CarSmart AC Inspector

Air Conditioning System Performance Inspector

Add A/C system performance to your routine inspections with CarSmart AC Inspector. This quick and easy inspector provides accurate, non-invasive A/C system performance analyses and can be performed by a service advisor or junior technician in just two minutes.

Problem: Conducting accurate A/C performance inspections require too much time and a qualified technician to add it as a routine pre-service vehicle inspection.

Solution: In two minutes, CarSmart AC Inspector indicates whether the A/C system is operating within OEM specification by comparing outside humidity and temperature to that coming from the A/C vent.

Accurately measure and record:

- Temperature
- Relative Humidity

Benefits and Features:

- CarSmart AC Inspector measures air entering the A/C system and compares it to the air supplied through the vents in the vehicle cabin. This information is transmitted to a mechanics tablet which displays and exports detailed reports to show how well the air conditioning is performing in specific terms as specified by vehicle manufacturers.
- Utilizing this technology is quick, easy and enhances the value-added service to the customer while reinforcing the professionalism of the technician.
- Providing customers with professional onscreen or printed reports helps promote AC service, such as a system charge or repair, while giving the vehicle owner the peace of mind in knowing that it is a necessary service. The CarSmart AC Inspector can also save customers money by identifying an issue such as a low refrigerant charge before it becomes an expensive repair.

Information is displayed on the CPS Mechanics Tablet and can be exported to email, printer or another program

CPS GLOBAL HEADQUARTERS
