Mehdi Vasigh

Web Developer **| mvasigh.github.io**

1211 Jackson Blvd. Apt. D
Houston, TX 77006
(678) 665-0946
mehdi.vasigh@gmail.com

Full-stack web developer specializing in front-end JavaScript single-page application development using modern best practices.

Projects

DFC Access to Care Guide — *www.dfcguide.org*

React, Redux, Node.js, Express, EJS, MongoDB, Sass

- Used feedback from end-user interviews and market research to drive application architecture and design

- Developed MongoDB database schemas and developed REST API using Node.js and Express, making use of cutting-edge JavaScript features such as async/await for asynchronous operations

- Created a custom content-management system and implemented local user authentication with Passport.js

- Built a client-side application with React, utilizing popular libraries such as Axios, React Router and Redux

Experience

Doctors for Change, Houston, TX — *www.doctorsforchange.org*

Program and Website Coordinator
JUNE 2017 - PRESENT

- Developed DFC Access to Care Guide, a full-stack web application, and redesigned organization website.

- Organized and executed two major fundraisers, eight forums and a continuing education conference with Houston Methodist.

Acting Director of Operations
