

SAN MIGUEL ELECTRIC COOPERATIVE, INC.

August 21, 2019

Landowner Notice/CCR Rule

To: AM Peeler Ranch, LLC; Justin Peeler; and Jason Peeler

San Miguel Electric Cooperative, Inc. (San Miguel) is providing notice pursuant to 40 CFR §257.95(g)(2) that there is preliminary evidence of one or more Appendix IV constituents exceeding groundwater protection standards. The groundwater data is from temporary wells located within the Buffer Zone Lease area, which, as you are aware, is the limited area immediately surrounding the power plant. Pursuant to 40 CFR §257.95(g)(1), San Miguel is currently performing environmental investigations to characterize the nature and extent of a possible release of Appendix IV constituents to groundwater from a CCR unit. You have previously been provided the groundwater data related to this notice.

At present, San Miguel has not identified any evidence that these suspected impacts, if confirmed, would represent any actual risk to you or others. If evidence of such a risk is identified, however, San Miguel will notify you and work with you to implement any appropriate protective measures.
