Product Portfolio

Company Profile

TRACO Electronic AG is a Swiss company with headquarters based in Baar, Switzerland. As a leading power supply specialist with more than 40 years experience we are dedicated to the design and manufacturing of high quality DC/DC and AC/DC power conversion products.

TRACO markets its products worldwide under the registered trademark TRACO POWER. Our mission is to provide our customers with optimal power supply solutions in terms of performance, quality and cost for their individual application.

Ruggedized DC/DC Converters For Railway and Industrial Applications

Ruggedized DC/DC converters for railway and industrial applications must withstand highest mechanical and thermal stresses. Even our smallest converters are subject to stringent requirements on safety, design-life and environmental operating conditions. The corresponding standards **EN 50155** and **EN 61373** are internationally recognized for electronic equipment on rail vehicles and are widely regarded as a proof of fitness for extreme environments outside of the transportation sector as well. All our railway DC/DC converters come with additional **IEC/EN/UL 62368-1** approvals for a wide range of demanding applications.

EN 50155 defines the minimum input voltage requirements for DC/DC converters as follows:

Bus Voltage	Continuous input voltage range	Brownout 100 ms	Transient 1 sec	Recommended input voltage ranges
24 VDC	16.8–30.0 V	14.4 V	33.6 V	9–36 VDC (4:1 wide) or 14–160 VDC (12:1 ultra wide)
37.5 VDC	26.2–47.0 V	22.5 V	52.5 V	18–75 VDC (4:1 wide) or 14–160 VDC (12:1 ultra wide)
48 VDC	33.6–60.0 V	28.8 V	67.2 V	18–75 VDC (4:1 wide) or 14–160 VDC (12:1 ultra wide)
72 VDC	50.4–90.0 V	43.2 V	100.8 V	43–160 VDC (4:1 wide) or 14–160 VDC (12:1 ultra wide)
96 VDC	67.2–120.0 V	57.6 V	134.4 V	43–160 VDC (4:1 wide) or 14–160 VDC (12:1 ultra wide)
110 VDC	77.0–137.5 V	66.0 V	154.0 V	43–160 VDC (4:1 wide) or 14–160 VDC (12:1 ultra wide)

EN 50155 sets the following additional requirements:

- Galvanic isolation to protect electronic circuits
- Limits on emission and susceptibility with respect to conducted and radiated electromagnetic interference
- Safe operation at relative humidity levels up to 95% for 30 consecutive days

EN 61373 certification guarantees the ability to continuously operate under severe mechanical stresses:

- Random vibration – frequency range of 5–150 Hz @ 5grms (5hrs per axis)
- Shock – peak acceleration of 5g/2g/1g (duration: 50ms/20ms/20ms.)

All TRACO POWER railway solutions offer highest reliability in harsh environments. Our 4:1 wide and 12:1 ultra wide input voltage range DC/DC converters go beyond the requirements of the **EN 50155**. Continuous operation is permitted between –40 to +85°C ambient temperature. Operation at higher ambient temperatures is possible with favorable derating characteristics. All our PCB-mounted converters are fully encapsulated for protection against moisture and air particles. Certification according to **EN 61373** guarantees highest resistance against mechanical shocks and vibration. For selected models, an internal class a EMI filter limits electromagnetic interference. All railway DC/DC converters come with additional **IEC/EN/UL 62368-1** safety approvals and are qualified for fire behavior according to **EN 45545-2**. Our manufacturing processes are **ISO 9001** certified to ensure every single product is safe, reliable and of highest quality.
