

Cleaning and Maintenance

PERLATO

Perlato Acrylic Surfaces

Perlato utilizes high quality cast acrylic material for all of its acrylic tubs. Perlato tub surfaces are hard, non-porous and stain resistant; and retain their beauty with minimal maintenance.

To maintain the fresh, glossy look and/or remove stains, please adhere to the following guidelines:

- Use common non-abrasive household cleaner (such as mild liquid dishwashing detergent) when cleaning tub or controls. Make sure that cleaning agent used for tub is *explicitly stated to be safe for acrylic*, and follow all manufacturer directions and precautions. Even some non-abrasive cleaners, especially “scrubbing bubbles” and aerosol spray cleaners, will damage acrylic over time.
- Rinse well and dry with a clean soft cloth.
- Acrylic tubs should never come in contact with nail polish, nail polish remover, wintergreen oil, dry cleaning solution, lacquer thinners, gasoline, pine oil, or other elements that are damaging to acrylic.
- A simple soft damp cloth can be used to remove dust and dry dirt.
- To remove grease, oil, paint or ink stains, use isopropyl (rubbing) alcohol. Dry with a clean soft cloth.
- Do not use a razor blade or other sharp object on tub, as it can scratch the surface.
- Small scratches can be repaired by applying a thin coat of automotive polishing liquid, followed by a light buffing with a clean cloth.
- To repair deeper scratches, sand surface lightly with a 400 grit “wet or dry” paper and buff with a fine grit buffing compound. (Note: Repairing deep scratches is a very delicate process. It is highly recommended to use a professional repair service.)
