

## Serengeti National Park & Central Serengeti (Seronera)

Needing little introduction, this pristine and unique sanctuary will give you a glimpse into “the world as it was in the beginning.” Relish the vastness of the *serengeti*, “the land that flows on forever,” coupled with some of the best game-viewing all of Africa has to offer. More than 6 million hooves pound its legendary plains and, each year, more than a million wildebeest, 200,000 zebra and 300,000 Thomson's gazelle undertake the largest land migration on the planet. Tanzania's first and most famous park, the Serengeti is renowned for its wealth of leopard, lion, cheetah and black rhino.

## Mount Kilimanjaro

Standing at 19,341 feet (5,895 meters), Mount Kilimanjaro is the highest peak on the African continent and the tallest free-standing mountain in the world. Kilimanjaro is composed of three volcanic cones, two of which are extinct. Trek through diverse vegetation zones on this official route to the snow-capped summit, and enjoy the view of the plains along your multi-day trip. At the summit, take in the feeling of accomplishment—and the breathtaking view from the roof of Africa.
