About this user guide

Thank you for choosing this LG product. Please carefully read this user guide before using the device for the first time to ensure safe and proper use.

- Always use genuine LG accessories. The supplied items are designed only for this device and may not be compatible with other devices.
- This device is not suitable for people who have a visual impairment due to the touchscreen keyboard.
- Descriptions are based on the device default settings.
- Default apps on the device are subject to updates, and support for these apps may be withdrawn without prior notice. If you have any questions about an app provided with the device, please contact a LG Service Centre. For user-installed apps, please contact the relevant service provider.
- Modifying the device’s operating system or installing software from unofficial sources may damage the device and lead to data corruption or data loss. Such actions will violate your LG licence agreement and void your warranty.
- Some content and illustrations may differ from your device, depending on the region, service provider, software version, or OS version, and are subject to change without prior notice.
- Software, audio, wallpaper, images, and other media supplied with your device are licenced for limited use. If you extract and use these materials for commercial or other purposes, you may be infringing copyright laws. As a user, you are fully responsible for the illegal use of media.
- Additional charges may incur for data services, such as messaging, uploading, downloading, auto-syncing and location services. To void additional charges, select a data plan suitable to your needs. Contact your service provider to obtain additional details.
Instructional notices

WARNING: Situations that could cause injury to the user and third parties.

CAUTION: Situations that may cause minor injury or damage to the device.

NOTE: Notices or additional information.

Custom-designed Features
Quick Share

You can take a picture or record a video and then share it through an app.

1. Tap ○ > , then take a photo or record a video.

2. Tap the app icon that appears on the screen. You can also swipe the icon towards the opposite direction to see what other apps you can use to share your photos and videos.

- The app displayed by Quick Share may vary, depending on the type and frequency of access of the apps installed on the device.
QSlide

You can display several apps simultaneously on the same screen and switch between them.

For example, you can use the calculator and calendar at the same time.

When an app is running, tap > QSlide.

- This feature may not be supported by some apps.

- [ ]: Switch to full-screen mode.
- [-]: Adjust the opacity of the QSlide window. If the QSlide window is transparent, it will not respond to touch inputs.
- [X]: Close the QSlide window.
- [A]: Adjust the size of the QSlide window.
QuickMemo+

QuickMemo+ overview
You can make creative notes by using a variety options on this advanced notepad feature, such as image management and screenshots, which are not supported by the conventional notepad apps.

Creating a note
1 Tap  Tools > QuickMemo+.
2 Tap + to create a note.
   • ✓: Save a note.
   • ←: Undo the last action.
   • →: Redo the last action you undid.
   • T: Enter a note by using the keypad.
   • ℃: Write notes by hand.
   • ℒ: Erase handwritten notes.
   • ☺: Zoom in or out, rotate or erase the parts of a handwritten note.
   • ♦: Access additional options, including sharing and locking notes, changing the notepad style and inserting content.
3 Tap ✓ to save the note.

Writing notes on a photo
1 Tap  Tools > QuickMemo+.
2 Tap 📷 to take a photo, then tap DONE.
   • The photo is attached into the notepad.
3 Tap T or ℃ to write notes on the photo.
4 Tap ✓ to save the note.
Writing notes on a screenshot

1. While viewing the screen you want to capture, drag the status bar downwards and then tap
   - The screenshot appears as the notepad background theme. Memo tools appear at the top of the screen.

2. Take notes as desired.
   - To crop and save a portion of the screen, tap and specify a portion with the crop tool.
   - To attach a screenshot to the notepad and enter text, tap .

3. Tap and save the notes to the location you want.
   - Saved notes can be viewed in either QuickMemo+ or Photos.
   - To save notes in the same location all the time, select the Use as default app checkbox and select an app.

Managing folders

You can group notes by the note type.

1. Tap > Tools > QuickMemo+.

2. At the top of the screen, tap and select a menu item:
   - All memos: View all the notes saved in QuickMemo+.
   - My memos: View notes created by QuickMemo+.
   - Photo memos: View notes created by .
   - Capture+: View notes created by .
   - Trash: View deleted notes.
   - New category: Add categories.
   - : Rearrange, add or delete categories. To change the name of a category, tap the category.

- Some folders do not appear when launching QuickMemo+ for the first time. Disabled folders are enabled and appear when they contain at least one related note.
Do not disturb

You can limit or mute notifications to avoid disturbances for a specific period of time.

1. Tap ☐ > Settings > Sound & notification > Do not disturb and then swipe ☐ to turn the feature on.

2. Tap Sounds and vibrations and select the mode you want:
   - **Priority only**: Set to Priority only to have sounds and vibrations silenced except for priorities and alarms.
   - **Total silence**: Disable both sounds and vibration.
Ringtone ID

You can set the device to play an automatically created ringtone for an incoming call from a selected contact.

1. Tap ☰ > Settings > Sound & notification > Ringtone ID and then swipe to activate it.

2. Tap Compose ringtones for and select the desired option.

- The default ringtone plays for incoming calls from contacts except for the selected contact.

KnockON

You can turn on or off the screen by double-tapping the screen.

- This option is available only on the Home screen provided by LG. It may not function properly on a custom launcher or on the Home screen installed by the user.
- When tapping the screen, use your fingertip. Do not use a fingernail.
- To use the KnockON feature, make sure that the proximity/light sensor is not blocked by a sticker or any other foreign substance.

Turning on the screen

Double-tap the middle of the screen.

- Tapping the top or bottom of the screen may decrease the recognition rate.

Turning off the screen

Double-tap the status bar, an empty area on the Home screen or the Lock screen.
Knock Code

You can unlock the screen by creating your own Knock Code. When the screen is locked, you can directly access the Home screen by tapping the screen in a specified sequence.

- You can use your Knock Code, together with the KnockOn feature.
- If you enter an incorrect Knock Code more than a specified number of times consecutively, unlock the device by using your backup PIN.
- Make sure to use your fingertip when tapping the screen.

Creating a Knock Code

1. Tap ☰ > Settings > Display > Lock screen > Select screen lock > Knock Code.

2. Tap the squares in a pattern of your choice to create a Knock Code and tap NEXT.

3. Input the created Knock Code again for verification, then tap CONFIRM.

4. Set a backup PIN to use when the Knock Code is forgotten.

Unlocking the screen with a Knock Code

Unlock the screen by inputting the Knock Code you have created. Input your Knock Code on the touch screen when the screen is turned off.
- It is also possible to enter a Knock Code when the lock screen is turned on.
Basic Functions
Product components and accessories

There are a variety of accessories available for your mobile phone, some of which may be sold separately. You can select these options according to your personal communication requirements.

- Device
- Ejection pin
- Stereo headset
- USB cable
- Fast charger
- Quick Start Guide

• Items described above may be optional.
• The items supplied with the device and any available accessories may vary depending on the region or service provider.
• Always use genuine LG Electronics accessories. Using accessories made by other manufacturers may affect your device's call performance or cause malfunctions. Any issues resulting from usage of accessories made by other manufacturers may not be covered by LG's repair service.

• If any of these basic items are missing, contact the dealer from which you purchased your device.
• To purchase additional basic items, contact the LG Customer Support Center.
• To purchase optional items, contact the LG Customer Support Center for available dealers, and then purchase online.
• Some items in the product box are subject to change without notice.
• The appearance and specifications of your device are subject to change without notice.
Parts overview

- Front Camera Lens
- Notification LED
- Proximity/Ambient Light Sensor
- Earpiece
- Microphone
- Charger/USB Port
- Headset Jack
- Rear Camera Lens
- Flash
- Power/Lock Key
- Volume Keys
- Speaker
- Microphone
• **Proximity/Ambient light sensor**
  - Proximity sensor: The proximity sensor turns off the screen and disables touch functionality when the device is in close proximity to the human body. It turns the screen back on and enables touch functionality when the device is outside a specific range.
  - Ambient light sensor: The ambient light sensor analyzes the ambient light intensity when the auto-brightness control mode is turned on.

• **Volume keys**
  - Adjust the volume for ringtones, calls or notifications.
  - While using the Camera, gently press a volume key to take a photo. To take continuous shots of photos, press and hold the volume key.
  - Press the volume down (-) key twice to launch the **Camera** app when the screen is locked or turned off. Press the volume up (+) key twice to launch **Capture+**.

• **Power/Lock key**
  - Briefly press the key when you want to turn on or off the screen.
  - Press and hold the key when you want to select a power control option.

---

- Some functions may be restricted for access, depending on the device specifications.
- Do not put heavy objects on the device or sit on it, as this may damage the screen.
- Screen-protective film or accessories may interfere with the proximity sensor.
- If your device is wet or is being used in a humid place, the touch sensor or buttons may not function properly.
Turning on or off the power

Turning on the power
When the power is turned off, press and hold the Power/Lock key.

- When the device is turned on for the first time, initial configuration takes place. The first booting time for the smart phone may be longer than usual.

Turning off the power
Press and hold the Power/Lock key, then select **Power off**.

Power control options
Press and hold the Power/Lock key, then select an option.
- **Power off**: Turn off the device.
- **Power off and restart**: Restart the device.
- **Turn on Airplane mode**: Block telecommunication-related functions, including making phone calls, messaging and browsing the Internet. Other functions remain available.
Installing the SIM card

Insert the SIM card provided by the device service provider to start using your device.

- Do not insert a memory card into the SIM card slot. If a memory card happens to be lodged in the SIM card slot, take the device to an LG Service Center to remove the memory card.

1. Insert the ejection pin into the hole on the card tray.

2. Pull out the card tray.
3 Put the SIM card on the card tray with the gold-colored contacts facing downwards.

4 Insert the card tray back into the slot.

- This device supports only Nano SIM cards.
- For problem-free performance, it is recommended to use the phone with the correct type of SIM card. Always use a factory-made SIM card supplied by your service provider.

**Precautions when using a SIM card**

- Do not lose your Nano SIM card. LG is not responsible for damage and other issues caused by loss or transfer of a Nano SIM card.
- Be careful not to damage the Nano SIM card when you insert or remove it.
Inserting the memory card

The device supports up to a 2 TB microSD card. Depending on the memory card manufacturer and type, some memory cards may not be compatible with your device.

- Some memory cards may not be fully compatible with the device. If you use an incompatible card, it may damage the device or the memory card, or corrupt the data stored in it.

1. Insert the ejection pin into the hole on the card tray.
2. Pull out the card tray.
3. Put the memory card on the card tray with the gold-colored contacts facing downwards.

4. Insert the card tray back into the slot.

- The memory card is an optional item and is sold separately.
- Frequent writing and erasing of data may shorten the memory card lifespan.
Removing the memory card

Unmount the memory card before removing it for safety.

1. Tap ○ > Settings > General > Storage & USB > △.
2. Insert the ejection pin into the hole on the card tray.
3. Pull out the card tray and remove the memory card.

⚠️ Do not remove the memory card while the device is transferring or accessing information. This may cause data to be lost or corrupted, or may damage the memory card or the device. LG is not responsible for losses that result from the abuse or improper use of memory cards, including the loss of data.
Charging the battery

Before using the device, fully charge the battery. Connect one end of the charging cable to the charger, insert the other end of the cable into the cable port, and then plug the charger into a power socket.

- When connecting a USB cable, make sure that the icon on the cable faces up. Connecting the cable in the wrong way may damage the device.
- Make sure to use an LG-approved charger, and charging cable. Charging the battery with a third-party charger may cause the battery to explode or may damage the device.
- Using the device when it is charging may cause electric shock. To use the device, stop charging it.
- A charging adapter that supports fast charging is included with the product. The fast charging feature may not function if a fast charging adapter other than the genuine adaptor provided with the product is used.

The charger connector is located at the bottom of the device. Insert the charger and plug it into a power outlet.

- Do not open the back cover while your device is charging.
Optimizing battery life

Extend your battery’s power by turning off features that you do not need to run constantly in the background. You can monitor how applications and system resources consume battery power.

Extending your device battery life

- Turn off radio communications when you are not using. If you are not using Wi-Fi, Bluetooth® or GPS, turn them off.
- Reduce screen brightness and set a shorter screen timeout.
- Turn off automatic syncing for Gmail, Calendar, Contacts and other applications.
- Some applications you download may consume battery power.
- Check the battery usage details and close any downloaded apps that are draining the battery.
Touch screen
You can familiarize yourself with how to control your device by using touch screen gestures.

Tapping
Lightly tap with your fingertip to select or run an app or option.

Touching and holding
Touch and hold for several seconds to display a menu with available options.
**Double-tapping**
Tap twice quickly to zoom in or out on a photo or map.

![Double-tapping Illustration](image)

**Drag**
Touch and hold an item, such as an app or widget, then swipe it to another location. You can use this gesture to move an item.

![Drag Illustration](image)

**Flicking**
Gently touch and hold on the screen, then flick left or right to quickly move to another panel.

![Flicking Illustration](image)
Pinching and spreading
Pinch two fingers to zoom out, such as on a photo or map. To zoom in, spread your fingers apart.

- Do not expose the touch screen to excessive physical shock. You might damage the touch sensor.

Information:
- A touch screen failure may occur if you use the device near a magnetic, metallic or conductive material.
- If you use the device under bright lights, such as direct sunlight, the screen may not be visible, depending on your position. Use the device in a shady location or a location with an ambient light that is not too bright and bright enough to read books.
- Do not press the screen with excessive force.
- Gently tap with your fingertip on the option you want.
- Touch control may not work properly if you tap while wearing a glove on or by using the tip of your fingernail.
- Touch control may not work properly if the screen is moist or wet.
- The touch screen may not function properly if a screen-protective film or accessory is attached to the device.
Home screen

Home screen overview
The Home screen is the starting point for accessing various functions and apps on your device. Tap on any screen. This immediately redirects you to the Home screen.

There is a list of apps on the Home screen. You can run apps directly from the Home screen without needing to open the app screens. Drag the Home screen left or right. Available apps appear. User-installed apps as well as default apps can be run from the list of apps.

Home screen layout
You can add frequently used apps, widgets and folders to the Home screen. This simplifies the steps used to access them.

- Status bar
- Widget
- Folder
- Page icon
- Quick access area
- Home touch buttons

- The Home screen may vary, depending on the service provider or software version.
• **Status bar**: View status icons, the time and the battery level.

• **Widgets**: Add widgets to the Home screen to quickly access necessary information without bothering to run apps one by one.

• **Folder**: Create folders to group apps according to particular criteria.

• **Page icon**: Displays the total number of Home screen canvases. The icon reflecting the current canvas will be highlighted.

• **Quick access area**: Fix main apps at the bottom of the screen so that they can be accessed from any Home screen canvas.

• **Home touch buttons**
  - ⬅️: Return to the previous screen. Close the keypad or pop-up windows.
  - ○: Tap to go to the Home screen. To launch Google Search, touch and hold.
  - □: View a list of recently used apps or run an app from the list. Use the **Clear all** option to delete all recently used apps. In some apps, touching and holding the button will access additional options.

**Editing the Home touch buttons**

You can rearrange the Home touch buttons or add frequently used functions to the Home touch button area.

Tap ○ > **Settings > Display > Home touch button combination** and customize the buttons and their locations.

• You can add additional buttons for **QSlide**, **Notification**, and **Capture+**. A maximum of five items can be added.
Status icons

When there is a notification for an unread message, calendar event or alarm, the status bar displays the corresponding notification icon. Check your device's status by viewing notification icons displayed on the status bar.

- 📫: No signal
- 🔄: Data is being transmitted over network
- ⏰: Alarm is set
- 📣: Vibrate mode is on
- 📱: Bluetooth is on
- 🌐: Connected to a computer via USB
- 🌋: Battery level
- ✈️: Airplane mode is on
- 📞: Missed calls
- 📱: Wi-Fi is connected
- 📤: Mute mode is on
- ⛵️: GPS is on
- 📡: Hotspot is on
- 📜: No SIM card

- Some of these icons may appear differently or may not appear at all, depending on the device's status. Refer to the icons according to the actual environment in which you are using the device.
- Displayed icons may vary, depending on the area or service providers.
**Notifications panel**

You can open the notifications panel by dragging the status bar downwards.

Use quick access icons in the notifications panel to easily and quickly turn a function on or off.

Drag left or right on the list of quick access icons to select the function icon you want.

- If you touch and hold the icon, the settings screen for the corresponding function appears.

![Notifications panel](image)

**Notification panel settings**

You can select items to display on the notification panel.

Tap on the notification panel to edit the apps displayed.

- To rearrange quick access icons, touch and hold an icon, then drag it to another position.
- Select icons you want to display on the list. Active functions will have a blue icon.
Switching the screen orientation
You can set the screen orientation to automatically switch, according to the device’s physical orientation.
On the notification panel, tap Rotation from the quick access icon list. You can also tap \( \bigcirc > \text{Settings} > \text{Display} > \text{Auto-rotate screen} \) and then swipe \( \square \) to activate it.

Editing the Home screen
On the Home screen, touch and hold on an empty space, then select the desired action from below.

- To rearrange the Home screen canvases, touch and hold on a canvas, then drag it to another location.
- To add widgets to the Home screen, tap Widgets and drag a widget to the Home screen.
- To change the Home screen wallpaper, tap Home screen settings > Wallpaper and select options (Wallpaper gallery, Live wallpapers, and Photos) on the bottom.
- To change the Home screen settings, tap Home screen settings and customize the desired options. See Home screen settings for details.
- To view or reinstall the uninstalled apps, tap Uninstalled apps. See Recently uninstalled apps for details.

Viewing the background theme
You can view only the background image by hiding the apps and widgets on the Home screen.
Spread two fingers apart on the Home screen.
- To return to the original screen, which displays apps and widgets, pinch your fingers on the Home screen or tap  

Moving apps on the Home screen
On the Home screen, touch and hold an app, then drag it to another location.

- To keep frequently used apps at the bottom of the Home screen, touch and hold an app, then drag it to the quick access area at the bottom.
- To remove an icon from the quick access area, drag the icon to the Home screen.

Using folders from the Home screen

Creating folders
On the Home screen, touch and hold an app, then drag it over another app.

- A new folder is created and the app is added to the folder.

Editing folders
On the Home screen, tap a folder and then do one of the following:

- To edit the folder name and color, tap the folder name.
- To add or remove apps from the list of apps, tap +.
- To remove an app from the folder, touch and hold the app and drag it to the outside the folder. If only one app is left in the folder, the folder disappears automatically.
**Home screen settings**

You can customize the Home screen settings.

1. Tap 🔄 > **Settings** > **Display** > **Home screen**.

2. Customize the following settings:
   - **Select Home**: Select a Home screen mode.
   - **Wallpaper**: Change the Home screen background wallpaper.
   - **Screen swipe effect**: Select an effect to apply when the Home screen canvas switches.
   - **Sort apps by**: Change the app order for the Home screen.
   - **Grid**: Change the app arrangement mode for the Home screen.
   - **Hide apps**: You can select the apps you want to hide from the Home screen.
Screen lock

Screen lock overview
Your device's screen turns off and locks itself if you press the Power/Lock key. This also happens after the device is left idle for a specified period of time.
If you press the Power/Lock key when a screen lock is not set, the Home screen appears immediately.
To ensure security and prevent unwanted access to your device, set a screen lock.

- Screen lock prevents unnecessary touch input on the device screen and reduces battery consumption. This mode also lowers battery consumption.

Configuring lock screen settings
There are several options available for configuring lock screen settings.

1. Tap ☰ > Settings > Display > Lock screen > Select screen lock and then select the method you prefer.
2. Customize the following lock settings:
   - **None**: Deactivate the screen lock function.
   - **Swipe**: Slide on the screen to unlock the screen.
   - **Knock Code**: Tap a pattern to unlock the screen.
   - **Pattern**: Draw a pattern to unlock the screen.
   - **PIN**: Enter a numeric password to unlock the screen.
   - **Password**: Enter an alphanumerical password to unlock the screen.

- If screen lock is set using a Knock code, Pattern, PIN or Password and you enter an incorrect pin or pattern more than a specified number of times, password entry is blocked for 30 seconds.
Lock screen settings
You can customize lock screen settings.

1. Tap 🔄 > Settings > Display > Lock screen.
2. Customize the following settings:
   - **Select screen lock**: Select a screen lock method. If you do not want to use screen lock, tap None.
   - **Smart Lock**: Specify trusted devices or places to automatically unlock the screen for those devices or places.
   - **Screen swipe effect**: Set screen transition effects to apply when the screen is unlocked. This option appears when the screen lock method is set to Swipe.
   - **Wallpaper**: Change the lock screen background wallpaper.
   - **Shortcuts**: Add an app shortcut and directly access the app from the lock screen by dragging the app shortcut on the screen. This option appears if the screen lock method is set to swipe.
   - **Contact info for lost phone**: Display emergency contact information on the lock screen.
   - **Lock timer**: Set the amount of time remaining before the device becomes idle and then the screen automatically locks.
   - **Power key instantly locks**: Instantly lock the screen when the Power/Lock key is pressed.

- Available setting items may vary, depending on the selected screen lock method.
Device encryption

Encrypting your device
Allows you to encrypt data on the device for security. It is possible to read, write and copy data even when device encryption is set. It is also possible to require inputting your screen lock when powering on the device.

Precautions for device encryption
You can use the mobile phone lock on the lock screen to increase your device's protection level.

- If the mobile phone lock is turned on and an incorrect password is entered more than a specified number of times, the device will automatically reset.
- If you forget your decryption password, reset the device. Factory reset will delete all data saved before reset.
- Stopping encryption before it is complete may damage data. Wait until the process is complete.
Memory card encryption

You can encrypt and protect data saved on the SD card. The encrypted data in the SD card cannot be accessed from another device.

1 Tap ☰ > Settings > General > Security > Encrypt SD card.
2 Read the on-screen overview of SD card encryption and then tap CONTINUE to continue.
3 Select an option and tap ENCRYPT NOW:
   • New data encryption: Encrypt only data that is saved on the SD card after encryption.
   • Full encryption: Encrypt all the data currently saved on the SD card.
   • Exclude media files: Encrypt all files, except for media files such as music, photos and videos.

- To encrypt the SD card, make sure that screen lock is set using a PIN or password.
- Once SD card encryption starts, some functions are restricted to access.
- If you turn off the power while encryption is underway, the encryption process will fail, and some data may be damaged.
- Encrypted files are accessible only from the device where the files were encrypted.
- The encrypted SD card cannot be used on another device. To use the encrypted SD card on another mobile device, format the card.
- You can perform SD card encryption on your device even when it does not contain an SD card installed. Any SD card that is installed after encryption will automatically be encrypted.
Taking screenshots
You can take screenshots of the current screen you are viewing.

Via a shortcut
Press and hold the Power/Lock key and the volume down (-) key simultaneously for at least two seconds.
  • Screenshots can be viewed from the Screenshots folder under Gallery.

Via Capture+
On the screen where you want to take a screenshot, drag the status bar downwards, then tap Capture+.

  • When the screen is turned off or locked, you can access Capture+ by pressing the volume up (+) key twice. First tap Settings > General and then turn on Shortcut key.
  • See Writing notes on a screenshot for details.
Entering text

Using the Smart keyboard

You can use the Smart keyboard to enter and edit text. With the Smart keyboard, you can view text as you type without bothering to alternate between the screen and a conventional keyboard. This allows you to easily find and correct errors when typing.
Moving the cursor
With the Smart keyboard, you can move the cursor to the exact position you want.
When typing text, touch and hold on the space bar and then drag left or right until the cursor moves to the position you want in the text.

- This option is available only on the QWERTY keyboard.
Suggesting words

Smart keyboard automatically analyzes your usage patterns to suggest frequently used words as you type. The longer you use your device, the more precise the suggestions are.

Enter text, then tap a suggested word.

• The selected word is automatically entered. You do not need to manually type every letter of the word.

• To manage your word suggestions, tap ☰ > Settings > General > Language & keyboard > LG Keyboard > Word suggestions. You can also tap ⌈ on the keyboard and tap Word suggestions.
Changing the QWERTY keyboard layout

You can add, delete or rearrange keys on the bottom row of the keyboard.

1. Tap ☰ > Settings > General > Language & keyboard > LG Keyboard > Keyboard height and layout > QWERTY keyboard layout.
   You can also tap ⏎ on the keyboard and tap Keyboard height and layout > QWERTY keyboard layout.

2. Tap a key on the bottom row, then drag it to another position.

- This option is available on the QWERTY, QWERTZ and AZERTY keyboards.
- This option may not be supported for some languages.
Customizing the keyboard height
You can customize the keyboard height to maximize hand comfort when typing.

1. Tap ⚪ > Settings > General > Language & keyboard > LG Keyboard > Keyboard height and layout > Keyboard height. You can also tap 🛠 on the keyboard and tap Keyboard height and layout > Keyboard height.

2. Adjust the keyboard height by dragging the blue bar up and down.

Selecting a landscape keyboard mode
You can select a landscape keyboard mode from several choices.

1. Tap ⚪ > Settings > General > Language & keyboard > LG Keyboard > Keyboard height and layout > Keyboard type in landscape.
   You can also tap 🛠 on the keyboard and tap Keyboard height and layout > Keyboard type in landscape.

2. Select a keyboard mode.
Splitting the keyboard
You can split the keyboard in half and place each piece on either side of the screen when the screen is in landscape mode.

1. Tap \( \bigcirc \) > Settings > General > Language & keyboard > LG Keyboard > Keyboard height and layout > Split keyboard. You can also tap 📴 on the keyboard and tap Keyboard height and layout > Split keyboard.

2. On the keyboard, spread your fingers apart horizontally.
   - To merge the split keyboard, pinch your fingers together on the keyboard.

One-handed operation mode
You can move the keyboard to one side of the screen so that you can use the keyboard with one hand.

1. Tap \( \bigcirc \) > Settings > General > Language & keyboard > LG Keyboard > Keyboard height and layout > One-handed operation. You can also tap 📴 on the keyboard and tap Keyboard height and layout > One-handed operation.
2 Tap the arrow displayed next to the keyboard to move the keyboard in the direction you want.

![Keyboard Arrow]

**Entering text by using voice**

On the keyboard, touch and hold 🎤 and then select 🎤.

- To maximize the voice command recognition, speak clearly.
- To enter text by using your voice, make sure that your device is connected to a network.

**Adding languages to the keyboard**

You can change the input language.

1 Tap ❌ > **Settings** > General > **Language & keyboard** > LG Keyboard > **Select languages**.

2 Select the languages you want to make available and tap ❌.
Copy and Paste
You can cut, copy, or paste text between apps.

1. Touch and hold around the text you want to copy or cut.
2. Drag 📐/✍️ to specify the area to copy or cut.
3. Select either CUT or COPY.
   • Cut or copied text is automatically added to the clip tray.
4. Touch and hold the text input window, then select PASTE.

   • If there is no item that has been copied or cut, the PASTE option will not appear.

Clip Tray
If you copy or cut an image or text, it is automatically saved to the clip tray and can be pasted to any space at any time.

1. On the keyboard, touch and hold ☒ and select 📐.
   You can also tap and hold the text input window, then select CLIP TRAY.

2. Select and paste an item from the clip tray.
   • Tap ☑️ to lock saved items in order to not delete them; even when the maximum quantity is exceeded. A maximum of ten items can be locked. To delete locked items, unlock them first.
   • Tap 🗑️ to delete the items saved to the clip tray.

   • The clip tray may not be supported by some downloaded apps.
Useful Apps
Installing and uninstalling apps

Installing apps
Access an app store to search and download apps.
• You can use SmartWorld, Play Store or the app store provided by your mobile service provider.

- Some app stores may require you to create an account and sign in.
- Some apps may charge fees.
- If you use mobile data, you may be charged for data usage, depending on your pricing plan.

Uninstalling apps
Uninstall apps that you no longer use from your device.

- Some apps cannot be uninstalled by users.

Uninstalling with the touch and hold gesture
• On the Home screen, touch and hold the app you want to uninstall, then drag it over Uninstall at the top of the screen.
• On the Home screen, you can also tap and hold and then release the app you want to uninstall to enter the Uninstall mode. Tap \( \times \) that appears on the top of the app that can be uninstalled and then select UNINSTALL.
• If apps were uninstalled within 24 hours from now, you can reinstall them. See Recently uninstalled apps for details.
Uninstalling by using the settings menu
Tap ☰ > Settings > General > Apps, select an app, then tap Uninstall.

Uninstalling apps from the app store
To uninstall an app, access the app store you download the app from and uninstall it.

Recently uninstalled apps
You can view the uninstalled apps on the Home screen. You can also reinstall apps which were uninstalled within 24 hours from now.

1. Tap ☰ > Management > Uninstalled apps.
2. Activate the desired function:
   - **Reinstall**: Reinstall the selected app.
   - ❌: Remove the uninstalled apps permanently from the device.

- Uninstalled apps are automatically removed from the device 24 hours after it was uninstalled. If you want to reinstall the uninstalled apps, you must download them again from the app store.
- This feature is activated on the default Home screen only. If you uninstall apps while using the EasyHome screen or other launcher, they are immediately and permanently removed from the device.
Phone

Voice call
You can make a phone call by using one of the available methods, such as manually entering a phone number or making a call from the contact list or the list of recent calls.

Making a call from the keypad
1. Tap ○ > 📞 > Dial.
2. Make a call by using a method of your choice:
   - Enter a phone number and tap 📞.
   - Touch and hold a speed dial number.
   - Search for a contact by tapping the initial letter of a contact name in the contact list, and then tap 📞.

   - To enter "+" when making an international call, touch and hold number 0.
   - See Adding contacts to the speed dial list for details on how to add phone numbers to the speed dial list.

Making a call from the contact list
1. Tap ○ > 📞 > Contacts.
2. From the contact list, select a contact and tap 📞.

Answering a call
To answer a call, swipe 📞 on the incoming call screen.
- When the stereo headset is connected, you can make calls by using the call/end button on the headset.
- To end a call simply by pressing the Power/Lock key, tap ○ > Settings > Networks > Call > Answer and end calls, then turn on End calls with the Power key.
Rejecting a call

To reject an incoming call, swipe on the incoming call screen.
- To send a rejection message swipe on the incoming call screen and select the message you want to send.
- To add or edit a rejection message, tap > Settings > Networks > Call > Decline and reject calls > Decline with message.
- When a call is coming in, you can press the Power/Lock Key or the volume key to switch to mute mode.

Viewing missed calls

If there is a missed call, the status bar at the top of the screen displays 📲.
To view missed call details, drag the status bar downwards and tap the missed call notification. You can also tap > Call logs.

Functions accessible during a call

During a call, you can access a variety of functions on the call screen.
- **Add call**: Allows you to add a call to the current conversation.
- **End**: End a call.
- **Dialpad**: Display or hide the dial pad.
- **Speaker**: Turn on the speakerphone function.
- **Mute**: Mute your voice so that your voice cannot be heard by the other party.
- **Bluetooth**: Use a Bluetooth device to make calls. Make sure that a Bluetooth device is connected.
- **⋮**: Access additional call options.

- Available settings items may vary depending on the area or service provider.
Making a three-way calling
You can make a call to another contact during a call.

1. When you’re connected, tap **Add call** on the call screen.
2. Enter a phone number and tap ✆.
3. To start a conference call, tap ☺.

* You may be charged a fee for each call. Consult your mobile service provider for more information.

Viewing call logs
To view recent call logs, tap ☺ > Call logs. Then, you can use the following functions:

- To view detailed call logs, select an entry. To make a call to the selected call entry, tap ✆.
- To delete call logs, tap ☺ > Delete or Delete all.

* The displayed call duration may differ from the call charge. Contact your mobile service provider for details on call charges.

Configuring call options
You can configure various call options.

1. Tap ☺ > Dial or Call logs.
2. Tap ☺ > Call settings and then configure the options to suit your preferences.
Messaging

Sending a message
You can create and send messages to your contacts using the Messaging app.

- Sending messages abroad may incur additional charges.

1. Tap ○ > 📩.
2. Tap +.
3. Specify a recipient and create a message.
   - To attach files, tap 📀.
   - To access optional menu items, tap ⚙.
4. Tap Send (or Send MMS) to send the message.

Reading a message
You can view exchanged messages organized by contact.

1. Tap ○ > 📩.
2. Select a message from the message thread list.

Configuring messaging settings
You can change messaging settings to suit your preferences.

1. Tap ○ > 📩.
2. Tap ⚙ > Settings from the message list.
Camera

Starting the camera
You can take and save photos or videos to your device.
Tap ○ > Ⓒ.

- Before taking a photo, wipe the camera lens with a microfiber cloth. If your finger comes into contact with the camera lens, you may get blurry photos.
- If the battery level is lower than 5%, charge the battery before using the camera.
- Images included in this user guide may be different from the actual device.

Switching between cameras
You can switch between front and rear camera.
On the camera screen, tap Ⓞ or drag the screen in any direction to switch between front and rear camera.

- Use front camera to take selfies. See Taking selfies for details.

Zoom in or out
You can use zoom in or out on the camera screen while taking a picture or recording a video.
On the camera screen, pinch or spread two fingers to zoom in or out.
Camera viewfinder

You can take photos or record videos by selecting a variety of camera modes and options.

1. On the camera screen, tap 📷 to display the camera options.
2. The following options are available.

- Hide/display options
- Turn the flash on and off.
- Switch between the front and rear cameras.
- Select a camera mode.
- Change the camera settings.
- Access the Gallery.
- Record a video.
- Take a photo.
- Return to the previous screen.

Taking a photo

1. Select a camera mode and tap the subject to focus the camera on.
2. Tap 📷 to take a photo. You can also tap a Volume key.

- When the screen is turned off or locked, start the camera by pressing the Volume Down (-) key twice. To activate this function, tap ☰ > Settings > General and turn on Shortcut keys.
Recording a video
1. Select a camera mode and tap the subject to focus the camera on.
2. Tap 📸.
   • To take a photo while recording a video, tap 📸.
   • To pause the recording, tap ||. To resume the recording, tap ●.
3. Tap ☑️ to end the recording.

Panorama
You can create a panoramic photo by moving the camera in one direction to photograph and stitch continuous shots for a wide view.
1. On the camera screen, tap MODE > 🌋.
2. Tap 📸 and then slowly move the camera in one direction.
   • Move the device by following the direction of the arrow in the guideline.
3. Tap ☑️ to stop taking the photo.

Burst shot
You can take continuous shots of photos to create moving pictures. Open the camera and touch and hold 📸.
• Continuous shots are taken at a fast speed while 📸 is held down.
Configuring the camera options

You can customize a variety of camera options to suit your preferences.

Open the camera and tap 📷.

- Available options vary, depending on the selected camera mode.

</table>
Taking selfies
You can use the front camera to view your face on the screen and take selfies.

- When using the front camera, you can change how selfies are taken in the camera options. See Configuring the camera options for details.

Gesture shot
You can take selfies by using gestures.
Show your palm to the front camera and then clench your fist.
- In three seconds, a photo is taken.

- To use this function, make sure that [KateK] is selected under camera options.
- An alternative way to take gesture shots is to clench your fist and then open it towards the front camera.
- Make sure that your palm and fist are within the reference line so that the camera can detect them.
Interval shot
You can take Interval shots from the front camera. Touch and hold 📷 for a couple of seconds to automatically take four selfies in a row.

Auto shot
You can use the face detection feature to take selfies easily and conveniently. You can set the device so that, when you look at the screen, the front camera detects your face and takes a selfie automatically.
• When the front camera detects your face, the frame turns white. Then if you stop moving, the frame turns blue and the front camera takes a photo.

⚠️ Tap ⏰, then tap 📷 until ⏰ appears to activate the Auto shot function.
File Manager
You can view and manage files saved on your device.
1. Tap 📁 > Tools > File Manager.
2. Tap ☐ and select a storage space.

Weather
You can view the weather information for a particular area.
1. Tap 📅 > Tools > Weather.
2. Tap ✖ and add the city you want.
   - On the detailed weather screen, tap 📊 / 📊, or swipe the screen left or right to view the weather for other cities.

Calculator
You can use two types of calculators: the simple calculator and the scientific calculator.
1. Tap 📅 > Tools > Calculator.
2. Use the keypad to make a calculation.
   - To use the scientific calculator, tap ➤ > Scientific calculator.
   - To view calculation history, tap ➤ > Calculation history.
Voice Recorder

You can record and save your voice or others’ voices from important events. Recorded voice files can be played back or shared.

1 Tap 📺 > Tools > Voice Recorder.
   • To save the location details of recording, tap Location.

2 Tap 🔔.
   • To pause recording, tap 🎤.

3 Tap ⏱ to end recording.
   • The file is saved automatically and the recorded files screen appears.

4 Tap ⏯ to play the recorded voice.

   - If you tap 🎧, recorded voice files appear. You can play a recorded voice file from the list.

Downloads

You can view, delete or share files downloaded via Internet or apps.

Tap 📺 > Tools > Downloads.

Clock

Alarm

You can set an alarm to trigger it at a specified time.

1 Tap 📺 > Tools > Clock > Alarm.

2 Tap 📣 to add a new alarm.

3 Configure the alarm settings and tap SAVE.
• You can select a previously set alarm to edit it.
• To delete an alarm, tap 🕒 at the top of the screen. You can also tap and hold the alarm.

World clock
You can view the current time in cities around the world.

1 Tap ⌚ > Tools > Clock > World clock.
2 Tap + and add a city.

Timer
You can set the timer to trigger an alarm after a specified period of time.

1 Tap ⌚ > Tools > Clock > Timer.
2 Set the time and tap Start.
   • To suspend the timer, tap Stop. To resume the timer, tap Resume.
   • To initialise the timer settings, tap Reset.
3 Tap Stop to stop the timer alarm.

Stopwatch
You can use the stopwatch to record a lap time.

1 Tap ⌚ > Tools > Clock > Stopwatch.
2 Tap Start to initiate the stopwatch.
   • To record a lap time, tap Lap.
3 Tap Stop to suspend the stopwatch.
   • To resume the stopwatch, tap Resume.
   • To delete all the stopwatch records, tap Reset.
Contacts

Contacts overview
You can save and manage contacts.
Tap ⬅️ > Contacts.

Adding contacts

Adding new contacts
1. On the contact list screen, tap ⬅️.
2. Enter contact details and tap SAVE.

Importing contacts
You can import a contact from another storage device.
1. On the contact list screen, tap ⬅️ > More > Manage contacts > Import.
2. Select the source and target locations of the contact you want to import, and then tap OK.
3. Select a file and tap IMPORT.

Adding contacts to the speed dial list
1. On the contact list screen, tap ⬅️ > Speed dial.
2. Tap Add contact from a speed dial number.
3. Select a contact.
Searching for contacts
You can search for contacts by using one of the following options:
- On the contact list screen, enter a contact name in the search box.
- Drag the contact list up or down.
- From the index of the contact list screen, tap the initial letter of a contact.

Contacts list

Editing contacts
1. On the contact list screen, select a contact from the contact list.
2. On the contact detail screen, tap ⌨️ and edit details.
3. Tap SAVE to save changes.

Deleting contacts
1. On the contact list screen, touch and hold a contact from the contact list.
2. Tap Delete contact.
3. Tap DELETE to confirm.

Adding favorites
You can register frequently used contacts as favorites.
1. On the contact list screen, select a contact from the contact list.
2. On the contact details screen, tap ⭐.

Creating groups
1. On the contact list screen, tap Groups > ☰ > New group.
2. Enter a new group name.
3. Tap Add members, select contacts, then tap ADD.
4. Tap SAVE to save the new group.
LG Backup

You can back up and restore data saved on your device.

1. Tap ○ > Management > LG Backup. You can also tap ○ > Settings > General > Backup & reset > LG Backup.

2. Follow the on-screen instructions to select whether to back up data in the preset backup folder on the device or to copy data to other devices.

- Formatting your device may delete backup files saved in internal storage. To minimize data loss, copy important backup files from the LG Backup folder in the internal storage to a computer or external storage.

- Data under a Google account is not backed up. When you synchronize your Google account, Google apps, Google contacts, Google calendar, Google memo app data and apps downloaded from Play store are stored on the Google Drive automatically.

- Backup files are saved with the file extension *.lbf under the LG Backup folder on the SD card or internal storage.

- Fully charge the battery before backing up or restoring data to avoid unintentional powering off during the process.
Google apps

You can use Google apps by setting a Google account. The Google account registration window appears automatically when you use a Google app for the first time. If you do not have a Google account, create one from your device. For details on how to use an app, see the Help in the app.

- Some apps may not work, depending on the area and service provider.

Drive

Upload, save, open, share and organize files from your device. Files accessible from apps can be accessed from anywhere, including online and offline environments.

Docs

Create documents or edit documents created online or from another device. Share and edit documents together with others.

Maps

Find your location or the location of a place on the map. View geographical information.

Photos

View or share photos or albums saved on your device.

Slides

Create presentation material or edit presentation material created online or from another device. Share and edit presentation material together with others.

Hangouts

Exchange messages. Make a video call with an individual or a group.
Chrome
Sign in to Chrome and import opened tabs, bookmarks and address bar data from a computer to your device.

Gmail
Register your Google email account to your device to check or send email.

Sheets
Create spreadsheets or edit spreadsheets created online or from another device. Share and edit spreadsheets together with others.

Play Movies & TV
Use your Google account to rent or purchase movies. Purchase content and play it anywhere.

YouTube
Search and play videos. Upload videos on YouTube to share them with people around the world.

Play Music
Purchase music files from the Play Store. Play music files saved on your device.

Calendar
The Calendar app allows you to track your schedule of events, organized by day, week, month, year, or agenda.
Phone Settings
Settings
You can customize your device settings.
Tap ☐ > Settings.

หมายเหตุ
- Tap and enter a keyword in the search box to access a setting item.
- Tap ☐ to change the view mode. This user guide assumes that you are using the Tab view.

Networks
Airplane mode
You can turn off the call and mobile data functions. When this mode is on, functions that do not involve data, such as games and music playback, remain available.

1. On the settings screen, tap Networks > Airplane mode.
2. Swipe ☐ to activate it.
3. Tap TURN ON in the confirmation screen.

Wi-Fi
You can connect to nearby devices over a Wi-Fi network.

Connecting to a Wi-Fi network
1. On the settings screen, tap Networks > Wi-Fi.
2. Swipe ☐ to activate it.
   - Available Wi-Fi networks appear automatically.
3. Select a network.
   - You may need to enter the network's Wi-Fi password.
The device skips this process for previously accessed Wi-Fi networks. If you do not want to automatically connect to a certain Wi-Fi network, touch and hold the network and then tap **Forget network**.

**Wi-Fi network settings**

On the settings screen, tap **Networks > Wi-Fi > ☰**.

- **Add Wi-Fi**: Manually add a Wi-Fi network.
- **Saved Wi-Fi**: Display a list of all of your saved Wi-Fi networks.
- **Advanced Wi-Fi**: Configure various Wi-Fi settings.

**Wi-Fi Direct**

You can connect your device to other devices that support Wi-Fi Direct to share data directly with them. You do not need an access point. You can connect with more than two devices by using Wi-Fi Direct.

1. On the settings screen, tap **Networks > Wi-Fi > ☰ > Advanced Wi-Fi > Wi-Fi Direct**.
   - Nearby devices that support Wi-Fi Direct automatically appear.

2. Select a device.
   - Connection occurs when the device accepts the connection request.

- The battery may be drained fast when using Wi-Fi Direct.
Bluetooth

You can connect your device to nearby devices that support Bluetooth to exchange data with them. Connect your device to a Bluetooth headset and a keyboard. This makes it easier to control the device.

Pairing with another device

1. On the settings screen, tap **Networks > Bluetooth**.
2. Swipe to activate it.
   - Available devices appear automatically.
   - To refresh the device list, tap **SEARCH**.

   - Only devices set as visible are displayed on the list.

3. Select a device from the list.
4. Follow the on-screen instructions to perform authentication.

   - This step is skipped for previously accessed devices.

Sending data via Bluetooth

1. Select a file.
   - You can send multimedia files or contacts.
2. Tap **Bluetooth**.
3. Select a target device for the file.
   - The file is sent as soon as the target device accepts it.

   - File sharing processes may differ, depending on the file.
Mobile data
You can turn on or off mobile data. You can also manage mobile data usage.

Turning on Mobile data
1. On the settings screen, tap **Networks > Mobile data**.
2. Swipe to activate it.

Customizing Mobile data settings
1. On the settings screen, tap **Networks > Mobile data**.
2. Customize the following settings:
   - **Mobile data**: Set to use data connections on mobile networks.
   - **Limit mobile data usage**: Set a limit for mobile data usage and block its usage if the limit is reached.
   - : Customize the available mobile data settings.

Call
You can customize call settings, such as voice call and international call options.

- Some features may not be supported, depending on the device manufacturer or service provider.

1. On the settings screen, tap **Networks > Call**.
2. Customize the following settings.
   - **Voicemail**: Change the number of voicemail messages and notification settings.
   - **Decline and reject calls > Decline with message**: Set a text message to send when rejecting calls. Manage rejection messages.
- **Decline and reject calls > Reject calls from:** Block incoming calls from particular numbers, or manage blocked numbers.
- **Decline and reject calls > Private numbers:** Block incoming calls from unidentified numbers.
- **Answer and end calls > End calls with the Power key:** End a call when the Power/Lock key is pressed.
- **Answer and end calls > Auto answer:** Set to automatically answer a call after a certain length of time when connected to a hands-free device.
- **More > Incoming voice call pop-up:** Set to display pop-up window for an incoming call while using an app.
- **More > Gestures:** Use a gesture to reject calls. Mute the incoming call ringtone.
- **More > Auto retry:** Sets the amount of time to wait before automatically redialing a call that failed to connect.
- **More > Save unknown numbers:** Add and save a new phone number to contacts after a call.
- **More > DTMF tones:** Sets the length of the DTMF tones. Choose Normal or Long.
- **More > Voice privacy:** Enable to turn on enhanced privacy mode.
- **More > Call restrictions:** Allows you to set the call decline function.
- **More > Call duration:** View call time details.
- **More > TTY mode:** Allows you to activate TTY mode.
- **More > Hearing aids:** Allows you to turn on hearing aid compatibility.
USB tethering
You can connect the device to another device via USB and share mobile data.

1. Connect your device and other devices via USB cable.
2. On the settings screen, tap Networks > Tethering > USB tethering and then swipe to activate it.

- This option uses mobile data and may incur data usage fees, depending on your pricing plan.
- When you connect to your computer, download the USB driver from www.lg.com to the computer.
- You cannot send or receive files between your device and a computer while USB tethering is turned on. Turn off USB tethering to share files.
- Operating systems that support tethering are Window XP or higher, or Linux.

Wi-Fi Hotspot
You can set the device as a wireless router so that other devices can connect to the internet by using your device's mobile data.

1. On the settings screen, tap Networks > Tethering > Wi-Fi hotspot and then swipe to activate it.
2. Tap Set up Wi-Fi hotspot, and enter the Wi-Fi name (SSID) and password.
3. Turn on Wi-Fi on the other device, and select the name of the device network on the Wi-Fi list.
4. Enter the network password.

- This option uses mobile data and may incur data usage fees, depending on your pricing plan.
- More information is available at this web site: http://www.android.com/tether#wifi
Bluetooth tethering

A bluetooth-connected device can connect to the internet by using your device's mobile data.

1. On the settings screen, tap **Networks > Tethering > Bluetooth tethering** and then swipe ☑️ to activate it.

2. Turn on Bluetooth on both devices, and pair them.

- This option uses mobile data and may incur data usage fees, depending on your pricing plan.
- More information is available at this website: [http://www.android.com/tether#Bluetooth_tethering](http://www.android.com/tether#Bluetooth_tethering)

Help

You can view help on using tethering and hotspots. On the settings screen, tap **Networks > Tethering > Help**.

Mobile networks

You can customize mobile data settings.

1. On the settings screen, tap **Networks > More > Mobile networks**.

2. Customize the following settings:
   - **Mobile data**: Turn mobile data on or off.
   - **Data roaming**: Browse the web, use emails, multimedia messages and other data services overseas.
   - **System select**: Change the network mode and CDMA roaming mode.
   - **Access point names**: View or change the access point for using mobile data services. To change the access point, select a choice from the access point list.
VPN
You can connect to a safe virtual network, such as an IntraNet. You can also manage connected virtual private networks.

Adding VPN
1. On the settings screen, tap **Networks > More > VPN**.

   • If the screen lock is unlocked, all VPN information saved on the device is erased. Please be cautious.

2. Tap **Add VPN network**.

   • If the screen is not locked, a notification screen appears. Tap **SETTINGS** from the notification screen and lock the screen. See *Configuring lock screen settings* for details.

3. Enter VPN details and tap **SAVE**.

Configuring VPN settings
1. Tap a VPN from the **VPNS** list.

2. Enter the VPN user account details and tap **CONNECT**.
   • To save the account details, select the **Save account information** checkbox.

   • While connecting VPN, tap **: > Always-on VPN** and tap the VPN name to remember current VPN settings.
Emergency alerts
You can customize emergency alerts settings.

2. Tap > Settings to customize the following settings: Presidential alerts, Extreme alerts, Severe alerts, AMBER alerts, Vibrate, Alert reminder, and Text to speech.

Printing
You can connect your device to a Bluetooth printer and print photos or documents saved on the device.

2. Swipe to activate it.

3. Select a printer from the printer list screen.
   - To add a printer, tap > Add printer.
   - Tap > Settings from the printer list screen.

4. Select a file and tap > Print.
   - The document prints.

- If you do not have a Google account, tap Add account to create an account.
You can customize sound, vibrate and notification settings.

On the settings screen, tap **Sound & notification** and customize the following settings:

- **Sound profile**: Set the device to **Sound**, **Vibrate only**, or **Silent**.
- **Volume**: Adjust the sound volume.
- **Ringtone**: Select a ringtone for incoming calls. Add or delete ringtones.
- **Ringtone ID**: Set the device to automatically create a ringtone for an incoming call from a particular contact. See **Ringtone ID** for details.
- **Sound with vibration**: Set the device to vibrate and play a ringtone simultaneously.
- **Vibration type**: Select or create a vibration pattern.
- **Do not disturb**: Set the time, range and app type to receive notification messages. Receive notification messages only on particular days of the week. See **Do not disturb** for details.
- **Lock screen**: Display or hide a notification message on the lock screen.
- **Apps**: Select an app to set the priority for its notifications.
- **Notification LED**: Indicate device status via the LED notification light.
- **More > Notification sound**: Select a sound for notifications. You can also set music saved on the device as a notification sound.
- **More > Vibrate on tap**: Set the device to vibrate when you tap certain items on the screen.
- **More > Sound effects**: Select a sound effect to play when you tap the dial pad, select an option, and lock or unlock the screen.
- **More > Message/call voice notifications**: Set the device to read the content of calls or messages via voice.
Display

You can customize detailed settings for each screen type. On the settings screen, tap **Display** and customize the following settings:

- **Home screen**: Customize settings for the Home screen. See **Home screen** for details.
- **Lock screen**: Customize lock screen settings. See **Lock screen settings** for details.
- **Home touch button combination**: Rearrange the Home touch buttons.
- **Font type**: Change the font face.
- **Font size**: Change the font size.
- **Bold text**: Bold the text on the screen.
- **Brightness**: Use the slide bar to change the device's screen brightness. To automatically adjust screen brightness according to ambient light intensity, swipe the **Auto** switch.
- **Reader mode**: Set the device to reduce amount of blue light on screen to reduce eye strain.
- **Auto-rotate screen**: Automatically rotate the screen according to the device's physical orientation.
- **Screen timeout**: Automatically turn off the screen when the device is left idle for a specified period of time.
- **More > Daydream**: Display a screen saver when the device is connected to the holder or charging. Select a screen saver type to display.
- **More > Motion sensor calibration**: Correct the angle and speed of the motion sensor to improve the tilt accuracy and speed of the sensor.
When correcting the motion sensor, make sure to place the device on a flat surface. Failure to do so may cause motion sensor related errors, such as automatic screen rotation.

General

Language & keyboard
You can customize language and keyboard settings for your device.

1. On the settings screen, tap **General > Language & keyboard**.

2. Customize the following settings:
   - **Language**: Set the display language for the device.
   - **Current keyboard**: View the keyboard type currently in use. You can also set a keyboard you have added as active keyboard.
   - **LG Keyboard**: Customize the LG keyboard settings.
   - **Google voice typing**: Turn on dictation. This converts voice to text.
   - **Text-to-speech output**: Turn on TTS mode, which reads text via voice.
   - **Pointer speed**: Adjust the pointer speed of a mouse or trackpad.
   - **Reverse buttons**: Let the right mouse button perform primary direct-manipulation actions.
Location
You can customize settings to access your location information from a particular app.

1. On the settings screen, tap **General > Location**.
2. Customize the following settings:
   - **Mode**: Select a method to provide your location information.
   - **RECENT LOCATION REQUEST**: View apps that recently requested location information.
   - **Camera**: Save location information when taking photos or videos.
   - **Google Location History**: Permit Google services to collect your location information.

Accounts & sync
You can add or manage accounts, including a Google account. You can also sync particular apps or user information automatically.

1. On the settings screen, tap **General > Accounts & sync**.
2. Customize the following settings:
   - **Auto-sync data**: Sync all the registered accounts automatically.
   - **ACCOUNTS**: View a list of registered accounts. To view or change details of an account, tap the account.
   - **ADD ACCOUNT**: Add accounts.
Accessibility
You can manage accessibility plug-ins installed on your device.

1. On the settings screen tap **General > Accessibility**.
2. Customize the following settings:
   - **Vision > TalkBack**: Set the device to notify the screen status or actions via voice.
   - **Vision > Message/call voice notifications**: Set the device to read the caller information or message content via voice.
   - **Vision > Font size**: Change the font size.
   - **Vision > Bold text**: Bold the text on the screen.
   - **Vision > Touch zoom**: Zoom in or out by tapping the screen three times.
   - **Vision > Screen color inversion**: Increase the display color contrast for people with poor eyesight.
   - **Vision > Screen color adjustment**: Adjust the display color.
   - **Vision > Grayscale**: Switch the screen to grayscale mode.
   - **Vision > End calls with the Power key**: End a call by pressing the Power/Lock key.
   - **Hearing > Captions**: Turn on the subtitle service when playing videos for the hearing impaired.
   - **Hearing > Notification LED**: Indicate device status via LED.
   - **Hearing > Flash alerts**: Set the device to notify of incoming calls and notifications with a blinking light.
   - **Hearing > Turn off all sounds**: Turn off all sounds and lower the volume on the receiver.
   - **Hearing > Audio type**: Select the audio type.
   - **Hearing > Sound balance**: Adjust the audio output balance. Use the slide bar to change the balance.
   - **Motor & cognition > Touch assistant**: Turn on the touch board to make buttons and gestures easier to use.
- **Motor & cognition > Touch and hold delay**: Adjust the touch input time.
- **Motor & cognition > Touch and hold for calls**: Answer or decline calls by touching and holding the call button instead of dragging it.
- **Motor & cognition > Screen timeout**: Turn off the screen automatically when the device is left idle for a specified period of time.
- **Motor & cognition > Touch control areas**: Limit the touch area so that only a particular portion of the screen can be controlled by touch input.
- **Accessibility features shortcut**: Quickly access a frequently used function by tapping three times.
- **Auto-rotate screen**: Automatically switch the screen orientation according to the physical position of the device.
- **Switch Access**: Create key combinations to control your device.

### Shortcut key

You can use the volume keys to directly launch apps when the screen is turned off or locked.

1. On the settings screen, tap **General > Shortcut key**.
2. Swipe to activate it.
   - Press the volume down (-) key twice to launch the **Camera** app when the screen is locked or turned off. Press the volume up (+) key twice to launch **Capture+**.

### Google services

You can use Google Settings to manage your Google apps and account settings.

On the settings screen, tap **General > Google services**.
Security

1. On the settings screen, tap **General > Security**.

2. Customize the following settings:
   - **Content lock**: Lock files in QuickMemo+ and require a password or pattern to unlock the content.
   - **Encrypt phone**: Set the device password for privacy. Create a Knock Code, Pattern, PIN or password to enter each time the device is turned on. See *Encrypting your device* for details.
   - **Encrypt SD card**: Encrypt the SD card to prevent use on another device. See *Memory card encryption* for details.
   - **Set up SIM card lock**: Lock or unlock the SIM card, or change the password (PIN).
   - **Password typing visible**: Display a password as you enter it.
   - **Phone administrators**: Allow privileges to restrict the control or use of the device to particular apps.
   - **Unknown sources**: Allow the installation of apps from non-Play Store apps.
   - **Verify apps**: Block the installation of harmful apps. Display a warning message when a harmful app is installed.
   - **Credential protection**: View the storage type where the security certificate will be saved.
   - **Certificate management**: Allow you to manage your secure certificates.
     - **Trusted credentials**: Show system root CA certificates and user added CA certificates.
     - **Install from storage**: Allow you to install a secure certificate from storage.
     - **Clear credentials**: Delete user added secure certificates and related credentials.
   - **Trust agents**: View and use trust agents installed on the device.
   - **Screen pin**: Fix the app screen so that only the currently active app can be used.
   - **Usage access for apps**: View details on usage of apps on the device.
Quick Cover View
With Quick Cover case, you can check incoming calls and stop the alarm/timer when the cover is closed.
On the settings screen, tap General > Quick Cover View.

Date & time
You can customize date and time settings for your device.
1. On the settings screen, tap General > Date & time.
2. Customize the available settings.

Storage & USB
You can view and manage internal storage on the device or storage space of the SD card.
1. On the settings screen, tap General > Storage & USB.
2. Customize the following settings:
   • DEVICE STORAGE: View the total storage space and free space in the device’s internal storage. View a list of apps in use and the storage capacity for each app.
   • PORTABLE STORAGE: View the total storage space and free space in the SD card. This option appears only when a SD card is inserted. To unmount the SD card, tap △.
Battery & power saving
You can view the current battery information or turn on battery saver.

1. On the settings screen, Tap **General > Battery & power saving**.
2. Customize the following settings:
   - **Battery usage**: View the battery usage details. To view more details, select a specific item.
   - **Battery percentage on status bar**: Display the remaining battery level as a percentage on the status bar.
   - **Battery saver**: Reduce battery consumption by cutting down some device settings, such as the display brightness, speed and vibration intensity. The status bar displays 🍃 when battery saver is on.
   - **Help**: Displays help information for the battery saver feature.

Memory
You can view the average amount of memory usage over a certain period of time and the memory occupied by an app.

1. On the settings screen, tap **General > Memory**.
2. Tap ▼ to set a time slot to retrieve data.

Apps
You can view a list of installed apps. Stop apps from running or delete apps, if necessary.

1. On the settings screen, tap **General > Apps**.
2. Select an app and perform actions.
Backup & reset
You can back up data saved on your device to another device or account. Reset the device, if necessary.

1. On the settings screen, tap General > Backup & reset.
2. Customize the following settings:
   - **LG Backup**: Back up and restore all data saved on the device. See LG Backup for details.
   - **Back up my data**: Back up your app data, Wi-Fi password and other settings to the Google server.
   - **Backup account**: View the current backup account in use.
   - **Automatic restore**: Automatically restore backup settings and data when reinstalling an app.
   - **Network settings reset**: Reset Wi-Fi, Bluetooth and other network settings.
   - **Factory data reset**: Reset all settings for the device and delete data.

   - Resetting your device deletes all data on it. Enter your device name, Google account and other initial information again.

About phone
You can view information about your device, such as the name, status, software details and legal information.

On the settings screen, tap General > About phone and view information.

Regulatory & Safety
On the settings screen, tap General > Regulatory & Safety for regulatory details.
Language Settings

Select a language to use on your device.

- Tap 〇 > Settings > General > Language & keyboard > Language, and select a language.

Phone software update

LG Mobile phone software update from the Internet

For more information about using this function, please visit http://www.lg.com/common/index.jsp, select your country and language.

This feature allows you to conveniently update the firmware on your phone to a newer version from the Internet without needing to visit a service center. This feature will only be available if and when LG makes a newer firmware version available for your device.

Because the mobile phone firmware update requires the user’s full attention for the duration of the update process, please make sure you check all instructions and notes that appear at each step before proceeding. Please note that removing the USB cable during the upgrade may seriously damage your mobile phone.

- LG reserves the right to make firmware updates available only for selected models at its own discretion and does not guarantee the availability of the newer version of the firmware for all handset models.
LG Mobile Phone software update via Over-the-Air (OTA)

This feature allows you to conveniently update your phone’s software to a newer version via OTA, without connecting using a USB cable. This feature will only be available if and when LG makes a newer firmware version available for your device.

To perform the phone software update tap Settings > General > About phone > Update Center > Software Update > Check now for update.

- Your personal data from internal phone storage—including information about your Google account and any other accounts, your system/application data and settings, any downloaded applications and your DRM license—might be lost in the process of updating your phone’s software. Therefore, LG recommends that you backup your personal data before updating your phone’s software. LG does not take responsibility for any loss of personal data.

- This feature depends on your network service provider, region and country.
### FAQ

This chapter lists some problems you might encounter when using your phone. Some problems require you to call your service provider, but most are easy to fix yourself.

<table>
<thead>
<tr>
<th>Message</th>
<th>Possible causes</th>
<th>Possible corrective measures</th>
</tr>

Anti-Theft Guide

Set up your device to prevent other people from using it if it’s been reset to factory settings without your permission. For example, if your device is lost, stolen, or wiped, only someone with your Google account or screen lock information can use the device.

All you need to make sure your device is protected is:

- Set a screen lock: If your device is lost or stolen but you have a screen lock set, the device can’t be erased using the Settings menu unless your screen is unlocked.
- Add your Google account on your device: If your device is wiped but you have your Google account on it, the device can’t finish the setup process until your Google account information is entered again.

After your device is protected, you’ll need to either unlock your screen or enter your Google account password if you need to do a factory reset. This ensures that you or someone you trust is doing the reset.

- Do not forget your Google account and password you added to your device prior to performing a factory reset. If you can’t provide the account information during the setup process, you won’t be able to use the device at all after performing the factory reset.

Open Source Software Notice Information
To obtain the source code under GPL, LGPL, MPL, and other open
source licenses, that is contained in this product, please visit http://
opensource.lge.com.
In addition to the source code, all referred licenses terms, warranty
disclaimers and copyright notices are available for download.
LG Electronics will also provide open source code to you on CD-ROM
for a charge covering the cost of performing such distribution (such
as the cost of media, shipping, and handling) upon email request to
opensource@lge.com. This offer is valid for three (3) years from the
date on which you purchased the product.

Regulatory information
To view regulatory marks and related information on your phone, go

For Your Safety
Important Information

This user guide contains important information on the use and operation of this phone. Please read all the information carefully for optimal performance and to prevent any damage to or misuse of the phone. Any changes or modifications not expressly approved in this user guide could void your warranty for this equipment. Any changes or modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment.

Before You Start

⚠️ Warning

Violation of the instructions may cause serious injury or death.

WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

Wash hands after handling.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- When riding in a car, do not leave your phone or set up the hands-free kit near the air bag. If wireless equipment is improperly installed and the air bag is deployed, you may be seriously injured.

- Your phone contains an internal battery. Do not dispose of your phone near fire or with hazardous or flammable waste. You should dispose of your phone in accordance with all applicable laws.

- Do not use the phone in areas where its use is prohibited. (For example: aircraft)

- Do not expose the battery charger or adapter to direct sunlight or use it in places with high humidity, such as a bathroom.
• Do not use harsh chemicals (such as alcohol, benzene, thinners, etc.) or detergents to clean your phone. This could cause a fire.

• Do not drop, strike, or shake your phone severely. It may harm the internal circuit boards of the phone.

• Do not use your phone in high explosive areas as the phone may generate sparks.

• Do not damage the power cord by bending, twisting, pulling, or heating. Do not use the plug if it is loose as it may cause electric shock or fire.

• Do not place any heavy items on the power cord. Do not allow the power cord to be crimped as it may cause electric shock or fire.

• Do not handle the phone with wet hands while it is being charged. It may cause an electric shock or seriously damage your phone.

• Do not disassemble the phone.

• Do not place or answer calls while charging the phone as it may short-circuit the phone and/or cause electric shock or fire.

• Do not attempt to repair or modify the device yourself. Your device is equipped with an internal rechargeable battery which should be replaced only by LG or an authorized LG repair center.

• You should never attempt to open or disassemble this device yourself and doing so may cause damage that voids your warranty.

• Make sure that no sharp-edged items, such as animal’s teeth or nails, come into contact with the battery. This could cause a fire.
• Be careful that children do not swallow any parts (such as earphone, connection parts of the phone, etc.) This could cause asphyxiation or suffocation resulting in serious injury or death.

• Unplug the power cord and charger during lightning storms to avoid electric shock or fire.

• Only use chargers provided by LG. The warranty will not be applied to products provided by other suppliers.

• Only authorized personnel should service the phone and its accessories. Faulty installation or service may result in accidents and consequently invalidate the warranty.

• An emergency call can be made only within a service area. For an emergency call, make sure that you are within a service area and that the phone is turned on.

• Your phone is an electronic device that generates heat during normal operation. Extremely prolonged, direct skin contact in the absence of adequate ventilation may result in discomfort or minor burns. Therefore, use care when handling your phone during or immediately after operation.

• Use and store your phone in temperatures between 0 °C/32 °F and 45 °C/113 °F, if possible. Exposing your phone to extremely low or high temperatures may result in damage, malfunction, or even explosion.
HAC statement

This phone has been tested and rated for use with hearing aids for some of the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids. It is important to try the different features of this phone thoroughly and in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise. Consult your service provider or the manufacturer of this phone for information on hearing aid compatibility. If you have questions about return or exchange policies, consult your service provider or phone retailer.

This mobile phone has a Hearing Aid Mode that, when activated, may reduce interference with some hearing aid models.

FCC RF Exposure Information

WARNING! Read this information before operating the phone.

In August 1996, the Federal Communications Commission (FCC) of the United States, with its action in Report and Order FCC 96-326, adopted an updated safety standard for human exposure to Radio Frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards.

Body-worn Operation

This device was tested for typical use with the back of the phone kept 0.39 inches (1.0 cm) from the body. To comply with FCC RF exposure requirements, a minimum separation distance of 0.39 inches (1.0 cm) must be maintained between the user's body and the back of the phone.

Any belt-clips, holsters, and similar accessories containing metallic components may not be used. Avoid the use of accessories that cannot maintain 0.39 inches (1.0 cm) distance between the user’s body and the back of the phone and have not been tested for compliance with FCC RF exposure limits.
Consumer Information About Radio Frequency Emissions

Your wireless phone, which contains a radio transmitter and receiver, emits radio frequency energy during use. The following consumer information addresses commonly asked questions about the health effects of wireless phones.

Are wireless phones safe?
Scientific research on the subject of wireless phones and radio frequency (“RF”) energy has been conducted worldwide for many years, and continues. In the United States, the Food and Drug Administration (“FDA”) and the Federal Communications Commission (“FCC”) set policies and procedures for wireless phones. The FDA issued a website publication on health issues related to cell phone usage where it states, “The scientific community at large ... believes that the weight of scientific evidence does not show an association between exposure to radiofrequency (RF) from cell phones and adverse health outcomes. Still the scientific community does recommend conducting additional research to address gaps in knowledge. That research is being conducted around the world and FDA continues to monitor developments in this field. You can access the joint FDA/FCC website at http://www.fda.gov (under “c” in the subject index, select Cell Phones > Research). You can also contact the FDA toll-free at (888) 463-6332 or (888) INFO-FDA. In June 2000, the FDA entered into a cooperative research and development agreement through which additional scientific research is being conducted. The FCC issued its own website publication stating that “there is no scientific evidence that proves that wireless phone usage can lead to cancer or a variety of other problems, including headaches, dizziness or memory loss.” This publication is available at http://www.fcc.gov/cgb/cellularhtml or through the FCC at (888) 225-5322 or (888) CALL-FCC.

What does “SAR” mean?
In 1996, the FCC, working with the FDA, the U.S. Environmental Protection Agency, and other agencies, established RF exposure safety guidelines for wireless phones in the United States. Before a wireless phone model is available for sale to the public, it must be tested by the manufacturer and certified to the FCC that it does not exceed limits established by the FCC. One of these limits is expressed as a Specific Absorption Rate, or “SAR.” SAR is a measure of the rate of absorption of RF energy in the body. Tests for SAR
are conducted with the phone transmitting at its highest power level in all tested frequency bands. Since 1996, the FCC has required that the SAR of handheld wireless phones not exceed 1.6 watts per kilogram, averaged over one gram of tissue. Although the SAR is determined at the highest power level, the actual SAR value of a wireless phone while operating can be less than the reported SAR value. This is because the SAR value may vary from call to call, depending on factors such as proximity to a cell site, the proximity of the phone to the body while in use, and the use of hands-free devices. For more information about SARs, see the FCC’s OET Bulletins 56 and 65 at [http://www.fcc.gov/Bureaus/Engineering_Technology/Documents/bulletins](http://www.fcc.gov/Bureaus/Engineering_Technology/Documents/bulletins) or visit the Cellular Telecommunications Industry Association website at [http://www.ctia.org/consumer_info/index.cfm/AID/10371](http://www.ctia.org/consumer_info/index.cfm/AID/10371). You may also wish to contact the manufacturer of your phone.

**Can I minimize my RF exposure?**

If you are concerned about RF, there are several simple steps you can take to minimize your RF exposure. You can, of course, reduce your talk time. You can place more distance between your body and the source of the RF, as the exposure level drops off dramatically with distance. The FDA/FCC website states that “hands-free kits can be used with wireless phones for convenience and comfort. These systems reduce the absorption of RF energy in the head because the phone, which is the source of the RF emissions, will not be placed against the head. On the other hand, if the phone is mounted against the waist or other part of the body during use, then that part of the body will absorb more RF energy. Wireless phones marketed in the U.S. are required to meet safety requirements regardless of whether they are used against the head or against the body. Either configuration should result in compliance with the safety limit.” Also, if you use your wireless phone while in a car, you can use a phone with an antenna on the outside of the vehicle. You should also read and follow your wireless phone manufacturer’s instructions for the safe operation of your phone.

**Do wireless phones pose any special risks to children?**

The FDA/FCC website states that “the scientific evidence does not show a danger to users of wireless communication devices, including children.” The FDA/FCC website further states that “some groups sponsored by other national governments have advised that children be discouraged from using wireless phones at all.” For example, the Stewart Report from the
United Kingdom ["UK"] made such a recommendation in December 2000. In this report a group of independent experts noted that no evidence exists that using a cell phone causes brain tumors or other ill effects. [The UK’s] recommendation to limit cell phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists. A copy of the UK’s leaflet is available at http://www.dh.gov.uk (search “mobile”), or you can write to: NRPB, Chilton, Didcot, Oxon OX11 ORQ, United Kingdom. Copies of the UK’s annual reports on mobile phones and RF are available online at www.iegmp.org.uk and http://www.hpa.org.uk/radiation/ (search “mobile”). Parents who wish to reduce their children’s RF exposure may choose to restrict their children’s wireless phone use.

Where can I get further information about RF emissions?

Consumer Information on SAR (Specific Absorption Rate)

This model phone meets the government’s requirements for exposure to radio waves. Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to Radio Frequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. Tests for SAR are conducted using standard operating positions specified by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. Because the phone is designed to operate at multiple power levels to use only the power required to reach the network, in general, the closer you are to a wireless base station antenna, the lower the power output. Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government-adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model.

The highest SAR values are:
* Head: 1.01 W/kg
* Body (Body-worn/Hotspot): 0.88 W/kg

(BODY measurements differ among phone models, depending upon available accessories and FCC requirements).

While there may be differences between SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure.

The FCC has granted an Equipment Authorization for this model phone with
all reported SAR levels evaluated as in compliance with the FCC RF emission guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov/oet/fccid after searching on FCC ID ZNFUS610. Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) website at http://www.ctia.org/.

* In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

**FCC Hearing-Aid Compatibility (HAC) Regulations for Wireless Devices**

On July 10, 2003, the U.S. Federal Communications Commission (FCC) Report and Order in WT Docket 01-309 modified the exception of wireless phones under the Hearing Aid Compatibility Act of 1988 (HAC Act) to require digital wireless phones be compatible with hearing aids. The intent of the HAC Act is to ensure reasonable access to telecommunications services for persons with hearing disabilities. While some wireless phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and phones also vary in the amount of interference they generate.

The wireless telephone industry has developed a rating system for wireless phones, to assist hearing device users to find phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label located on the box.

The ratings are not guarantees. Results will vary depending on the user’s hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

**M-Ratings:** Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.

**T-Ratings:** Phones rated T3 or T4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. T4 is the better/higher of the two ratings.
Hearing devices may also be rated. Your hearing device manufacturer or hearing health professional may help you find this rating. Higher ratings mean that the hearing device is relatively immune to interference noise. The hearing aid and wireless phone rating values are then added together.

A sum of 5 is considered acceptable for normal use. A sum of 6 is considered for best use.

In the above example, if a hearing aid meets the M2 level rating and the wireless phone meets the M3 level rating, the sum of the two values equal M5. This should provide the hearing aid user with “normal usage” while using their hearing aid with the particular wireless phone. “Normal usage” in this context is defined as a signal quality that’s acceptable for normal operation.

The M mark is intended to be synonymous with the U mark. The T mark is intended to be synonymous with the UT mark. The M and T marks are recommended by the Alliance for Telecommunications Industries Solutions (ATIS). The U and UT marks are referenced in Section 20.19 of the FCC Rules. The HAC rating and measurement procedure are described in the American National Standards Institute (ANSI) C63.19 standard.

To ensure that the Hearing Aid Compatibility rating for your phone is maintained, secondary transmitters such as Bluetooth and WLAN components must be disabled during a call.
Caution:

Avoid potential hearing loss.

Prolonged exposure to loud sounds (including music) is the most common cause of preventable hearing loss. Some scientific research suggests that using portable audio devices, such as portable music players and cellular telephones, at high volume settings for long durations may lead to permanent noise-induced hearing loss. This includes the use of headphones (including headsets, earbuds and Bluetooth or other wireless devices). Exposure to very loud sound has also been associated in some studies with tinnitus (a ringing in the ear), hypersensitivity to sound and distorted hearing. Individual susceptibility to noise-induced hearing loss and other potential hearing problems varies.

The amount of sound produced by a portable audio device varies depending on the nature of the sound, the device, the device settings and the headphones. You should follow some commonsense recommendations when using any portable audio device:

- Set the volume in a quiet environment and select the lowest volume at which you can hear adequately.
- When using headphones, turn the volume down if you cannot hear the people speaking near you or if the person sitting next to you can hear what you are listening to.
• Do not turn the volume up to block out noisy surroundings. If you choose to listen to your portable device in a noisy environment, use noise-canceling headphones to block out background environmental noise.

• Limit the amount of time you listen. As the volume increases, less time is required before your hearing could be affected.

• Avoid using headphones after exposure to extremely loud noises, such as rock concerts, that might cause temporary hearing loss. Temporary hearing loss might cause unsafe volumes to sound normal.

• Do not listen at any volume that causes you discomfort. If you experience ringing in your ears, hear muffled speech or experience any temporary hearing difficulty after listening to your portable audio device, discontinue use and consult your doctor.

**TIA Safety Information**

The following is the complete TIA Safety Information for wireless handheld phones.

**Exposure to Radio Frequency Signal**

Your wireless handheld portable phone is a low power radio transmitter and receiver. When ON, it receives and sends out Radio Frequency (RF) signals.

In August, 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for handheld wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies: ANSI C95.1 (1992) *

NCRP Report 86 (1986)

ICNIRP (1996)

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1).

The design of your phone complies with the FCC guidelines (and those standards).
Tips on Efficient Operation

For your phone to operate most efficiently:

Don’t touch the antenna unnecessarily when the phone is in use. Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than otherwise needed.

Electronic Devices

Most modern electronic equipment is shielded from RF signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone.

Pacemakers

The Health Industry Manufacturers Association recommends that a minimum separation of six (6) inches be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research.

Persons with pacemakers:

• Should ALWAYS keep the phone more than six (6) inches from their pacemaker when the phone is turned ON;
• Should not carry the phone in a breast pocket;
• Should use the ear opposite the pacemaker to minimize the potential for interference;
• Should turn the phone OFF immediately if there is any reason to suspect that interference is taking place.

Hearing Aids

Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your service provider (or call the customer service line to discuss alternatives).

Other Medical Devices

If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.
Health Care Facilities
Turn your phone OFF in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may use equipment that could be sensitive to external RF energy.

Vehicles
RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

Posted Facilities
Turn your phone OFF in any facility where posted notices so require.

Aircraft
FCC regulations prohibit using your phone while in the air. Switch OFF your phone before boarding an aircraft.

Blasting Areas
To avoid interfering with blasting operations, turn your phone OFF when in a “blasting area” or in areas posted: “Turn off two-way radio.” Obey all signs and instructions.

Potentially Explosive Atmosphere
Turn your phone OFF when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death. Areas with a potentially explosive atmosphere are often, but not always marked clearly. Potential areas may include: fueling areas (such as gasoline stations); below deck on boats; fuel or chemical transfer or storage facilities; vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or particles (such as grain, dust, or metal powders); and any other area where you would normally be advised to turn off your vehicle engine.
For Vehicles Equipped with an Air Bag

An air bag inflates with great force. DO NOT place objects, including either installed or portable wireless equipment, in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

Part 15.19 statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

Part 15.21 statement

Changes or modifications that are not expressly approved by the manufacturer for compliance could void the user’s authority to operate the equipment.

Part 15.105 statement

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.
Safety Information
Please read and observe the following information for safe and proper use of your phone and to prevent damage.

Caution

Violation of the instructions may cause minor or serious damage to the product.

- Do not disassemble or open crush, bend or deform, puncture or shred.
- Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, expose to fire, explosion or other hazard. Such conditions may present the risk of fire or explosion.
- Only use the battery for the system for which it is specified.
- Only use the battery with a charging system that has been qualified with the system per CTIA Certification Requirements for Battery System Compliance to IEEE1725. Use of an unqualified battery or charger may present a risk of fire, explosion, leakage, or other hazard.
- Do not short circuit a battery or allow metallic conductive objects to contact battery terminals.
- Replace the battery only with another battery that has been qualified with the system per this standard, IEEE-Std-1725. Use of an unqualified battery may present a risk of fire, explosion, leakage or other hazard. Only authorized service providers shall replace battery. (If the battery is nonuser replaceable)
- Battery usage by children should be supervised.
- Avoid dropping the phone. If the phone is dropped, especially on a hard surface, and the user suspects damage, take it to a service center for inspection.
- Improper battery use may result in a fire, explosion or other hazard.
WARNING! Notice for Battery replacement

• For your safety, do not remove the battery incorporated in the product. If you need to replace the battery, take it to the nearest authorized LG Electronics service point or dealer for assistance.

• Li-Ion Battery is a hazardous component which can cause injury.

• Battery replacement by non-qualified professional can cause damage to your device.

Charger and Adapter Safety

• The charger and adapter are intended for indoor use only.

• Insert the battery charger vertically into the wall power socket.

• Only use the LG-approved battery charger. Otherwise, you may cause serious damage to your phone.

• Use the correct adapter for your phone when using the battery charger abroad.

Fast charging adapter information

• A charging adapter that supports fast charging is included with the product.

• The fast charging feature may not function if a fast charging adapter other than the genuine adaptor provided with the product is used.
Battery Information and Care

- Always unplug the charger from the wall socket after the phone is fully charged to save unnecessary power consumption of the charger.
- Please read the manual of specified charger about charging method.
- Do not damage the power cord by bending, twisting, or heating. Do not use the plug if it is loose as it may cause electric shock or fire.
- Do not place any heavy items on the power cord. Do not allow the power cord to be crimped as it may cause electric shock or fire.
- Unplug the power cord prior to cleaning your phone, and clean the power plug pin when it’s dirty. When using the power plug, ensure that it’s firmly connected. If not, it may cause excessive heat or fire. If you put your phone in a pocket or bag without covering the receptacle of the phone (power plug pin), metallic articles (such as a coin, paperclip or pen) may short-circuit the phone. Always cover the receptacle when not in use.
- Recharge the battery after long periods of non-use to maximize battery life. Battery life will vary due to usage pattern and environmental conditions.
- Please use only an approved charging accessory to charge your LG phone. Improper handling of the charging port, as well as the use of an incompatible charger, may cause damage to your phone and void the warranty.
- Charging temperature range is regulated between 0 °C/32 °F and 45 °C/113 °F. Do not charge the battery out of recommended temperature range. Charging out of recommended range might cause the generating heat or serious damage of battery. And also, it might cause the deterioration of battery’s characteristics and cycle life.
- Do not use or leave the battery under the blazing sun or in heated car by sunshine. The battery may generate heat, smoke or flame. And also, it might cause the deterioration of battery’s characteristics or cycle life.
- The battery pack has protection circuit to avoid the danger. Do not use nearby the place where generates static electricity more than 100V which gives damage to the protection circuit. If the protection circuit were broken, the battery would generate smoke, rupture or flame.
- If the skin or cloth is smeared with liquid from the battery, wash with fresh water. It may cause the skin inflammation.
• Please take your phone to an authorized service center immediately if this occurs.

• Do not handle the phone with wet hands while it is being charged. It may cause an electric shock or seriously damage your phone.

• Do not place or answer calls while charging the phone as it may short-circuit the phone and/or cause electric shock or fire.

• The charger and adapter are intended for indoor use only.

• Talking on your phone for a long period of time may reduce call quality due to heat generated during use.

Explosion, Shock, and Fire Hazards

• Do not put your phone in a place subject to excessive dust and keep the minimum required distance between the power cord and heat sources.

• Unplug the power cord prior to cleaning your phone, and clean the power plug pin when it’s dirty.

• When using the power plug, ensure that it’s firmly connected. If not, it may cause excessive heat or fire.

• If you put your phone in a pocket or bag without covering the receptacle of the phone (power plug pin), metallic articles (such as a coin, paperclip or pen) may short-circuit the phone and may cause an explosion. Always cover the receptacle when not in use.
General Notice

- Do not place items containing magnetic components such as a credit card, phone card, bank book, or subway ticket near your phone. The magnetism of the phone may damage the data stored in the magnetic strip.
- Talking on your phone for a long period of time may reduce call quality due to heat generated during use.
- When the phone is not used for a long period time, store it in a safe place with the power cord unplugged.
- Using the phone in proximity to receiving equipment (i.e., TV or radio) may cause interference to the phone.
- Do not use the phone if the antenna is damaged. If a damaged antenna contacts skin, it may cause a slight burn. Please contact an LG Authorized Service Center to replace the damaged antenna.
- Do not immerse your phone in water, liquid, or expose to high humidity. Immediately, take it to an LG Authorized Service Center.
- Do not paint your phone.
- The data saved in your phone might be deleted due to careless use, repair of the phone, or upgrade of the software. Please backup your important phone numbers. (Ringtones, text messages, voice messages, pictures, and videos could also be deleted.) The manufacturer is not liable for damage due to the loss of data.
- When you use the phone in public places, set the ringtone to vibration so you don’t disturb others.
- Do not turn your phone on or off when putting it to your ear.
- Use accessories, such as earphones and headsets, with caution.
- Ensure that cables are tucked away safely and do not touch the antenna unnecessarily.
For Your Safety

The U.S. Food and Drug Administration’s Center for Devices and Radiological Health Consumer Update on Mobile Phones:

1. Do wireless phones pose a health hazard?

The available scientific evidence does not show that any health problems are associated with using wireless phones. There is no proof, however, that wireless phones are absolutely safe. Wireless phones emit low levels of Radio Frequency (RF) energy in the microwave range while being used. They also emit very low levels of RF when in standby mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects. Many studies of low level RF exposures have not found any biological effects. Some studies have suggested that some biological effects may occur, but such findings have not been confirmed by additional research. In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.

2. What is the FDA’s role concerning the safety of wireless phones?

Under the law, the FDA does not review the safety of radiation-emitting consumer products such as wireless phones before they can be sold, as it does with new drugs or medical devices. However, the agency has authority to take action if wireless phones are shown to emit Radio Frequency (RF) energy at a level that is hazardous to the user. In such a case, the FDA could require the manufacturers of wireless phones to notify users of the health hazard and to repair, replace, or recall the phones so that the hazard no longer exists. Although the existing scientific data do not justify FDA regulatory actions, the FDA has urged the wireless phone industry to take a number of steps, including the following:

• Support needed research into possible biological effects of RF of the type emitted by wireless phones;
• Design wireless phones in a way that minimizes any RF exposure to the user that is not necessary for device function; and
• Cooperate in providing users of wireless phones with the best possible information on possible effects of wireless phone use on human health.

The FDA belongs to an interagency working group of the federal agencies that have responsibility for different aspects of RF safety to ensure coordinated efforts at the federal level. The following agencies belong to this working group:

• National Institute for Occupational Safety and Health
• Environmental Protection Agency
• Occupational Safety and Health Administration
• National Telecommunications and Information Administration

The National Institutes of Health participates in some interagency working group activities, as well.

The FDA shares regulatory responsibilities for wireless phones with the Federal Communications Commission (FCC). All phones that are sold in the United States must comply with FCC safety guidelines that limit RF exposure. The FCC relies on the FDA and other health agencies for safety questions about wireless phones.

The FCC also regulates the base stations that the wireless phone networks rely upon. While these base stations operate at higher power than do the wireless phones themselves, the RF exposures that people get from these base stations are typically thousands of times lower than those they can get from wireless phones. Base stations are thus not the subject of the safety questions discussed in this document.

3. What kinds of phones are the subject of this update?

The term “wireless phone” refers here to handheld wireless phones with built-in antennas, often called “cell”, “mobile”, or “PCS” phones. These types of wireless phones can expose the user to measurable Radio Frequency (RF) energy because of the short distance between the phone and the user’s head. These RF exposures are limited by FCC safety guidelines that were developed with the advice of the FDA and other federal health and safety agencies. When the phone is located at greater distances from the user, the exposure to RF is drastically lower because a person’s RF exposure decreases rapidly with increasing distance from the source. The so-called “cordless phones,” which have a base unit connected to the telephone wiring in a house, typically operate at far lower power levels, and thus produce RF exposures far below the FCC safety limits.

For Your Safety
4. What are the results of the research done already?

The research done thus far has produced conflicting results, and many studies have suffered from flaws in their research methods. Animal experiments investigating the effects of Radio Frequency (RF) energy exposures characteristic of wireless phones have yielded conflicting results that often cannot be repeated in other laboratories. A few animal studies, however, have suggested that low levels of RF could accelerate the development of cancer in laboratory animals. However, many of the studies that showed increased tumor development used animals that had been genetically engineered or treated with cancer-causing chemicals so as to be pre-disposed to develop cancer in the absence of RF exposure. Other studies exposed the animals to RF for up to 22 hours per day. These conditions are not similar to the conditions under which people use wireless phones, so we do not know with certainty what the results of such studies mean for human health. Three large epidemiology studies have been published since December 2000. Between them, the studies investigated any possible association between the use of wireless phones and primary brain cancer, glioma, meningioma, or acoustic neuroma, tumors of the brain or salivary gland, leukemia, or other cancers. None of the studies demonstrated the existence of any harmful health effects from wireless phone RF exposures. However, none of the studies can answer questions about long-term exposures, since the average period of phone use in these studies was around three years.

5. What research is needed to decide whether RF exposure from wireless phones poses a health risk?

A combination of laboratory studies and epidemiological studies of people actually using wireless phones would provide some of the data that are needed. Lifetime animal exposure studies could be completed in a few years. However, very large numbers of animals would be needed to provide reliable proof of a cancer promoting effect if one exists. Epidemiological studies can provide data that is directly applicable to human populations, but ten or more years follow-up may be needed to provide answers about some health effects, such as cancer. This is because the interval between the time of exposure to a cancer-causing agent and the time tumors develop — if they do — may be many, many years. The interpretation of epidemiological studies is hampered by difficulties in measuring actual RF exposure during day-to-day use of wireless phones. Many factors affect this measurement, such as the angle at which the phone is held, or which model of phone is used.
6. What is the FDA doing to find out more about the possible health effects of wireless phone RF?

The FDA is working with the U.S. National Toxicology Program and with groups of investigators around the world to ensure that high priority animal studies are conducted to address important questions about the effects of exposure to Radio Frequency (RF) energy.

The FDA has been a leading participant in the World Health Organization International Electro Magnetic Fields (EMF) Project since its inception in 1996. An influential result of this work has been the development of a detailed agenda of research needs that has driven the establishment of new research programs around the world. The project has also helped develop a series of public information documents on EMF issues. The FDA and the Cellular Telecommunications & Internet Association (CTIA) have a formal Cooperative Research And Development Agreement (CRADA) to do research on wireless phone safety. The FDA provides the scientific oversight, obtaining input from experts in government, industry, and academic organizations. CTIA-funded research is conducted through contracts with independent investigators. The initial research will include both laboratory studies and studies of wireless phone users. The CRADA will also include a broad assessment of additional research needs in the context of the latest research developments around the world.

7. How can I find out how much Radio Frequency energy exposure I can get by using my wireless phone?

All phones sold in the United States must comply with Federal Communications Commission (FCC) guidelines that limit Radio Frequency (RF) energy exposures. The FCC established these guidelines in consultation with the FDA and the other federal health and safety agencies. The FCC limit for RF exposure from wireless phones is set at a Specific Absorption Rate (SAR) of 1.6 watts per kilogram (1.6 W/kg). The FCC limit is consistent with the safety standards developed by the Institute of Electrical and Electronic Engineering (IEEE) and the National Council on Radiation Protection and Measurement. The exposure limit takes into consideration the body's ability to remove heat from the tissues that absorb energy from the wireless phone and is set well below levels known to have effects. Manufacturers of wireless phones must report the RF exposure level for each model of phone to the FCC. The FCC website (http://www.fcc.gov/oet/rfsafety) gives directions for locating the FCC identification number on your phone so you can find your
phone’s RF exposure level in the online listing.

8. What has the FDA done to measure the Radio Frequency energy coming from wireless phones?

The Institute of Electrical and Electronic Engineers (IEEE) is developing a technical standard for measuring the Radio Frequency (RF) energy exposure from wireless phones and other wireless handsets with the participation and leadership of FDA scientists and engineers. The standard, “Recommended Practice for Determining the Spatial-Peak Specific Absorption Rate (SAR) in the Human Body Due to Wireless Communications Devices: Experimental Techniques”, sets forth the first consistent test methodology for measuring the rate at which RF is deposited in the heads of wireless phone users. The test method uses a tissue-simulating model of the human head. Standardized SAR test methodology is expected to greatly improve the consistency of measurements made at different laboratories on the same phone. SAR is the measurement of the amount of energy absorbed in tissue, either by the whole body or a small part of the body. It is measured in watts/kg (or milliwatts/g) of matter. This measurement is used to determine whether a wireless phone complies with safety guidelines.

9. What steps can I take to reduce my exposure to Radio Frequency energy from my wireless phone?

If there is a risk from these products — and at this point we do not know that there is — it is probably very small. But if you are concerned about avoiding even potential risks, you can take a few simple steps to minimize your exposure to Radio Frequency (RF) energy. Since time is a key factor in how much exposure a person receives, reducing the amount of time spent using a wireless phone will reduce RF exposure. If you must conduct extended conversations by wireless phone every day, you could place more distance between your body and the source of the RF, since the exposure level drops off dramatically with distance. For example, you could use a headset and carry the wireless phone away from your body or use a wireless phone connected to a remote antenna. Again, the scientific data does not demonstrate that wireless phones are harmful. But if you are concerned about the RF exposure from these products, you can use measures like those described above to reduce your RF exposure from wireless phone use.
10. What about children using wireless phones?

The scientific evidence does not show a danger to users of wireless phones, including children and teenagers. If you want to take steps to lower exposure to Radio Frequency (RF) energy, the measures described above would apply to children and teenagers using wireless phones. Reducing the time of wireless phone use and increasing the distance between the user and the RF source will reduce RF exposure. Some groups sponsored by other national governments have advised that children be discouraged from using wireless phones at all. For example, the government in the United Kingdom distributed leaflets containing such a recommendation in December 2000.

They noted that no evidence exists that using a wireless phone causes brain tumors or other ill effects. Their recommendation to limit wireless phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists.

11. What about wireless phone interference with medical equipment?

Radio Frequency (RF) energy from wireless phones can interact with some electronic devices. For this reason, the FDA helped develop a detailed test method to measure Electro Magnetic Interference (EMI) of implanted cardiac pacemakers and defibrillators from wireless telephones. This test method is now part of a standard sponsored by the Association for the Advancement of Medical Instrumentation (AAMI). The final draft, a joint effort by the FDA, medical device manufacturers, and many other groups, was completed in late 2000. This standard will allow manufacturers to ensure that cardiac pacemakers and defibrillators are safe from wireless phone EMI.

The FDA has tested hearing aids for interference from handheld wireless phones and helped develop a voluntary standard sponsored by the Institute of Electrical and Electronic Engineers (IEEE). This standard specifies test methods and performance requirements for hearing aids and wireless phones so that no interference occurs when a person uses a “compatible” phone and a “compatible” hearing aid at the same time. This standard was approved by the IEEE in 2000.

The FDA continues to monitor the use of wireless phones for possible interactions with other medical devices. Should harmful interference be found to occur, the FDA will conduct testing to assess the interference and work to resolve the problem.
12. Where can I find additional information?

For additional information, please refer to the following resources: FDA web page on wireless phones (http://www.fda.gov/cellphones/)
Federal Communications Commission (FCC) RF Safety Program (http://www.fcc.gov/oet/rfsafety)
International Commission on Non-Ionizing Radiation Protection (http://www.icnirp.de)
World Health Organization (WHO) International EMF Project (http://www.who.int/emf)
National Radiological Protection Board (UK) (http://www.hpa.org.uk/radiation/)

Driving

Check the laws and regulations on the use of wireless phones in the areas where you drive and always obey them. Also, if using your phone while driving, please observe the following:

- Give full attention to driving -- driving safely is your first responsibility;
- Use hands-free operation, if available;
- Pull off the road and park before making or answering a call if driving conditions or the law require it.
10 Driver Safety Tips

Your wireless phone gives you the powerful ability to communicate by voice almost anywhere, anytime. An important responsibility accompanies the benefits of wireless phones, one that every user must uphold. When operating a car, driving is your first responsibility. When using your wireless phone behind the wheel of a car, practice good common sense and remember the following tips:

1. Get to know your wireless phone and its features such as speed dial and redial. Carefully read your instruction manual and learn to take advantage of valuable features most phones offer, including automatic redial and memory. Also, work to memorize the phone keypad so you can use the speed dial function without taking your attention off the road.

2. When available, use a hands-free device. A number of hands-free wireless phone accessories are readily available today. Whether you choose an installed mounted device for your wireless phone or a speaker phone accessory, take advantage of these devices if available to you.

3. Make sure you place your wireless phone within easy reach and where you can reach it without removing your eyes from the road. If you get an incoming call at an inconvenient time, if possible, let your voicemail answer it for you.

4. Suspend conversations during hazardous driving conditions or situations. Let the person you are speaking with know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions. Rain, sleet, snow, and ice can be hazardous, but so is heavy traffic. As a driver, your first responsibility is to pay attention to the road.

5. Don’t take notes or look up phone numbers while driving. If you are reading an address book or business card, or writing a “to-do” list while driving a car, you are not watching where you are going. It is common sense. Do not get caught in a dangerous situation because you are reading or writing and not paying attention to the road or nearby vehicles.

6. Dial sensibly and assess the traffic; if possible, place calls when you are not moving or before pulling into traffic. Try to plan your calls before you begin your trip or attempt to coincide your calls with times you may be stopped at a stop sign, red light, or otherwise stationary. But if you need to dial while driving, follow this simple tip -- dial only a few numbers, check the road and your mirrors, then continue.
7. Do not engage in stressful or emotional conversations that may be distracting. Stressful or emotional conversations and driving do not mix; they are distracting and even dangerous when you are behind the wheel of a car. Make people you are talking with aware you are driving and if necessary, suspend conversations which have the potential to divert your attention from the road.

8. Use your wireless phone to call for help. Your wireless phone is one of the greatest tools you can own to protect yourself and your family in dangerous situations -- with your phone at your side, help is only three numbers away. Dial 911 or other local emergency number in the case of fire, traffic accident, road hazard, or medical emergency. Remember, it's a free call on your wireless phone!

9. Use your wireless phone to help others in emergencies. Your wireless phone provides you a perfect opportunity to be a “Good Samaritan” in your community. If you see an auto accident, crime in progress or other serious emergency where lives are in danger, call 911 or other local emergency number, as you would want others to do for you.

10. Call roadside assistance or a special wireless non-emergency assistance number when necessary. Certain situations you encounter while driving may require attention, but are not urgent enough to merit a call for emergency services. But you can still use your wireless phone to lend a hand. If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured or a vehicle you know to be stolen, call roadside assistance or other special non-emergency wireless number.

The above tips are meant as general guidelines. Before deciding to use your mobile device while operating a vehicle, it is recommended that you consult your applicable jurisdiction’s local laws or other regulations regarding such use. Such laws or other regulations may prohibit or otherwise restrict the manner in which a driver may use his or her phone while operating a vehicle.

LIMITED
WARRANTY
STATEMENT
ARBITRATION NOTICE: THIS LIMITED WARRANTY CONTAINS AN ARBITRATION PROVISION THAT REQUIRES YOU AND LG TO RESOLVE DISPUTES BY BINDING ARBITRATION INSTEAD OF IN COURT, UNLESS YOU CHOOSE TO OPT OUT. IN ARBITRATION, CLASS ACTIONS AND JURY TRIALS ARE NOT PERMITTED. PLEASE SEE THE SECTION TITLED “PROCEDURE FOR RESOLVING DISPUTES” BELOW.

Warranty Laws
The following laws govern warranties that arise in retail sales of consumer goods:

- The California Song-Beverly Consumer Warranty Act [CC §§1790 et seq],
- The California Uniform Commercial Code, Division Two [Com C §§2101 et seq], and

A typical Magnuson-Moss Act warranty is a written promise that the product is free of defects or a written promise to refund, repair, or replace defective goods. [See 15 USC §2301(6).] Remedies include damages for failing to honor a written warranty or service contract or for violating disclosure provisions. [See 15 USC §2310(d).] Except for some labeling and disclosure requirements, the federal Act does not preempt state law. [See 15 USC §2311.]

1. WHAT THIS WARRANTY COVERS:
LG offers you a limited warranty that the enclosed subscriber unit and its enclosed accessories will be free from defects in material and workmanship, according to the following terms and conditions:

(1) The limited warranty for the product extends for TWELVE (12) MONTHS beginning on the date of purchase of the product with valid proof of purchase, or absent valid proof of purchase, FIFTEEN (15) MONTHS from date of manufacture as determined by the unit’s manufacture date code.

(2) The limited warranty extends only to the original purchaser of the product and is not assignable or transferable to any subsequent purchaser/end user.

(3) This warranty is good only to the original purchaser of the product during the warranty period as long as it is in the U.S., including Alaska, Hawaii, U.S. Territories and Canada.
(4) The external housing and cosmetic parts shall be free of defects at the
time of shipment and, therefore, shall not be covered under these limited
warranty terms.

(5) Upon request from LG, the consumer must provide information to
reasonably prove the date of purchase.

(6) The customer shall bear the cost of shipping the product to the Customer
Service Department of LG. LG shall bear the cost of shipping the product back
to the consumer after the completion of service under this limited warranty.

2. WHAT THIS WARRANTY DOES NOT COVER:

(1) Defects or damages resulting from use of the product in other than its
normal and customary manner.

(2) Defects or damages from abnormal use, abnormal conditions, improper
storage, exposure to moisture or dampness, unauthorized modifications,
unauthorized connections, unauthorized repair, misuse, neglect, abuse,
accident, alteration, improper installation, or other acts which are not the
fault of LG, including damage caused by shipping, blown fuses, spills of food
or liquid.

(3) Breakage or damage to antennas unless caused directly by defects in
material or workmanship.

(4) That the Customer Service Department at LG was not notified by
consumer of the alleged defect or malfunction of the product during the
applicable limited warranty period.

(5) Products which have had the serial number removed or made illegible.

(6) This limited warranty is in lieu of all other warranties, express or implied
either in fact or by operations of law, statutory or otherwise, including, but not
limited to any implied warranty of marketability or fitness for a particular use.

(7) Damage resulting from use of non LG approved accessories.

(8) All plastic surfaces and all other externally exposed parts that are
scratched or damaged due to normal customer use.

(9) Products operated outside published maximum ratings.

(10) Products used or obtained in a rental program.

(11) Consumables (such as fuses).
3. WHAT LG WILL DO:
LG will, at its sole option, either repair, replace or refund the purchase price of any unit that is covered under this limited warranty. LG may choose at its option to use functionally equivalent re-conditioned, refurbished or new units or parts or any units. In addition, LG will not re-install or back-up any data, applications or software that you have added to your phone. It is therefore recommended that you back-up any such data or information prior to sending the unit to LG to avoid the permanent loss of such information.

4. STATE LAW RIGHTS:
No other express warranty is applicable to this product. THE DURATION OF ANY IMPLIED WARRANTIES, INCLUDING THE IMPLIED WARRANTY OF MARKETABILITY OR MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, IS LIMITED TO THE DURATION OF THE EXPRESS WARRANTY HEREIN. LG SHALL NOT BE LIABLE FOR THE LOSS OF THE USE OF THE PRODUCT, INCONVENIENCE, LOSS OR ANY OTHER DAMAGES, DIRECT OR CONSEQUENTIAL, ARISING OUT OF THE USE OF, OR INABILITY TO USE, THIS PRODUCT OR FOR ANY BREACH OF ANY EXPRESS OR IMPLIED WARRANTY, INCLUDING THE IMPLIED WARRANTY OF MARKETABILITY OR MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE APPLICABLE TO THIS PRODUCT.

Some states do not allow the exclusive limitation of incidental or consequential damages or limitations on how long an implied warranty lasts; so these limitations or exclusions may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

5. HOW TO GET WARRANTY SERVICE:
To obtain warranty service, please call or fax to the following telephone numbers from anywhere in the continental United States:
Tel. 1-800-793-8896 or Fax. 1-800-448-4026
Or visit http://www.lg.com/us/support. Correspondence may also be mailed to:
LG Electronics Service- Mobile Handsets, P.O. Box 240007, Huntsville, AL 35824

**DO NOT RETURN YOUR PRODUCT TO THE ABOVE ADDRESS.** Please call or write for the location of the LG authorized service center nearest you and for the procedures for obtaining warranty claims.
PROCEDURE FOR RESOLVING DISPUTES:

ALL DISPUTES BETWEEN YOU AND LG ARISING OUT OF OR RELATING IN ANY WAY TO THIS LIMITED WARRANTY OR THE PRODUCT SHALL BE RESOLVED EXCLUSIVELY THROUGH BINDING ARBITRATION, AND NOT IN A COURT OF GENERAL JURISDICTION. BINDING ARBITRATION MEANS THAT YOU AND LG ARE EACH WAIVING THE RIGHT TO A JURY TRIAL AND TO BRING OR PARTICIPATE IN A CLASS ACTION.

Definitions. For the purposes of this section, references to “LG” mean LG Electronics MobileComm U.S.A., Inc., its parents, subsidiaries and affiliates, and each of their officers, directors, employees, agents, beneficiaries, predecessors in interest, successors, assigns and suppliers; references to “dispute” or “claim” shall include any dispute, claim or controversy of any kind whatsoever (whether based in contract, tort, statute, regulation, ordinance, fraud, misrepresentation or any other legal or equitable theory) arising out of or relating in any way to the sale, condition or performance of the product or this Limited Warranty.

Agreement to Binding Arbitration and Class Action Waiver. You and LG agree to resolve any claims between us only by binding arbitration on an individual basis, unless you opt out as provided below. Any dispute between you and LG shall not be combined or consolidated with a dispute involving any other person’s or entity’s product or claim. More specifically, without limitation of the foregoing, any dispute between you and LG shall not under any circumstances proceed as part of a class or representative action. Instead of arbitration, either party may bring an individual action in small claims court, but that small claims court action may not be brought on a class or representative basis.

Arbitration Rules and Procedures. To begin arbitration of a claim, either you or LG must make a written demand for arbitration. The arbitration will be administered by the American Arbitration Association (AAA) and will be conducted before a single arbitrator under the AAA’s Consumer Arbitration Rules that are in effect at the time the arbitration is initiated (referred to as the “AAA Rules”) and under the procedures set forth in this section. The AAA Rules are available online at www.adr.org/consumer. Send a copy of your written demand for arbitration, as well as a copy of this provision, to the AAA in the manner described in the AAA Rules. You must also send a copy of your written demand to LG at LG Electronics, USA, Inc.Attn: Legal Department-Arbitration1000 Sylvan AvenueEnglewood Cliffs, NJ 07632. If there is a conflict between the AAA Rules and the rules set forth in this section, the rules set forth in this section will govern. This arbitration provision is governed
by the Federal Arbitration Act. Judgment may be entered on the arbitrator’s award in any court of competent jurisdiction. All issues are for the arbitrator to decide, except that issues relating to the scope and enforceability of the arbitration provision and to the arbitrability of the dispute are for the court to decide. The arbitrator is bound by the terms of this provision.

Governing Law: The law of the state of your residence shall govern this Limited Warranty and any disputes between us except to the extent that such law is preempted by or inconsistent with applicable federal law.

Fees/Costs. You do not need to pay any fee to begin an arbitration. Upon receipt of your written demand for arbitration, LG will promptly pay all arbitration filing fees to the AAA unless you seek more than $25,000 in damages, in which case the payment of these fees will be governed by the AAA Rules. Except as otherwise provided for herein, LG will pay all AAA filing, administration and arbitrator fees for any arbitration initiated in accordance with the AAA Rules and this arbitration provision. If you prevail in the arbitration, LG will pay your reasonable attorneys’ fees and expenses to the extent required by applicable law. If the arbitrator finds either the substance of your claim or the relief sought in the demand is frivolous or brought for an improper purpose (as measured by the standards set forth in Federal Rule of Civil Procedure 11(b)), then the payment of all arbitration fees will be governed by the AAA Rules. In such a situation, you agree to reimburse LG for all monies previously disbursed by it that are otherwise your obligation to pay under the AAA Rules.

Except as otherwise provided for, LG waives any rights it may have to seek attorneys’ fees and expenses from you if LG prevails in the arbitration.

Hearings and Location. If your claim is for $25,000 or less, you may choose to have the arbitration conducted solely on the basis of (1) documents submitted to the arbitrator, (2) through a telephonic hearing, or (3) by an in-person hearing as established by the AAA Rules. If your claim exceeds $25,000, the right to a hearing will be determined by the AAA Rules. Any in-person arbitration hearings will be held at a location within the federal judicial district in which you reside unless we both agree to another location or we agree to a telephonic arbitration.

Opt Out. You may opt out of this dispute resolution procedure. If you opt out, neither you nor LG can require the other to participate in an arbitration proceeding. To opt out, you must send notice to LG no later than 30 calendar days from the date of the first consumer purchaser’s purchase of the product by either: (i) sending an e-mail to optout@lge.com, with the subject line:
“Arbitration Opt Out” or (ii) calling 1-800-980-2973. You must include in the opt out e-mail or provide by telephone: (a) your name and address; (b) the date on which the product was purchased; (c) the product model name or model number; and (d) the IMEI or MEID or Serial Number, as applicable (the IMEI or MEID or Serial Number can be found (i) on the product box; (ii) on a label on the back of the product beneath the battery, if the battery is removable;or (iii) from the settings menu via the following path: Settings > General > About phone > Status).

You may only opt out of the dispute resolution procedure in the manner described above (that is, by e-mail or telephone); no other form of notice will be effective to opt out of this dispute resolution procedure. Opting out of this dispute resolution procedure will not affect the coverage of the Limited Warranty in any way, and you will continue to enjoy the full benefits of the Limited Warranty. If you keep this product and do not opt out, then you accept all terms and conditions of the arbitration provision described above.
