This forecast of construction activities will be issued on a weekly basis throughout the duration of the project. For each activity we will note anticipated impacts, including noise, dust, vibration, odors, sidewalk or street closures, and impacts to parking in lots, garages or at meters. We'll also note when work is planned during off hours (evenings or weekends). There may be occasions when the construction activities will inconvenience your research, teaching, studies, work or home activities. Our goal is to provide you with timely information to help you plan and manage your daily activities during the construction.
