

CORTINA ARMCHAIR OUTDOOR DESIGN GORDON GUILLAUMIER

Struttura: in metallo con tubo da 30 mm e rete a maglia diametro 4 mm, verniciatura epossidica per esterni effetto buccia d'arancia nel colore bianco.

Base: con scivolanti protettivi in nylon.

Preparazione della struttura: imbottitura interna realizzata con materassino poliuretano espanso ad alta resilienza che avvolge in parte l'interno della seduta, rivestiti in fibra idrorepellente. L'imbottitura è fissata alla struttura con bottoni automatici in ottone inossidabile. Il rivestimento è sfoderabile. Tutti gli accessori utilizzati per la confezione - bottoni, cerniere, filo - sono idrorepellenti e pertanto idonei all'utilizzo outdoor.

Rain Cover optional: realizzata in gommato su poliestere. Nella mescola in PVC sono stati aggiunti additivi volti a migliorarne la funzione protettiva: anti-UV per esposizione all'azione diretta del sole, antimicotica, antibatterica, antiacaro e autoestinguente.

Per la pulizia, evitare l'impiego di detergenti aggressivi anche di uso comune. Si consiglia vivamente di utilizzare il più possibile - non unicamente nei mesi invernali - le fodere Rain Cover, per conservare i prodotti della Lifescape Collection in buona condizione. Nonostante l'impiego di materiali e di lavorazioni accuratamente scelti per le loro proprietà e prestazioni in ambienti esterni, si ricorda che l'azione degli agenti atmosferici può modificare sensibilmente lo stato originale degli arredi.

Frame: 30 mm metal tube and 4 mm diameter mesh, with white powder coat finish for outdoor use with bush-hammered texture.

Base: protective nylon glides.

Frame preparation: resilient polyurethane padding for part of the seat, waterproof fiber cover. Rust-proof brass snap fasteners fix the padding to the frame. Removable covers. All the accessories used in their manufacture - buttons, zippers, thread - are waterproof and therefore suited to outdoor use.

Rain Cover optional: rubberized 150-300 polyester. The PVC contains additives that are designed to offer more protection: anti-UV for exposure to direct sunlight, anti-fungal, anti-bacterial, anti-mite and self-extinguishing.

Avoid the use of aggressive cleaning agents, even general purpose agents.

It is highly recommended to make maximum use of the Rain Covers - not only during the winter months - to keep the Lifescape Collection in good condition. Although the materials and processing methods have been carefully chosen for their properties and performance in outdoor environments, weather conditions can significantly alter the original state of the furniture.

Struktur: aus Metallrohr, Durchmesser 30 mm, und Maschendraht, Durchmesser 4 mm, weiße Epoxylackierung mit Hammerschlageffekt für den Außenbereich.

Gestell: mit Nylongleitern.

Aufbereitung der Struktur: das Polster aus einer hochelastischen Polyurethanschaummatte mit wasserabweisendem Bezug deckt die Innenseite des Sitzes teilweise ab. Die Polsterung ist mit Druckknöpfen aus Messing am Gestell befestigt. Bezüge vollkommen abziehbar. Alle sonstigen verarbeiteten Materialien - Knöpfe, Reißverschlüsse, Nähfäden - sind wasserabweisend und damit für den Außenbereich geeignet.

Rain Cover optional: aus gummibeschichtetem Polyester 150/300. Die PVC Mischung wurde mit einigen Zusätzen zur Verbesserung des Schutzes gegen UV-Strahlen bei direkter Sonneneinwirkung, Pilz-, Bakterien- und Milbenbefall angereichert, das Material ist selbstlöschend. Zum Säubern benutzen Sie bitte keine aggressiven Reinigungsmittel, auch nicht die normalerweise üblichen.

Eswirdempfohlen,dieAbdeckhaubensoftwieVtmöglichundnichtnurindenWintermonaten einzusetzen, um den guten Zustand der Produkte der Lifescape Collection beizubehalten. Es wurden nur aufgrund ihrer guten Eigenschaften und ihrer Beanspruchungsfähigkeit in Außenbereichen ausgewählte Materialien und Verarbeitungen eingesetzt, dennoch kann der originale Zustand der Möbel durch das Wetter empfindlich beeinflusst werden.

Structure : en métal avec tube de 30 mm et grille à maille diamètre 4 mm, peinture époxy pour extérieur à effet peau d'orange de couleur blanche.

Base : avec patins de protection en nylon.

Préparation de la structure : rembourrage interne réalisé avec un matelas en polyuréthane expansé à haute résilience qui enveloppe en partie l'intérieur de la assise, recouvert de fibres hydrofuge. Le rembourrage est fixé avec des boutons pression en laiton. Revêtement déhoussable. Tous les accessoires utilisés pour la confection - boutons, fermetures à glissière, fil - sont hydrofuges et par conséquent adaptés à l'utilisation en extérieur.

Rain Cover optionell : réalisé en gomme sur polyester 150/300. Dans le mélange en PVC ont été ajoutés des additifs visant à améliorer la fonction de protection : anti-UV pour l'exposition à l'action directe du soleil, antimicotique, antibactérien, anti-acarien et auto-éteignant. Pour le nettoyage, éviter l'utilisation de détergents agressifs même d'usage courant. Il est vivement conseillé d'utiliser le plus possible - non seulement pendant les mois d'hiver - les housses Rain Cover afin de garder les articles de la Lifescape Collection en bon état. Malgré l'utilisation de matériaux et de techniques de fabrication soigneusement choisis pour leurs propriétés et leurs prestations à l'extérieur, ne pas oublier que l'action des agents atmosphériques peut sensiblement modifier l'état d'origine du mobilier.
