

This is your website.

This is your website for someone with vision impairment.

Your website must be accessible
to all of your customers,
not just some of them.

That's not our opinion... it's the law.

If your website isn't properly built for users with disabilities, it's a corporate liability.

As of April 2017, over 2,600 ADA Title III lawsuits have been filed for websites that don't meet accessibility compliance, an 18% increase over 2016. Unfortunately, Florida has more than double the lawsuits of any other state in the country.

With plans starting at just \$9.99 a month, adot™ pro offers a variety of website solutions that provide an accessible-ready website solution for your customers with disabilities.

Visit adotpro.com/frla to learn more about website accessibility and the adot pro solution.
