

Harry the hirer / Exhibition response to COVID(19)

Harry's is here to help

COVID-19 is having a significant impact on our health, businesses, and economy. We are constantly developing new initiatives to help organisations get through these difficult times.

Here's how we can lend a helping hand.

Harry
the hirer®

Our services

Self Registration

The contactless self-registration counter can be constructed using any of Harry the hirers existing build systems. The Self registration point allows for attendees to scan their preregistration barcodes to obtain their entry pass.

Using Harry the hirers in-house signage department the self-registration can be branded in line with the exhibition and conference brand guidelines and other information.

Please note that all designs contained within the document are subject to venue approval.

Our services

Entrance Feature

The entrance feature can be constructed using many of Harry the hirers build systems. The entrance feature incorporates the temperature scanning point along with a visitor counter showing the number of attendees currently on the show floor. Separate entry and exit points provides separation and greater control for security personnel.

Using Harry the hirer's in-house signage department the entrance feature can be branded in line with the exhibition and conference brand guidelines and other information.

Please note that all designs contained within the document are subject to venue approval.

the hirer.

Our services

Temperature Scanning Point

This wireless, battery operated solution provides the ability to implement almost anywhere.

Ideal for entry points at venues, sporting gates, exhibitions, conferences, office buildings & business.

The Temperature Scanning Point provides a contactless solution for individuals to have their temperature scanned and checked.

- Wrist scanning for most accurate reading
- 1800mm height of scanner is required
- Accuracy of +/- 0.25 deg
- Controlled testing only by door / gate operator
- Remote push button operation by door operator
- Simple pass / fail result
- Battery powered or 240v option
- Designed for hospitals

Please note that all designs contained within the document are subject to venue approval.

Please note that all designs contained within the document are subject to venue approval.

Temporary Structures

Queueing shelters

Marquees, fencing & signage

Essential services such as supermarkets, retail facilities and medical centres now need to comply with government restrictions and limit the number of individuals in their space. Our extensive temporary structures allow for queues to form safely, with shelter from poor weather if needed.

Complete the service with directional and floor signage, and temporary fencing.

Our services
