The GWN operates only when an AG Series gas sensor is installed (sold separately). Accuracy, sensitivity, setpoints, and measurement range are dependant on the AG Series sensor connected to the GWN platform. See the AG Series sensor installation guide for details.

* The AG Series gas sensors are warranted for two years from the date of manufacture. The AG Series sensors are not included in the five-year GWN warranty.

Modular platform accepts Veris AG Series sensors (sold separately)...

Interface to DDC system or direct fan control...easy integration with

0 to 10 Vdc with relay, or relay only options...application flexibility

· Relay outputs provide low, high, and sensor end-of-life signals for

no need to install a new GWN when the sensor life wears out

Three colored LEDs (red, yellow, green)...easy status viewing

Interface to control system via 4 to 20 mA with relay, 0 to 5/

Microprocessor controlled...excellent stability

No calibration required...easy maintenance and

multi-stage fan actuation and service indication

DESCRIPTION

GWN Series gas platform offers a convenient means for sensing gases in the environment. The GWN is mounted to any single-gang electrical box and wired to the building controller. Then, a single AGxx gas sensor (sold separately) is installed in the GWN. With this design, there is no need for a costly new installation when a sensor reaches the end of its life. The GWN platform remains installed, and the installer simply opens the GWN housing to replace the modular sensor inside, reducing labor costs and downtime.

AG Series sensors can be swapped in the GWN platform at any time with minimal effort. The GWN platform converts the signal from the AG sensor into an analog or relay signal compatible with building control systems.

APPLICATIONS

- Controlling parking garage ventilation
- Air quality compliance in commercial buildings and factories
- Vehicle bays (ambulance/fire/taxi stations)
- Mechanical rooms
- Sally ports
