Health and Safety Information

Important Health Information and Safety Precautions
When using this product, the safety precautions below must be taken to avoid possible legal liabilities and damages. Read and follow all product safety and operating instructions.

Observe all warnings in the product operating instructions. To reduce the risk of bodily injury, electric shock, fire and damage to the equipment, closely observe the all of the following precautions.

Safety Precautions for Proper Grounding Installation
Caution: Connecting to improperly grounded equipment can result in an electric shock to either you or your devices. This product is equipped with a USB connector to be connected to a desktop or notebook computer. Be sure your computer is properly grounded before connecting this product to the computer. The power supply cord of a desktop or notebook computer has an equipment-grounding conductor and a grounding plug. The grounding plug must be plugged into an appropriate outlet which is properly installed and grounded in accordance with all local codes and ordinances.

Safety Precautions for Power Supply Unit
Use the correct external power source. A product should be operated only from the type of power source indicated on the electrical ratings label. If you are not sure of the type of power source required, consult your authorized service provider or local power company. For a product that operates from battery power or other sources, refer to the operating instructions that are included with the product.

Electrical Safety
This product is intended for use when supplied with power from the designated battery or power supply unit. Other usage may be dangerous and will invalidate any approval given to this product. **Handle battery packs carefully.** This product contains a Li-ion battery. There is a risk of fire and burns if the battery pack is handled improperly. Do not attempt to open or service the battery pack. Do not disassemble, crush, puncture, short external contacts or circuits, dispose of in fire or water, or expose a battery pack to temperatures higher than 60°C (140°F).

Note: Danger of explosion if battery is incorrectly replaced. Replace only with specified batteries. Recycle or dispose of batteries according to all applicable local, state, and federal regulations, or in accordance with the instructions in the reference guide.

Follow these other specific precautions:

- Keep the battery or device dry and away from water or any liquid as it may cause a short circuit.
- The phone should be connected only to products that bear the USB-IF logo or have completed the USB-IF compliance program.
- Keep metal objects away so they do not come in contact with the battery or its connectors as it may cause a short circuit.
- Always keep the battery out of the reach of babies and small children to avoid swallowing. Contact a doctor immediately if the battery is swallowed.
- Do not use a battery that appears damaged, deformed, discolored, has any rust on its casing, if it overheats, and/or if it emits a foul odor.
- Use of an unqualified battery or charger may present a risk of fire, explosion, leakage or other hazard.
- Only use the battery with a charging system that has been qualified with the system per this standard: IEEE Std 1725-200x.
- Use of an unqualified battery may present a risk of fire, explosion, leakage or other hazard.
- Replace the battery only with another battery that has been qualified with the system per this standard: IEEE Std 1725-200x.
- Avoid dropping the phone or battery. If the phone or battery is dropped, especially on a hard surface causing damage, take it to a service center for inspection.
- If the battery leaks: Do not allow the leaking fluid to come in contact with eyes. If contact occurs, DO NOT rub the eyes. Rinse with clean water immediately and seek medical advice. Do not allow the leaking fluid to come in contact with skin or clothing. If contact occurs, flush the affected area immediately with clean water and seek medical advice. Take other precautions to keep a leaking battery away from fire as there is a danger of ignition or explosion.

Prevention of Hearing Loss
Caution: Permanent hearing loss may occur if earphones or headphones are used at high-volume levels for prolonged periods of time.

Safety Precautions for Directed Sunlight
NORMALLY, this product is not designed to operate in extreme temperatures. Do not leave the product or its battery inside a vehicle or in places where the temperature may exceed 60°C (140°F), such as on a car dashboard, window sill, or behind glass that is exposed to direct sunlight or strong ultraviolet light for extended periods of time. This may damage the product, overheat the battery, or pose a risk to the vehicle.

Environmental Restrictions
Do not use this product in gas stations, fuel depots, chemical plants or where blasting operations are in progress, or in potentially explosive atmospheres such as fueling areas, fuel storerooms, below deck on boats, chemical plants, fuel or chemical transfer or storage facilities, and areas where the air contains chemicals or particles, such as grain, dust, or metal powders. Please be aware that sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Aircraft Safety
Due to the possible interference caused by this product to an aircraft's navigation system and its communications network, using this device's phone function on board an airplane is prohibited in most countries. If flight personnel authorize use of electronic devices, switch device to Airplane Mode (consult User Guide for instructions) to turn off RF functions that may cause interference.

Road Safety
In many jurisdictions, vehicle operators are not permitted to use communication services with handheld devices while the vehicle is in motion, except in the case of emergency. In some countries, using hands-free devices as an alternative is allowed.

Safety Precautions for RF Exposure

- Use of non-original, non-manufacturer-approved accessories may violate your local RF exposure guidelines and should be avoided.
- Use only original, manufacturer-approved accessories when such accessories contain metal of any kind.
- Avoid using your phone near strong electromagnetic sources, such as microwave ovens, sound speakers, TV and radio.
- Avoid using your phone near metal structures (for example, the steel frame of a building).

Caution:

- Do not put cell into a heating vest, washing machine or high-pressure container.
- Do not use cell with primary batteries, or batteries of a different package, type, or brand.
- Stop charging the cell if charging is not completed within the specified time.
- Stop using the cell if abnormal heat, odor, discoloration, deformation or abnormal condition is detected during use, charge, or storage.
- Keep away from cell immediately when leakage or foul odor is detected.
- Wash well with water and soap immediately if you get liquid on your face or clothes.
- If liquid leaking from the cell gets into your eyes, do not rub your eyes. Wash them well with clean water and call physician immediately.
- Store batteries out of reach of children so that they are not accidentally swallowed or handled.
- If younger children use the cell, their guardians should explain the proper handling.
- Be sure to read the user's manual and cautions on handling thoroughly before using the cell.
- Batteries have cycle life. Replace failed cell with a new cell that is the same brand immediately after normal life cycle expiration, or if expiration has occurred prematurely. Store batteries in a low-humidity and low-temperature environment if the battery won't be used for an extended period of time.
- Keep it far away from articles or materials with static electric charges while the cell is charged, used, or stored.
- Wipe with a dry cloth before using the cell if the terminals of the cell become dirty.

Interference with Medical Equipment Functions
This product may cause interference with medical equipment malfunction. The use of this device is prohibited in most hospitals and medical clinics for which regulations and rules are commonly posted in such facilities. In these instances, turn your phone OFF as health care facilities frequently use equipment that is adversely affected by RF energy. If you use any personal medical device(s), consult the manufacturer of your device(s) to determine if the device is adversely affected by external RF energy. Your health care provider may be able to assist you in obtaining this information.

Non-ionizing Radiation
Your device has an internal antenna. This product should be operated in its normal-use position to ensure the radiative performance and safety from interference. As with other mobile radio transmitting equipment, users are advised that for satisfactory operation of

the equipment and for personal safety, it is recommended that no part of the human body should come too close to the antenna during equipment operation. Use only the supplied internal antenna. Use of unauthorized or modified antennas may impair call quality and damage the phone, causing loss of performance and SAR level exceeding the recommended limits, as well as causing non-compliance with local and national regulatory requirements. Do not use the antenna while the phone is charging. Unplug this apparatus during lightning storms or avoid nearby lightning or power lines. This Travel Charger is not intended to be repaired by service personnel in case of failure or component defect.

Fire and Explosion
Do not use this product in gas stations, fuel depots, chemical plants or where blasting operations are in progress, or in potentially explosive atmospheres such as fueling areas, fuel storerooms, below deck on boats, chemical plants, fuel or chemical transfer or storage facilities, and areas where the air contains chemicals or particles, such as grain, dust, or metal powders. Please be aware that sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Battery Information and Precautions
To assure product safety, there shall be precautions below.

Danger:

- Use dedicated chargers and follow the specified conditions when charging the cell.
- Do not use the cell only with the specified equipment.
- Do not put or store cell together with metal articles such as necklaces, hairpins, coins, or keys.
- Do not short circuit the (+) and (-) terminals with metal conductors.
- Do not place cell in a device with the (+) and (-) in a reverse way.
- Do not penetrate cell with a sharp articles such as a needle.
- Do not disassemble the cell.
- Do not weld the cell directly.
- Do not use a seriously damaged or deformed cell.
- Thoroughly read the user's manual before use. Inaccurate handling of polymer lithium ion cell may result in heat, fire, explosion, damage or the capacity loss of the cell.
- Do not put cell into a heating vest, washing machine or high-pressure container.
- Do not use cell with primary batteries, or batteries of a different package, type, or brand.
- Stop charging the cell if charging is not completed within the specified time.
- Stop using the cell if abnormal heat, odor, discoloration, deformation or abnormal condition is detected during use, charge, or storage.
- Keep away from cell immediately when leakage or foul odor is detected.
- Wash well with water and soap immediately if you get liquid on your face or clothes.
- If liquid leaking from the cell gets into your eyes, do not rub your eyes. Wash them well with clean water and call physician immediately.
- Store batteries out of reach of children so that they are not accidentally swallowed or handled.
- If younger children use the cell, their guardians should explain the proper handling.
- Be sure to read the user's manual and cautions on handling thoroughly before using the cell.
- Batteries have cycle life. Replace failed cell with a new cell that is the same brand immediately after normal life cycle expiration, or if expiration has occurred prematurely. Store batteries in a low-humidity and low-temperature environment if the battery won't be used for an extended period of time.
- Keep it far away from articles or materials with static electric charges while the cell is charged, used, or stored.
- Wipe with a dry cloth before using the cell if the terminals of the cell become dirty.

Safety Instructions of Travel Charger
Please read the following information carefully.

- The maximum ambient temperature of the travel charger shall not exceed 40°C (104°F).
- The Travel Charger shall be installed according to specification. The current of load and output power shall not exceed the following value:
Input: AC100-240V 50/60Hz 0.15A
Output: DC3V~1A
- The Travel Charger shall be used for I.T. equipment only.
- The Travel Charger shall only.

Interference with Medical Equipment Functions
This product may cause interference with medical equipment malfunction. The use of this device is prohibited in most hospitals and medical clinics for which regulations and rules are commonly posted in such facilities. In these instances, turn your phone OFF as health care facilities frequently use equipment that is adversely affected by RF energy. If you use any personal medical device(s), consult the manufacturer of your device(s) to determine if the device is adversely affected by external RF energy. Your health care provider may be able to assist you in obtaining this information.

Non-ionizing Radiation
Your device has an internal antenna. This product should be operated in its normal-use position to ensure the radiative performance and safety from interference. As with other mobile radio transmitting equipment, users are advised that for satisfactory operation of

the equipment and for personal safety, it is recommended that no part of the human body should come too close to the antenna during equipment operation. Use only the supplied internal antenna. Use of unauthorized or modified antennas may impair call quality and damage the phone, causing loss of performance and SAR level exceeding the recommended limits, as well as causing non-compliance with local and national regulatory requirements. Do not use the antenna while the phone is charging. Unplug this apparatus during lightning storms or avoid nearby lightning or power lines. This Travel Charger is not intended to be repaired by service personnel in case of failure or component defect.

Fire and Explosion
Do not use this product in gas stations, fuel depots, chemical plants or where blasting operations are in progress, or in potentially explosive atmospheres such as fueling areas, fuel storerooms, below deck on boats, chemical plants, fuel or chemical transfer or storage facilities, and areas where the air contains chemicals or particles, such as grain, dust, or metal powders. Please be aware that sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Battery Information and Precautions
To assure product safety, there shall be precautions below.

Danger:

- Use dedicated chargers and follow the specified conditions when charging the cell.
- Do not use the cell only with the specified equipment.
- Do not put or store cell together with metal articles such as necklaces, hairpins, coins, or keys.
- Do not short circuit the (+) and (-) terminals with metal conductors.
- Do not place cell in a device with the (+) and (-) in a reverse way.
- Do not penetrate cell with a sharp articles such as a needle.
- Do not disassemble the cell.
- Do not weld the cell directly.
- Do not use a seriously damaged or deformed cell.
- Thoroughly read the user's manual before use. Inaccurate handling of polymer lithium ion cell may result in heat, fire, explosion, damage or the capacity loss of the cell.
- Do not put cell into a heating vest, washing machine or high-pressure container.
- Do not use cell with primary batteries, or batteries of a different package, type, or brand.
- Stop charging the cell if charging is not completed within the specified time.
- Stop using the cell if abnormal heat, odor, discoloration, deformation or abnormal condition is detected during use, charge, or storage.
- Keep away from cell immediately when leakage or foul odor is detected.
- Wash well with water and soap immediately if you get liquid on your face or clothes.
- If liquid leaking from the cell gets into your eyes, do not rub your eyes. Wash them well with clean water and call physician immediately.
- Store batteries out of reach of children so that they are not accidentally swallowed or handled.
- If younger children use the cell, their guardians should explain the proper handling.
- Be sure to read the user's manual and cautions on handling thoroughly before using the cell.
- Batteries have cycle life. Replace failed cell with a new cell that is the same brand immediately after normal life cycle expiration, or if expiration has occurred prematurely. Store batteries in a low-humidity and low-temperature environment if the battery won't be used for an extended period of time.
- Keep it far away from articles or materials with static electric charges while the cell is charged, used, or stored.
- Wipe with a dry cloth before using the cell if the terminals of the cell become dirty.

Safety Instructions of Travel Charger
Please read the following information carefully.

- The maximum ambient temperature of the travel charger shall not exceed 40°C (104°F).
- The Travel Charger shall be installed according to specification. The current of load and output power shall not exceed the following value:
Input: AC100-240V 50/60Hz 0.15A
Output: DC3V~1A
- The Travel Charger shall be used for I.T. equipment only.
- The Travel Charger shall only.

Interference with Medical Equipment Functions
This product may cause interference with medical equipment malfunction. The use of this device is prohibited in most hospitals and medical clinics for which regulations and rules are commonly posted in such facilities. In these instances, turn your phone OFF as health care facilities frequently use equipment that is adversely affected by RF energy. If you use any personal medical device(s), consult the manufacturer of your device(s) to determine if the device is adversely affected by external RF energy. Your health care provider may be able to assist you in obtaining this information.

Non-ionizing Radiation
Your device has an internal antenna. This product should be operated in its normal-use position to ensure the radiative performance and safety from interference. As with other mobile radio transmitting equipment, users are advised that for satisfactory operation of

the equipment and for personal safety, it is recommended that no part of the human body should come too close to the antenna during equipment operation. Use only the supplied internal antenna. Input: AC100-240V 50/60Hz 0.15A
Output: DC3V~1A
- The Travel Charger shall be used for I.T. equipment only.
- The Travel Charger shall only.

Interference with Medical Equipment Functions
This product may cause interference with medical equipment malfunction. The use of this device is prohibited in most hospitals and medical clinics for which regulations and rules are commonly posted in such facilities. In these instances, turn your phone OFF as health care facilities frequently use equipment that is adversely affected by RF energy. If you use any personal medical device(s), consult the manufacturer of your device(s) to determine if the device is adversely affected by external RF energy. Your health care provider may be able to assist you in obtaining this information.

Non-ionizing Radiation
Your device has an internal antenna. This product should be operated in its normal-use position to ensure the radiative performance and safety from interference. As with other mobile radio transmitting equipment, users are advised that for satisfactory operation of

6. Do not put your phone, phone data or other contact information, ringtones, text messages, voice messages, pictures or videos, etc., may be inadvertently deleted due to careless use, phone repair, or software upgrades. Please back up your important phone numbers and all other vital data. Note that you are responsible for the security of your data. You are not liable for any damages whatsoever due to loss of any or all data stored on any of your devices.

7. Phone data may be lost or contact information, ringtones, text messages, voice messages, pictures or videos, etc., may be inadvertently deleted due to careless use, phone repair, or software upgrades. Please back up your important phone numbers and all other vital data. Note that you are responsible for the security of your data. You are not liable for any damages whatsoever due to loss of any or all data stored on any of your devices.

8. When using the phone in public places, set the ringtone to vibration so you don't disturb others.

9. Do not turn your phone on or off while the device is in close proximity to cables, earbuds and the headphones. Hence, individual susceptibility to noise-induced hearing loss and other hearing problems can vary. Please follow these important guidelines for hearing loss prevention:

Set the phone's volume in a quiet environment and select the lowest volume for which you can hear clearly.

2. When using headphones, turn the volume down if you cannot hear the people speaking around you or if you do not hear what you are hearing to.

3. Do not turn the volume up to block out noisy surroundings. If you choose to listen to your portable device in a noisy environment, consider using noise-canceling headphones or earplugs.

4. As the volume increases, less time is required before your hearing could be affected, so consider limiting your listening time.

5. Avoid listening to music at extremely loud noises (e.g. live concerts) that might cause temporary hearing loss which, in turn, might cause unsafe volume levels to sound in the future.

6. Do not listen at any volume that causes you discomfort. If you experience ringing in your ears, hear muffled speech or experience any temporary hearing difficulty after listening to your portable audio device, discontinue use and consult your health care provider.

9. Do not turn your phone on or off while the device is in close proximity to cables, earbuds and the headphones. Hence, individual susceptibility to noise-induced hearing loss and other hearing problems can vary. Please follow these important guidelines for hearing loss prevention:

Set the phone's volume in a quiet environment and select the lowest volume for which you can hear clearly.

2. When using headphones, turn the volume down if you cannot hear the people speaking around you or if you do not hear what you are hearing to.

3. Do not turn the volume up to block out noisy surroundings. If you choose to listen to your portable device in a noisy environment, consider using noise-canceling headphones or earplugs.

4. As the volume increases, less time is required before your hearing could be affected, so consider limiting your listening time.

5. Avoid listening to music at extremely loud noises (e.g. live concerts) that might cause temporary hearing loss which, in turn, might cause unsafe volume levels to sound in the future.

6. Do not listen at any volume that causes you discomfort. If you experience ringing in your ears, hear muffled speech or experience any temporary hearing difficulty after listening to your portable audio device, discontinue use and consult your health care provider.
