PEUGEOT E-RIFTER

New PEUGEOT E-RIFTER represents a step forward in electrification, with a range of up to 199 miles, while retaining the qualities that have made this multipurpose leisure vehicle such a success, including a comfortable, spacious and modular passenger compartment, a high level of technology, and an attractive exterior design.

E-RIFTER features the brand's new design characteristics inside and out, combining a robust and stylish exterior with a comfortable and inviting interior. The new E-RIFTER has a completely updated front end, including a new radiator grille featuring the PEUGEOT shield, a modernised front bumper design and new front headlights featuring the brand's iconic three-claw light signature.

IMPORTANT NOTE RE: CONVERSIONS

Any vehicle ordered (including panel vans) for a conversion that changes the base vehicle type approval must be aligned to a Stellantis Certified Convertor within Convertool by entering the associated vehicle order number. Please note that if the vehicle order number is not inputted into Convertool then the order/s will be cancelled. It is also important that you discuss your conversion project with the converter before ordering the base vehicle.

SAFETY TECHNOLOGY

The E-Rifter is fitted with numerous driving and manoeuvring assistance systems to increase your comfort and safety.

Advanced Emergency Braking System

(Standard on all versions)

An intelligent autonomous braking system designed to avoid a collision or limit its severity by reducing the vehicle's speed. The system is triggered if the driver does not react quickly enough, by activating the vehicle's brakes.

Lane Keeping Assist

(Standard on all versions)

This intelligent system positions the car centrally in the lane of travel, applying left and right trajectory corrections accordingly, whilst the adaptive cruise control maintains speed and distance from the traffic ahead.

Adaptive Cruise Control with Stop & Go Function

(Standard on GT)

The ACC Stop and Go system, which can be controlled via steering wheel mounted controls provides two key functions:

- Automatically maintains vehicle speed at the reference speed set by the driver
- Automatically adjusts vehicle speed to keep a safe distance from the vehicle in front, in line with the vehicle distance setting selected by the driver.
