# EFFICIENCY & PERFORMANCE

With an impressive range of up to 466 mi in the combined cycle and more than 310 mi on the highway, this new generation large SUV coupé offers unmatched performance and absolute driving pleasure.

Powered by cutting-edge technology: fast charging capable of going from 20 to 80% in just 28 minutes, DS N°8 possesses an impressive energy performance and precise handling thanks to a new chassis designed for unmatched comfort.

A long-range battery pack, designed and assembled in France, ensures optimal performance and exceptional durability.

A smart ecosystem supports DS N°8, with connected services, thermal preconditioning of the passenger compartment and the battery (if the vehicle is charging) and optimisation of regenerative braking.

FORMULA E

## DS AUTOMOBILES DOUBLE WORLD CHAMPIONS IN FORMULA E

**Formula E** is a 100% electric single-seater championship recognised by the International Automobile Federation, the first race of which took place in 2014. Engaged in Formula E since 2015, DS Automobiles has made its mark on the history of the sport with two double titles (Teams and Drivers) in 2019 and 2020 with an impressive number of victories and podiums. Today, DS still stands out as the most rewarded brand with a record number of points scored since the creation of the championship. This season, DS is associated with Penske Autosport within the DS PENSKE FORMULA E TEAM.

### Why is DS Automobiles involved in Formula E?

“From Track to Road”

Motorsport is a real laboratory for DS Automobiles. It makes it possible to test in extreme conditions technologies that could be used in the development of our road cars. The competition allows technology transfer between single-seaters race cars to our electric and plug-in hybrid models.

Furthermore, having a DS Automobiles team in Formula E aligns perfectly with the brand strategy of launching vehicles of electric propulsion exclusively from 2024.

\*From January 2019 all models are Type Approved according to Worldwide Harmonised Light-Duty Vehicles Test Procedure (WLTP). WLTP is the new official test regime and replaces the New European Driving Cycle (NEDC). The CO2 data has been converted from WLTP back to NEDC-equivalent values in accordance with current vehicle tax and Company Car Tax (CCT) legislation. Two values for CO2 are shown per version, these are the 'Vehicle High'(1) value and the 'Vehicle Low'(2)value. For transparency and clarity, the 'Vehicle High' value has been used to calculate the first year taxation in the prices shown above. The actual CO2 value of a version may vary according to optional equipment fitted but, other than in exceptional circumstances, will be between 'Vehicle High' and 'Vehicle Low'.

For full information, including WLTP fuel consumption data, please see technical specification pages, or refer to your nearest DS retailer.

(1) Vehicle High = High specifications vehicle fitted with maximum available options.

(2) Vehicle Low = Standard specifications vehicle fitted with minimal options.

Please note: an additional annual tax rate applies in years 2 to 6 for vehicles with a list price (which includes basic price, VAT, delivery cost and additional options) in excess of £40,000.

The DS N°8 is a battery electric vehicle requiring mains electricity for charging. Range data given has been determined according to WLTP test procedure methodology. The figures shown are intended for comparability purposes only and should only be compared to other cars tested to the same technical standard. The range you achieve under real world driving conditions will depend upon a number of factors, including but not limited to: the accessories fitted (pre and post registration); charging frequency; personal driving style; vehicle load and route characteristics; variations in weather; heating/air conditioning; pre-conditioning and battery condition. Figures shown reflect a range of configurations and are subject to changes resulting from ongoing product development, range evolution, testing and evaluation. For more information, contact your local DS Automobiles Retailer.
