

Dear Sir/Madam,

This is simple online typing work only, generally known as Captcha Entry Work. No special qualifications required other than computer, internet, minimum typing skills and minimum English knowledge.

There are some captcha entry work servers like pixprofit and kolotibablo. From these servers we get captchas flow. For doing captchas entries in these captchas servers' ids, they pay us in digital dollars like paypal, webmoney, okpay etc, we have to exchange those dollars to Indian rupees with dollars exchangers.

In general user package we give 1 pixprofit id + 3 kolotibablo ids + Multi ids supporting software to work. 6 months validity general user package is for Rs.299/- and 1 year validity general user package is for Rs.499/-. By this you can work with combination of 1 Pix ID + 1 or 2 or 3 KB IDs simultaneously.

Pixprofit: Pixprofit server is paying 1\$ for 1000 captchas in one id, currently it is giving fixed rate, they can change their rates. Previously they were giving night time fixed rate 1\$ for 1000 captchas and day time 0.6\$ to 1\$ for 1000 captchas. In pixprofit each captchas stay for 30 seconds, we have to type and enter within that given time; otherwise it is counted as time-out and many time-outs leads to login id suspension by pixprofit. Pixprofit is basically very slow now, that means captchas flow is slow. We have to type image recaptchas also if they come into screen. Rate in night time is good and fixed to 1\$ for 1000 entries and rate in day time is 0.6\$ to 1\$ for 1000 entries depending on your priority rate. Rate will be good if your speed and accuracy is good in day time also you can earn up to 1\$. If your priority is good then you get good rate and speed. Minimum accuracy level required is 90% for this server.

Minimum withdrawal is 3\$. Whenever you complete 3\$, you can go for withdraw your money, it will take maximum 1 or 2 days to credit your money to your bank account. Day time bit slow when compare to speed in night time the flow is good and rate also.

Kolotibablo: Kolotibablo server is paying from 0.3\$ to 0.7\$ including bonus and on average we can say it will be 0.5\$ for 1000 captchas. Kolotibablo required more than 95% accuracy levels, first 500 captchas we should be more careful in typing, we have to consider initially first 1000 to 1500 captchas as training period. Mean while we get knowledge on how to do captchas of different patterns. Once you habituated to different kind of captchas it is not a big work.

If you are interested in this work, you can pay the Deposit / Transfer / send by PayUMoney the Package cost of Rs.299/- for 6 months package or Rs.499/- for 1 year package in our any of bank accounts mentioned in our Register section in our website <https://etypers.in/HowtoBuy.html> or you can visit us personally at Kukatpalli, Hyderabad or you can deposit Rs.350/- initially and remaining 150/- we deduct from your first payments for 1 year package. If you are going to deposit the money, please inform us before and after the deposit the money. We will send you the package (login IDs, software, and instructions) to your email id within 1 hour and guide you the remaining process.

Thanks and Regards

M. Rajesh
