SAFETY

SAFETY FIRST & FOREMOST

This is the safest and strongest Tivoli ever. Safety is built in – from the body up, with a best in class body structure composed of 74% high tensile strength steel. We've also fitted 7-airbags in case you run into trouble - or trouble runs into you.

Anti-Rollover Protection(ARP)

Seatbelt Pre-tensioners

In the event of a collision, the pre-tensioners immediately tightens the seatbelt over the chest and lap, ensuring the occupant is in the best possible restrained position if the airbags are deployed.

SMART SAFETY

Autonomous Emergency Braking

When a frontal collision is anticipated, this function automatically applies the brakes to prevent a collision.

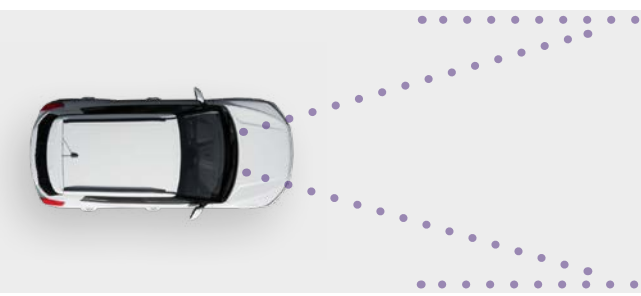

Safety Distance Alert

Detects the distance to the vehicle ahead and warns the driver when a safe distance is not properly maintained.

Lane Departure Warning

Notifies the driver when the forward camera detects an unintended lane departure by the vehicle.

Front Vehicle Start Alert

The system warns the driver when the front vehicle begins to move forward from a still position.

Lane Keeping Assist

Front camera helps prevent unintended lane departure by making a corrective steering adjustment.

Lane Change-Collision and Blind Spot-Detection

Detects vehicles rapidly approaching from behind and flashes a warning light on the outside mirror, to alert the driver.

Rear Cross Traffic Warning

By using rear-corner radars, the system helps to prevent backing into cross traffic by alerting when vehicles are detected.

Speed Limit Warning

Detects an upcoming traffic sign, applies character recognition software to read it, and relays the icon to the infotainment display.
