PRICES - EQUIPMENT - TECHNICAL SPECIFICATIONS

Effective from 1st October 2024
2024 Model Year (K9) | Version 1.0

PEUGEOT PARTNER

New PEUGEOT PARTNER features a renewed design, improved efficiency, the latest-generation connectivity and more sophisticated driving aids.

It also retains the robustness, versatility and driving dynamics that have made it such a success with professionals. Within the interior, the driving position has been extensively redesigned for greater comfort, ergonomics and practicality. The dashboard and steering wheel have also been redesigned, while the digital instrument cluster and the large central 10-inch touchscreen make the interface between driver and vehicle an enjoyable and efficient one.

PEUGEOT PARTNER **PANEL VAN**

New PEUGEOT PARTNER Panel Van is available in a number of versions: Standard (4.4m) or Long (4.75m) panel van, and two trim levels: Professional and Asphalt.

Partner also includes a fleet management service offer....

Preventative Maintenance
For 4 Years for Customers
managed by DEALERS
(B2C & SME)

OR

Fleet Management Data Pack
For 4 Years for customers
managed by NSC KMAs
(Major Fleets, RAC & Leasing)

The Preventative Maintenance Service via Free2Move is designed to help monitor and optimize the health of commercial vehicle fleets, offering support through live alerts and upcoming maintenance reports. This makes it easier for fleet managers to keep their vehicles in good working condition, saving time and money.

- Fleet Dashboard View
- Maintenance Tracking
- Report via Email
- Vehicle Health Alerts
- Van Maintenance Appointment

Customers can upgrade (via subscription) to Connect Fleet. This management platform is a full version opening up a broader spectrum of possibilities. With Connect Fleet customers can optimise the use of their vehicles by gaining access to consumption reports, mechanical alerts, eco driving and driving behaviour reports and vehicle geolocation in the event of theft in real time.

For more details [click here](#)
For contact [click here](#)

Natively embedded telematics data via MyPeugeot is already included in vehicle purchase for eligible vehicles. This enables a multitude of fleet management use cases to boost fleet efficiency, safety and sustainability, including:

- Fuel Management,
- Vehicle Health Monitoring & Maintenance Management,
- Route Optimization,
- Driver Monitoring,
- EV Charging Management

Benefits for Fleet Customers

- Compatible with any Fleet Management Service Provider
- No expenses for aftermarket device, no additional data costs for customer
- No downtime for installation
- Seamless, immediate and zero-touch activation, rapid deployment at scale
- As telematics system is fully integrated in vehicle, data source is primary and will not be a third party approximation.

*Replacing the traditional lever, the Automatic transmission selection-mode dial/drive wheel is an innovative solution that is both elegant and intuitive. By simply twisting the dial, the following modes can be selected:

- Park, for when the vehicle is stationary and the wheels are locked
- Drive, for Automatic forward motion
- Neutral, for when the vehicle is stationary, wheels are free
- Reverse, for Automatic backward motion

For an extra experience of dynamism, the shift paddles for Automatic transmissions are located behind the steering wheel, offering drivers an extra level of control that is highly ergonomic and intuitive. The shift paddles function in the following way:

- To go up a gear, the driver must pull the right lever towards themselves
- To go down a gear, the driver must pull the left lever towards themselves
