

Automated Bicycle Rentals Designed Specifically for the Hospitality Industry!

*Offer your guests a fun, healthy
and convenient activity to
explore Sonoma Valley!*

Our beautifully designed, automated bicycle stations allow your guests to quickly and easily rent a bike right from your hotel.

And the best news is that we install and manage these stations on your property at no cost to you with no involvement from your staff.

The Future of Bicycle Renting is Finally Here!

The Bicycle

Our proprietary design took into consideration the tourist - not the cyclist - focusing on comfort, ease, and hassle-free riding.

- Lightweight bike offers easy pedaling
- Handlebar bag to carry personal belongings
- Hotel-specific map mounted on handlebar
- Puncture proof tires

The Station

The Spinway station is solar or battery powered allowing for stand-alone installation without any utilities. Thus,

- Easy installation on property
- No damage or disruption to your grounds
- Hotel branding available

How does it work?

Your guest inserts their credit card, grabs a bike and pedals away. They return their bike back to the station whenever they want, 24hrs a day. It's that easy!

Through a cellular connection, the "brain" of the station communicates to a server which tracks each bicycle through RFID technology. Your guest's credit card is charged based on how long they have the bicycle.
