

# Oil Filter Hose

## Strong, Flexible, Low Surface Temperature

Long-lasting  
Eco-friendly  
Safe & Secure

This hose is being used in transferring cooking oil from fryer to the oil filter machine. It is hard to break and have a low surface temperature even when hot oil is flowing through. The silicone cover makes sure that any dirt can be easily wiped off and this maintain the kitchen-hygiene. The hose helps increases the work efficiency due to its user-friendly and safe properties. It reduces the amount of cooking oil being thrown away. This keeps our environment healthy and protects us from pollution.

### Specifications

Designation (inch)	Size (size)		Working Temperature	Working Pressure
	I.D	O.D		
3/8	9	16	MAX180°C	MAX1.3MPa
1/2	12.7	21	MAX180°C	MAX1.3MPa

Strong yet flexible hose, hence it is very easy to handle. Great in dealing with hot and dangerous oil since the hose can be used freely.  
Pick one up and experience it yourself!
