Re: Boise State University Bleacher Addition

To Whom It May Concern,

I would like to personally thank David McClendon and his staff for the great job they did on this project. From the first day I contacted Mr. McClendon and asked for his assistance in designing the additional bleachers for the Bronco Stadium, I was met with a willingness and professionalism that you don't find very often in our industry. This project was a design build, with a limited budget, and Mr. McClendon was very proactive in making recommendations to help the Owner get the most "bang for their buck". The onsite installation crew worked with our team in any efforts that needed to happen to make sure the new bleachers tied in properly with the existing stadium. The end product is superior and the Owner is elated. Thank you again for all of your help and I look forward to having many other opportunities to work with your team in the future.

Sincerely,

A handwritten signature in cursive script that reads 'Tammie Newman'.
