

Harrison, 14

Galloway, OH

I WISH TO GO TO THE MOTOGP RACE.

Children battling life-threatening medical conditions find reprieve and joy in their favorite activities.

For 14-year-old Harrison who has acute lymphocytic leukemia, racing motorcycles is an escape from his exhausting medical routine. Harrison's passion allows him to take off a hospital gown and step into a racing suit, a coat of courage and strength.

When visited by his Make-A-Wish® volunteers, Harrison was certain about his wish: to go to the MotoGP Race, the world's premier motorcycling championship.

From beginning to end, Harrison's wish experience provided moments and memories that will surely last a lifetime. For a young man who has faced so much in such a short time, this trip was a way for Harrison to share his passion and reconnect with his family. They were able to return to normalcy and strengthen their bond through the power of a wish.
