

B-QUALITY DESCRIPTION

B-quality products are sorted from the A-quality and thus visual quality is clearly diminished. Waste is much greater in assembly than using A-quality.

B-QUALITY PERMISSIBLE DEFECTS

Visual quality clearly diminished, technical quality still valid for original use but waste is much greater in assembly than using A-quality.

Boards with defects which clearly weaken the general quality appearance are sorted to B-quality.

Large bark ringed knots are graded to B-quality.

Short damages allowed in B-quality, minimum 50% of the length of a single board must be usable.

General quality appearance clearly weakened (several black knots).

Large crack of a (sound) knot.

General quality appearance clearly weakened (several knot holes).
