

Seaford Consulting is looking for System Developers to support our clients' numerous software development efforts. Seaford Consulting supports both custom development projects across a wide variety of technology stacks as well as COTS customization and integration efforts.

Required Skills

- Experience developing systems in ServiceNow
- Demonstrated on-the-job experience building and managing applications
- Demonstrated on-the-job experience with the complete deployment lifecycle - design, build, test, deploy.
- Experience with relational database applications (Ex. MySQL, Oracle)

Desired Skills

- Experience with integration technologies (Ex. REST, SOAP, Messaging)
- Experience with NoSQL/non-relational databases (Hadoop)
- Experience developing in an Agile environment
- Experience developing in and standing up systems in a cloud environment (AWS)

Clearance Information

Position requires and active TS/SCI Clearance with Polygraph.
