### Enhanced Safety.

The Vito is based on a sophisticated safety concept. Active driving assistance and safety systems offer useful functions to support the driver. A significantly expanded standard range of assistance systems is available.

#### Active Lane Keeping Assist (JB4)

Protects against unintentional lane departure. If the system's camera detects a lane departure, a corrective steering intervention takes place to guide the vehicle back into the lane. If the driver fails to react and the vehicle crosses the lane markings, an additional haptic warning occurs (pulsed vibration via the steering wheel).

#### **Blind Spot Assist (JA7)**

Helps when changing lanes and reversing. If a vehicle is detected, a warning sign in a red triangle appears in the corresponding exterior mirror.

#### ATTENTION ASSIST (JW8)

Can help to avoid momentary nodding off and therefore provides you with increased safety, in particular when driving at night and on long journeys. The system provides you with a visual and audible warning if it identifies typical signs of fatigue or attention lapses, and suggests taking a break.

#### Intelligent Speed Assist (JS2)

Displays the current speed limit in the driver's direct field of vision in the instrument cluster.

#### **Active Brake Assist (BA3)**

With pedestrian and cyclist detection. The system helps to prevent rear-end collisions. Active Brake Assist can help you to prevent accidents (with vehicles driving in front, with crossing pedestrians or cyclists) or to minimise their consequences.
