit almost anyone.

**There are a lot of great careers in the water industry!**
