

# Living Memories World COVID Tribute

## Visual Descriptions of Installations

### Rose River Memorial:

Red roses and rose petals cascade upwards in a spiral shape above the Revson Fountain, a black granite circular structure featuring multiple upward streams of water in the center.

In this image, people are gathered around the installation, standing, sitting, and moving around the fountain. The

white stone facades of the Metropolitan Opera and David Geffen Hall stand in the background.

## **Rightfully Sewn Quilt:**

A circular patchwork quilt designed to resemble the Earth. Teal and blue square patches make up the background, representing water. The seven continents of the world are composited with many variations of green, brown, red, and other earth-toned patterned patches.

In this image, the quilt is inside a space with brown and white alternating tiles and a patterned gray carpet. People stand around the quilt, taking photos and looking onward.
