

# 750S

**McLaren**

B E N C H M A R K .

The McLaren ethos is clear. We constantly push boundaries. We never stand still. We seek the next level. It's like evolution. Continuous. Progressive. Tireless. Always improving where it counts. In every detail and without compromise.

True to our DNA, the 750S takes this ethos to new heights. And pushes yet further. Beyond the benchmarks set before. Delivering more performance, greater engagement, higher efficiency, extra technology. And beautifully engineered tactile quality.

McLaren to its absolute core, the 750S is defined by the relentless pursuit of lightness. Radical aerodynamics. And remarkable balance, cabin space and visibility.

The lightest and most powerful series production McLaren ever. The continuation of a unique and thrilling heritage. Delivering a purity of purpose and unrivalled breadth of abilities.

The pursuit of perfection has been relentless. Every gram. Every 10th of a second. Every millimetre is a marginal gain that matters. A new apex. The result is a supercar that delivers more performance, even keener responses and a deeper sense of engagement. 750S is the direct result of a passion and single-minded focus. That drives McLaren to beat the benchmarks.

B E A T E N .

# DEEPER INTO THE DNA

McLaren exists to push boundaries. To set new standards. It's in our DNA. The 750S's predecessor, the 720S, created a benchmark for the supercar segment. Delivering a sublime balance of blistering performance, efficiency, usability and soul-stirring engagement.

The 750S carries this DNA into a new era. It evolves the bloodline and improves everything that matters. The result is an uncompromised mix of defining McLaren strengths. Form follows function even more closely across the elegantly radical design. Power is raised. Performance is increased. Weight is cut. And the unique poise that delivers track focus and all-day comfort is even more apparent.

The McLaren ethos is driven by the belief that progress never stops. In the 750S, here lies the incredible proof.

30KG LIGHTER.  
30PS MORE POWER.

# THE POWER OF BALANCE

For the 750S to achieve its evolutionary step forward, it has been improved, revised and refined in thousands of different ways.

Weight is the enemy of fine handling, pure responses and extreme performance. So it has been reduced. Meticulously and obsessively. Through the use of ultra-light materials, computer-aided engineering and innovative thinking. The 750S is a full 30kg lighter than its predecessor.

Aerodynamic development – from the new front bumper and splitter to the new extended rear spoiler – creates enhanced feel and downforce.

The glorious four litre twin-turbo V8 engine has been modified internally to produce 30PS more than before. A shorter final drive intensifies responses and performance. The new Sports Exhaust and a quicker steering rack amplify engagement.

So much more than the sum of its parts. A living example of the power of marginal gains. The 750S brings a new balance of strengths.

EVOLUTIONARY

# RELENTLESS PROGRESS

Core McLaren design principles shape the 750S. The tireless pursuit of better. The seamless organic forms. The functional beauty. And the radical influence of Formula 1™ expertise. But here they have been developed. Honed. Improved.

Dramatic elements dedicated to managing airflow have been developed. The new front bumper and reshaped light

apertures look fresh. But they also improve airflow to the radiators. The side air intakes are reformed to enhance air management across the 750S's lean, muscular side profile. Iconic McLaren Dihedral Doors make getting in and out effortless. While beyond the powerful rear haunches there lies a new, extended rear wing.

As ever, 360° visibility is central to the car's design ethos. Giving total confidence to the driver. At speed. Or around town. The 750S's advanced carbon fibre structure allows for slender A-pillars and glazed C-pillars. The whole cabin has an elegant teardrop profile, which blends with aerodynamic efficiency into the flow of the surrounding bodywork.

# WHAT LIES BENEATH

Under its flowing, organic skin, the 750S encompasses thousands of developments, innovations and improvements.

Its beating heart is the mid-mounted four litre twin-turbocharged V8 engine. An iconic and proven McLaren architecture that now delivers more power and torque – with revised components and bespoke calibration. There is 750PS and 800Nm on tap, thanks to a new triple-layer head gasket, twin fuel pumps and higher turbocharger boost pressure. Class-leading performance is assured.

The gearshift and gearbox hardware have also evolved, with a 15% shorter final drive ratio and recalibrated shifts. The result?

The 750S is up to 10% quicker during in-gear acceleration. Ignition Cut gearshifts and rev-limit downshifts release yet more performance – and pure theatre.

But such figures are simply the natural result of our primary target: enhanced engagement. An all-new central Sports Exhaust has been fine-tuned to deliver spine-tingling crescendos and an emphatic voice. A sound resonator called the ISG enhances sound in the cabin through three special outlets and a throttle valve. Open the 750S Spider's Retractable Hard Top and the sensory experience is all encompassing. Forging a pure connection between car and driver.

# AIR COMMAND

McLaren aerodynamic expertise is legendary. From decades of hard-won experience in the ultimate proving ground of Formula 1™. And through the development of our ground-breaking road cars.

The 750S's radical forms and surfaces work together to improve dynamic balance and feel. And create 5% more downforce than the 720S.

It starts with the new front bumper, splitter and narrowed 'eye sockets' around the headlights. They not only sharpen the visual signature of 750S, but aid aerodynamic efficiency – directing cooling air into the low temperature radiators (LTRs).

On the 750S's taught, muscular sides, new lower air intakes with larger apertures increase cooling airflow to the high temperature radiators (HTRs).

At the rear, a reprofiled rear wing has 20% more surface area, increasing downforce and shortening stopping distances. With driver-adjustable downforce settings, the new wing also has DRS and airbrake functions. The new one-piece rear bumper features air channels to reduce pressure build-up in the rear wheel arches. Further optimising airflow.

I N T E N S I F I E D

# DRIVER FOCUS. SHARPENED.

Major evolutionary progress defines the technology and HMI (Human-Machine Interface) across the 750S. You'll find the driver's instrument display is now mounted to the steering column – with controls for Handling and Powertrain modes at your fingertips. A stunning, optically bonded 8-inch infotainment screen is controlled using a beautifully machined aluminium switch.

Apple CarPlay is now standard – and additional USB-C and USB-A connectivity supports rapid device charging. An all-new feature for the 750S is the McLaren Control Launcher (MCL), which allows you to save your favourite cockpit configurations for Aero, Handling, Powertrain and Gearbox – with everything instantly recalled at the touch of a button.

Across the cabin, switchgear and controls have been refined and relocated. HomeLink® garage door controls are now on the rear view mirror. And even the Vehicle Lift control is operated via a dedicated dashboard button. It takes just four seconds to raise or lower – more than twice as fast as the previous version.

DIN WEIGHT

1389KG

# SUBLIME SPEED

The raw figures speak volumes. Both 750S Coupe and Spider are another step forward in terms of outright speed and acceleration.

With 750PS and 800Nm available, it's no surprise the 750S is searingly quick. But raw power is only part of the story. This is a McLaren. Which means elegantly executed lightweight engineering is just as important.

The 750S's Carbon Fibre Monocage II structure is unique in the supercar segment. Its huge strength and ultra-low weight help to define the car's character. Through design change, lightweight materials and obsessive CAE analysis, the 750S is a full 30 kg lighter than its predecessor – at just 1389 kg.

It's an uncompromising ethos that's 100% McLaren. The relentless pursuit of lightness and accessible power – perfectly balanced to deliver the kind of extreme performance you can experience. And savour. To the absolute fullest.

# DYNAMIC PURITY

Engineering progress, aerodynamic enhancements and technology innovations converge in the 750S to create something far greater than the sum of its parts.

This is a supercar that feels more satisfying. More responsive. More thrilling. In true McLaren fashion, the 750S uses incremental gains to engage you more intensely. To maintain an even finer dynamic balance. And communicate more clearly with the driver.

The 750S's capabilities are broader. From city streets to pit straights. And from fully committed laps to on-road versatility and comfort.

To deliver this dynamic breadth, the 750S has a 6mm wider front track, newly tuned springs, and bespoke twin-valve dampers with both passive and active elements. Plus quicker steering – with a unique new Power Assisted Steering Pump. The new suspension technology combines to provide incredible body control and ride comfort. Without compromise.

U N C O M P R O M I S E D

# EVOLUTIONARY APEX

The 750S is the latest expression of everything we have learned. A purebred McLaren supercar. Shaped by our design and engineering philosophy. And defined by our core DNA.

This is why it's lighter and more powerful than the prodigious car it succeeds. And why it breaks new ground through segment-leading performance and handling.

For the first time, the 750S is launched as a Coupe and Spider simultaneously. Providing inspiring choice, with absolutely no dynamic compromise.

Through highly evolved design and engineering, new technology and bespoke materials, the 750S brings car and driver closer than ever. Redefining engagement and usability. Refining quality and sophistication.

A close-up, high-angle shot of the front of a McLaren 750S. The car's body is a light, metallic silver or white, with sharp, aerodynamic lines. The focus is on the front grille, which features a dark honeycomb mesh pattern. Two bright, horizontal LED light strips are visible, glowing with a warm yellow-orange light. The background is a soft, out-of-focus white, suggesting a clean, studio-like environment.

# NEXT-LEVEL PEACE OF MIND

Underpinning our commitment to enduring quality and confidence-inspiring ownership, the 750S is backed by an extensive McLaren warranty including:

- **3 YEARS UNLIMITED MILEAGE VEHICLE WARRANTY**
- **5 YEARS COSMETIC CORROSION WARRANTY**
- **10 YEARS ANTI-PERFORATION WARRANTY**
- **3 YEARS PAINT WARRANTY**

This is the kind of cover that allows you to drive your 750S to its fullest. Safe in the knowledge that it's comprehensively covered by the people who created it.

## **MAINTAINING THE NEXT GENERATION**

To keep your 750S performing at its absolute best, it should be serviced at a McLaren Retailer every 9,000 miles (15,000 km), or after 12 months if that arrives sooner.

- **3 YEARS INCLUSIVE SERVICING**

Our expert Retailer technicians apply exactly the same meticulous standards when maintaining your 750S as those who first shaped it. So you can relax, knowing it's in the best possible hands.

# THE ART OF THE POSSIBLE

At McLaren Special Operations (MSO), limits are set only by your imagination. From a one-off finish, material or colour that reflects your individuality. To crafting a unique car that breaks the boundaries of conventional personalisation.

We call it 'the art of the possible'.

Whatever your inspiration, our unique experience and creative ability can make it happen. From idea to realisation, we work closely with you to shape your vision.

UNLEASH YOUR CREATIVITY. AND FEEL FREE.  
REALISE A 750S THAT IS UNCOMPROMISINGLY YOURS.  
AND YOURS ALONE.

An aerial photograph of a narrow, winding asphalt road that cuts through a dense, dark green forest of tall evergreen trees. The road has yellow double lines marking its edges. Three cars are visible on the road, driving away from the viewer: a red car in the distance, a white car in the middle ground, and a yellow car in the foreground. The lighting is dramatic, with sunlight filtering through the canopy, creating strong shadows and highlights on the road and trees.

# IT BEGINS WITH YOU. AND YOUR CAR...

Owning a McLaren is different. And it's about more than experiencing the exhilaration of the world's most accomplished supercars.

It opens up the chance to interact with our team and other McLaren owners. To be part of a family of like-minded enthusiasts. And get the absolute maximum from your car.

That's because we offer driving and lifestyle events to challenge and thrill you on some of the world's finest roads and racing circuits.

So why not unleash your 750S's incredible track potential. By honing your skills with professional coaching on the world's most iconic racing circuits? Or get some drift time driving on ice. Or dial down the intensity a little and join one of our epic driving tours. You'll enjoy exclusive VIP access to selected world-class motorsport events too.
