## Desk Sustainability

---

**ANSI/BIFMA e3-2014e  
LEVEL® Furniture  
Sustainability Standard  
Certification**

A majority of HBF's products have met the necessary qualifications to achieve LEVEL® certification. LEVEL® is the multi-attribute sustainability certification based on the ANSI/BIFMA e3 Furniture Sustainability Standard. The standard and certification were created to deliver the most open and transparent means of evaluating and communicating the environmental and social impacts of furniture products in the built environment. Taking into account a company's social actions, energy usage, material selection and human and ecosystem health impacts, LEVEL® addresses how a product is sustainable from multiple perspectives. The organization, facilities, and products are audited on an annual basis to ensure ongoing compliance and improvement.

With LEVEL®, customers can make informed choices about sustainable commercial office furniture. The LEVEL® mark identifies that a product has been vetted by an independent third party certifier and its numeric marking of 1, 2, or 3 indicates the threshold of certification the product has achieved. A majority of HBF's seating, occasional tables, and conference lines are LEVEL® certified. Please download the certificates from our product pages for the complete details. For more information about the ANSI/BIFMA LEVEL® standard, visit [www.levelcertified.org](http://www.levelcertified.org).

---

**Indoor Advantage™  
Gold certified**

HBF occasional table products are Indoor Advantage™ Gold certified.

SCS Global Services, a reputable third-party certification and assessment body of environmental, sustainability and safety claims since 1984, has developed internationally recognized standards and certification programs to assist businesses with improving their environmental efforts, social accountability and product performance.

## Desk Finish Options + GSA Information

---

### Veneer and Finishes

Wood owes its inherent beauty to variations in color, grain, and texture; therefore, these variations are not considered defects. Due to the natural color and grain variances of wood the final finish color, texture and grain may vary from one furniture piece to another even though they are finished at the same time. Exposure to light and the aging process will cause changes in surface color of natural wood products. Light finishes on wood products do not mask the natural characteristics of wood. HBF does not guarantee the exact matching of grain, pattern and color.

An upcharge of **10% Net** per unit for conference tables, with a minimum upcharge of **\$500 Net** per order, will apply for any custom wood finish.

Refer to the following pages for product material options.

---

### GSA/Federal Contract Information:

**GSA Contract Number 47QSMA22D08P9**

Model numbers identified with the following verbiage “When purchased separately without a configurable TAA compliant end product, not on GSA contract” is to mean that these configurable parts or components:

- Have no functionality or capability without being integrated into an end product; and
  - Are considered **Open Market** if purchased without a configurable TAA compliant end product.
-
