

Seaford Consulting is looking for System Testers to support our clients' numerous software development efforts. Seaford Consulting supports both custom development projects across a wide variety of technology stacks as well as COTS customization and integration efforts.

Required Skills

- Experience developing and executing system tests

Desired Skills

- Experience writing automated test scripts (Selenium)
- Experience with relational database applications (Ex. MySQL, Oracle)
- Experience testing in an Agile environment

Clearance Information

Position requires and active TS/SCI Clearance with Polygraph.
