The Original Cold Water Cleanser for Natural & Organic Fibers

OUR PROMISE CLEAN AND SIMPLE

Over 30 years ago, Le Blanc® was founded on the idea that caring for your fine linens should be simple.

Traditional stain removing approaches to laundering luxury bed and table linens with boiling hot water and harsh dry cleaning chemicals only damages the fabric and destroys its beauty. Out of the need for a safer and easier way to wash these items, we created LINEN WASH®, a cold water cleaner for use in your home washing machine.

Many years later, we are still offering this extraordinary product through our trusted specialty stores. Our customers have stood by us versus other companies with similar products simply because our products work!

We test and ensure our products remove the stains we say they will without using enzymes typically found in common household detergents. They're designed to work in cold water versus hot water to prevent shrinkage, damaging fibers, and setting stains when laundering fine fabrics. Le Blanc® products are 100% biodegradable, contain organic ingredients, safe for high efficient washing machines, and are all made in the USA. We always aim to offer excellent customer service with fast turnaround times. Our packaging is not flashy, but clean and dignified; its inner beauty is what sets us apart.

Why should you choose Le Blanc®?

Over 30 years ago, the owner of a specialty linen shop needed a detergent that would remove stains from fine linens without damaging delicate fabrics. Master chemist Rafael Blanco rose to the challenge and created such a formula.

Everyday detergents found in discount retail superstores contain bleach and other harsh chemicals that cause the fibers in fine linens to yellow, breakdown, or create holes in the fabric. Le Blanc® Linen Wash® was created out of the necessity for a cleanser in which to safely launder fine linens such as household bedding, table linens, and antique linens. Le Blanc® products have a neutral pH formula specially designed for the preservation of all fine washable fabrics; they are free of bleach, caustics, phosphates, sulfates, enzymes, and parabens. Though Le Blanc® products are gentle on all fine washable fabrics, they are triple concentrated so only a ¼ cup is needed to be an effective stain remover against red wine, coffee, perspiration, blood, make-up, and more. Since 1985, we have manufactured and distributed only the highest quality products. Tested and guaranteed to be the recommended choice of laundry products in the linen industry.
