Supporting Essential Industries

au.rs-online.com

By your side

Supporting our customers, we're by your side.

High stock levels

\$600m of inventory readily available

Next day delivery

We use a national carrier network to maintain continuity of service

Order online 24/7

We are here when you need us, with up-to-date inventory levels

Product Plus sourcing

Whatever you need however obscure – we can get it

Best in class eCommerce experience

Our RS PurchasingManager® web order management tool & eProcurement solutions can help streamline ordering processes

Protecting our people

People First

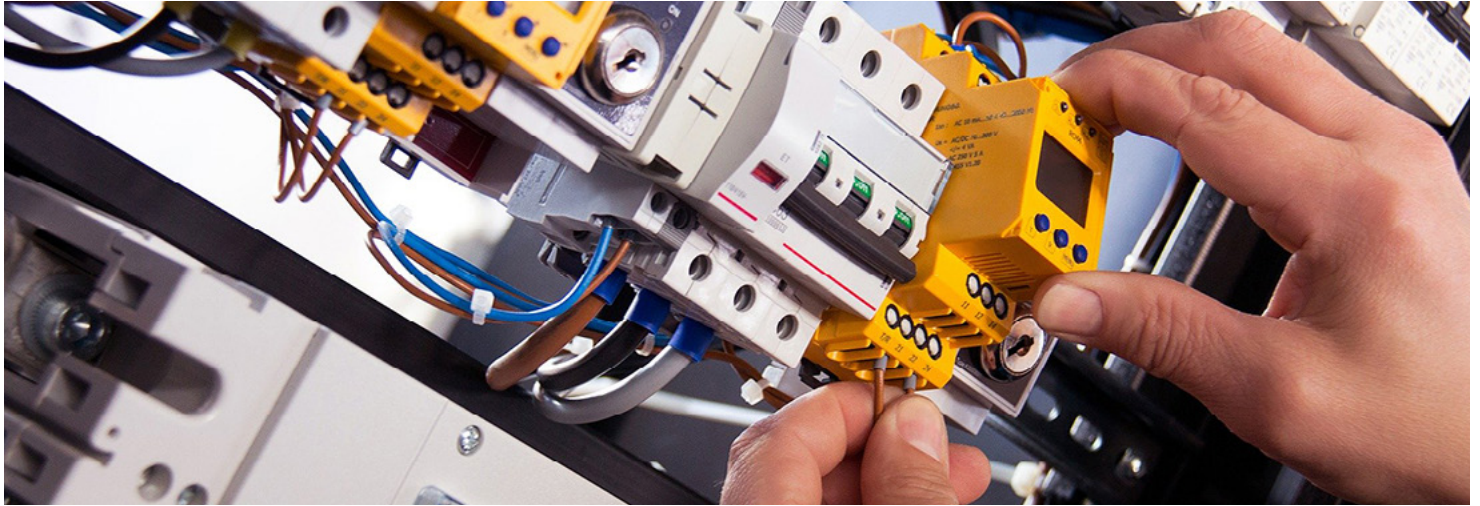

Home working wherever possible. In the workplace - managed cells, social distancing, enhanced PPE requirements

By your side

Product Support

At RS we are ready and prepared to support your business.
By your side.

Automation & control

Across the utility sector there are continual requirements for control & switchgear, fuses and MCB, while in the water sector there is a need for level sensors and pump control.

Tools

With a large network to support, and large and complex sites to maintain, the utilities sector has an army of engineers all needing tools.

Health & Safety

Protecting the engineering teams who are working with high voltage, waste water & chemicals on down sewers or man holes the need for the right PPE and site safety equipment is ever present.

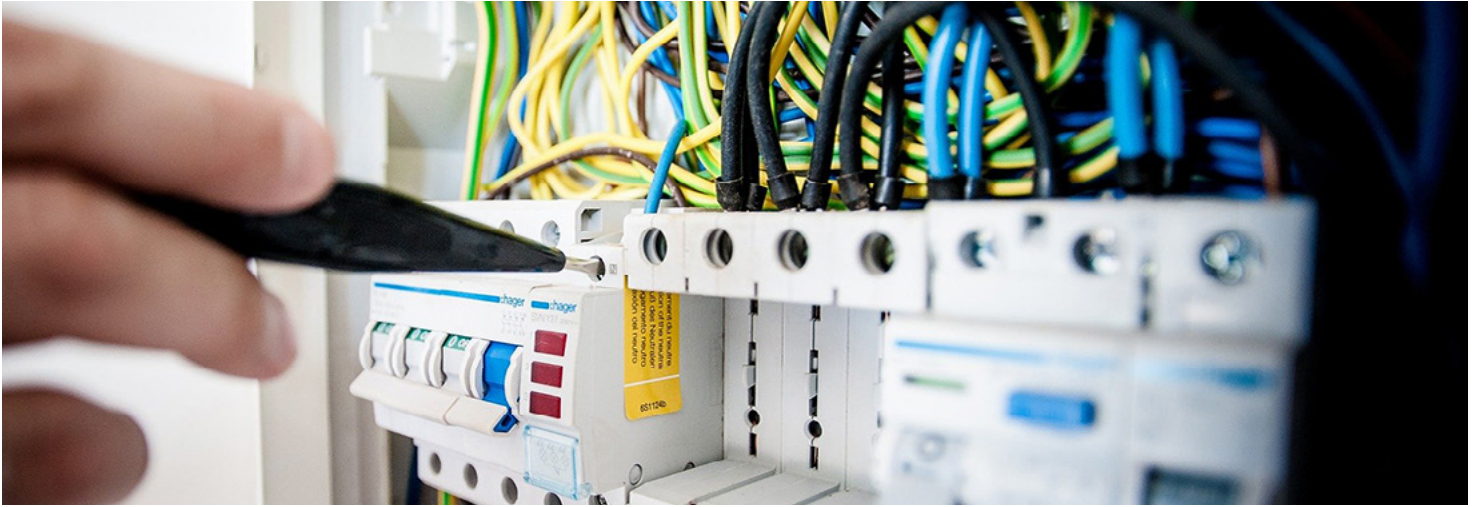

Cables & wires

Cable might be the bread & butter for those in the electrical & Telecoms sector, but water and gases utility companies need both commercial and industrial cable for power & data.

Test & measurement

Whether it's to test electrical circuits to diagnose faults or to check water temperature or quality the utilities sector needs multimeters, digital thermometers, electrical testers and network testers.

Batteries & chargers

With large sites and many engineers on the road there is an on-going need for batteries - both non-chargeable and re-chargeable - and charging equipment.
