

Timekeeping Solutions

Let us help you reduce your cost of labor

About Our Timekeeping Solutions

We offer simple, automated timekeeping solutions, designed for small businesses just like yours. As your trusted advisor, we are always looking for ways to help you reduce costs and streamline processes. With the right timekeeping system in place, you will significantly reduce labor costs and eliminate errors often made via manual data entry.

We offer both standard and biometric time clock solutions. By strategically placing the time clock at the entrance of your business, employees will swipe in and out (or register biometrically) as they come and go—helping you measure exactly the time worked and wages earned. With an automatic system capturing this data, you will save thousands of dollars in wasted labor time each year.

Reduce your labor costs!

Cut down on wasted labor time by implementing an advanced biometric timekeeping solution.

The Value of Outsourced Bookkeeping

Consider the value of our timekeeping solutions:

Reduce your labor costs

Cut down on wasted labor time by implementing an advanced biometric timekeeping solution.

- Significantly reduce your labor costs. Biometric technology allows you to capture all time on and off the clock. No more “buddy punching.”
- Eliminate human calculation error. The rate of human error is estimated at between 1 and 8%. By reducing or eliminating error, you will save thousands of dollars in erroneous wages paid.
- Eliminate manual time card preparation. The average payroll clerk spends seven minutes per time card each pay period, which equates to hundreds of hours per year. Lose the cost of paying a clerk the added hours of time card preparation by implementing an automated timekeeping system.
- Enjoy the peace of mind that time is being captured accurately. You will no longer have to worry about wasted labor minutes (which grow into hours over time).

Say Goodbye to “Buddy Punching”

Our main objective is to ensure your success, so we are always looking

for ways to help you meet your revenue and management goals.

Reducing labor costs is a good way to boost your bottom line.

The American Payroll Association estimates that buddy punching

accounts for up to 5% of gross payroll costs each year—adding up to

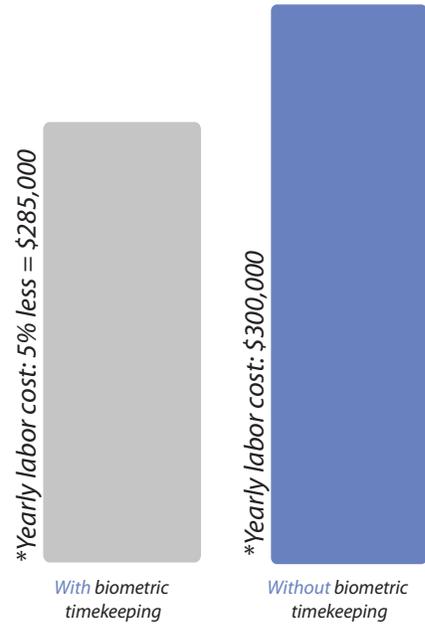

hundreds of thousands of dollars. Businesses can't afford this type of

wasted labor costs, which is why we offer our advanced timekeeping

system to augment your current time clock solution.

How would you like to save *5% per year on your employee labor costs by doing one simple thing?

Eliminate *buddy punching* by adding biometrics to your time clock

*The AMERICAN PAYROLL ASSOCIATION estimates that “buddy punching” accounts for up to 5% of gross payroll costs each year. The illustration above shows a data sample based on a company with a \$300,000 gross payroll expense each year?

Rest assured...

that time is being recorded accurately and that you are saving thousands of dollars by doing so!
