

Lateef Ayomikun Adetayo

Data Analyst | Software Developer

WORK EXPERIENCE

Sunbeth Energies, Lagos, Nigeria

Downstream oil & gas (petroleum trading/logistics, supplying AGO, PMS, ATK) with retail stations and NNPC partnerships

Data Analytics|Software Developer Consultant (Contract) 07/2025 – Present

- **Centralized Data Infrastructure:** Developed and implemented an internal, centralized database by consolidating data from diverse, disparate sources, resulting in a single, unified repository that significantly improved data consistency and accessibility for stakeholders.
- **Automated Data Pipelines (ETL):** Established robust automated data flows to seamlessly transfer data from multiple source systems directly into Microsoft Power BI, ensuring data freshness, minimizing manual effort, and reducing data entry error risk.
- **Interactive Dashboard Design:** Designed and deployed an Interactive Power BI dashboard featuring a foundational set of Compelling visualizations, providing key stakeholders with clear insightful representations of core metrics.
- **Application Development (Power Platform):** Built a robust Authentication, Authorization, and Role-based workflow system using Power Apps to manage user access and streamline business processes.

Sunbeth Global Concepts, Lagos, Nigeria

A global agro-commodities sourcing and trading company empowering farmers and creating socio-economic impact through strategic partnerships, innovation, and industry expertise.

Data Analyst|Software Developer (Contract)

Exception Tracking System

07/2025 – 09/2025

- **Full-Stack Solution Development (Power Platform):** Designed and delivered a holistic Exception Tracking System combining Power Apps for streamlined data input/process automation and Power BI for visualization and analysis.
- **Power Apps Development & Workflow Automation:** Developed a custom, user-friendly Power App with an intuitive interface, integrating it with Power Automate for automated log ID generation and seamless connection to SharePoint Lists for secure data storage.
- **Interactive Real-time Power BI Dashboards:** Implemented interactive Power BI dashboards providing comprehensive, real-time insights, including KPI visualizations and cross-functional reporting.
- **Data Visualization & Security:** Enabled interactive visualizations with drill-down capabilities, filters, and slicers for in-depth analysis, and secured access and collaboration via Power BI Service.

Ecologique Transport Solutions Limited, Abeokuta, Nigeria

Ecologique is a niche player in road haulage, operating a fleet of brand-new LNG-powered heavy-duty trucks

Data Analyst (Contract)

03/2024 – 12/2024

- **Advanced Data Analysis & Reporting:** Utilized advanced analytics tools to extract meaningful, actionable insights and created comprehensive reports and dashboards for informed, data-driven decision-making.
- **Revenue Analysis:** Executed detailed revenue analysis to identify key drivers and trends, directly supporting executive-level business and strategic decisions.
