*"Explore the Available Opportunities"*

This forum was exceptionally well received by more than 500 attendees last year. The Forum, for Grade 8 - 12 students and parents, will offer insights on steps to take now to prepare for success throughout high school, as well as college and beyond.

With two guest speakers representing the college and work worlds and a panelist of present and past THS students, the Forum will provide examples and demonstrate the benefits of extending classroom instruction to activities outside of school hours by highlighting the alignment between THS learning experiences and readiness for success at college and career levels.
