Manual and Installation Instructions

**Please read these instructions before removing parts from crate**

## Introduction

Thank you for your purchase from The Outdoor GreatRoom Company. This pergola has been engineered and manufactured in the USA. The purpose of this manual is to make the installation and assembly simpler. Outdoor GreatRoom company recommends visiting with your local authority for building codes, restrictions, or requirements for this product. Please read the manual through before starting the project.

This pergola is made of premium grade kiln dried Douglas Fir. Douglas Fir, if maintained properly, will last a very long time, similar to life of both Cedar and Redwood. All finished pieces have been dipped in stain to ensure penetration. It is recommended that the pergola receive a clear, oil based stain yearly to maintain the color, minimize warping and prevent rotting. Every few years a colored oil based stain should be used to keep the original color.

### Important:

- **Anchoring Required—Contact your local authority for details**
- **Read instructions prior to assembly**
- **Assistance is required and we recommend at least 2 people for installation**
- **Do not let wood pergolas touch bare ground. Over time this can cause moisture damage and rotting of wood.**
- **If you have questions contact the place of purchase**

Douglas Fir Lumber may have surface splits. This occurs while the lumber dries and seasons. This characteristic is also known as “checking” in the lumber industry. These can be upwards of 1/8” running inches to feet in length. These characteristics do not deter the structural strength and integrity of the product nor does it affect or void the warranty.
