motion for life

*Moovartes stands for the art of movement.
Movement can be found in everything we stand for.*

Daily, we gather forces to support health care professionals with expert advice and an outstanding pre- & after sales service.

At MOOVARTES, we commit to continuously improve standards of orthopedic care thereby providing the highest quality solutions with compassion, respect, and dedication to all our clients and their patients.

Leading people the way to a life in which they can move without restrictions or pain, that is our true vision!

Our vision

Create a world in which people can move freely and without restrictions or pain.

Our mission

Integrate state of the art solutions and orthopedic innovations in our product portfolio to create the highest quality care pallet to chose from when treating patients.

Our values

Being a trustworthy, all-round partner with focus on innovation, efficiency, and quality, offered by a passionate and dedicated team.

YOUR ALL-ROUND PARTNER IN ORTHOPEDICS THANKS TO TWO BUSINESS UNITS.

Founded in 1999 as a distribution company 'pur sang', over the years we developed into a company which offers full range orthopedic solutions with focus on prevention and pre-, intra- and post-surgical care. To streamline our extensive portfolio of more than 2000 products, we created two business units. The business unit "SUPPORT", including our well-known bracing, rehabilitation and splinting products is now fortified by the new business unit "SURGICAL".

spinal support

With **25 years** of research driven design, Aspen is committed to providing patients with effective solutions to their **unique spinal conditions**. Aspen's comprehensive product development approach produces **ground breaking innovation** with the therapeutic goal to improve patient outcomes. Aspen products continue to help drive industry standards in spinal bracing for efficacy, quality, design and outcomes.

1. Vista Adjustable Collar

Improves patient care while saving time, money and storage space. With its innovative height adjustment, this collar is actually **6 collars in 1**. The right size is always at hand, reducing storage and inventory costs, while improving patient care.

Reference	Product
S-FIT-20-008-U9	Vista Adjustable Collar
S-FIT-00-019	Extra Replacement Pads
S-FIT-20-009-U9	Vista Adjustable Collar + Extra Replacement Pads

2. Vista Multipost Collar

Fully adjustable collar with **pivoting occipital panels**. Like the Vista Adjustable Collar (see above), this collar is one size adjustable (6 collars in 1). Features Aspen's proven cotton-lined pads designed to enhance skin care by reducing patient contact points in the occipital area.

Reference	Product
S-FIT-20-021-U9	Vista Multipost Collar
S-FIT-00-035	Extra Replacement Pads
ASP-984252	Vista Multipost Collar + Extra Replacement Pads

3. Vista TX Collar

This collar encompasses all of the features and benefits of the Vista Adjustable Collar (see above) with a **thoracic extension**.

Reference	Product
S-FIT-20-010-U9	Vista TX Collar
S-FIT-00-020	Extra Replacement Pads
S-FIT-20-011-U9	Vista TX Collar + Extra Replacement Pads

4. Vista Multipost Therapy Collar

The Vista Multipost Therapy Collar is designed to reduce the symptoms of **Forward Head Carriage**. This disorder is a growing problem on the ever increasing use of cell phones and computers.

The unnatural head position can shift the cervical spine out of alignment, leading to radiculopathy, neuropathy and cervicogenic pain.

- A **compression bladder** enhances the collar's ability to hold the head in cervical neutral.
- Cradles the chin.
- **Integrated air pump** to quickly achieve the level of compression that works best.
- **One size adjustable** (6 sizes in 1 collar) by simply pulling and turning the Height Adjustment Dial.
- **One-time adjustment** with the locking strap on the left side.
- **Hot/cold therapy pack** can be moved for targeted therapy.
- Activating the compression bladder can enhance healing and help reduce symptoms by taking stress off the vertebra, discs and nerves.

Reference	Product
S-FIT-20-023-U9	Vista Multipost Therapy Collar
ASP-984252	Extra Replacement Pads

5. ICU Back Panel

Designed for patients at risk of occipital breakdown due to extended periods of lying supine. The ICU back panel utilizes the standard back panel of the Vista back panel providing the same superior motion restriction. Back panel extension can be removed once the patient becomes ambulatory.

Features & benefits

- Maximum skin care and comfort
- Pressure reducing pad
- Extended back panel height for rotating or repositioning patients safely
- One size adjustable

For use with

- Vista Adjustable Collar
- Vista TX Collar
- Vista Multipost Collar

Reference	Product
S-FIT-20-020-U9	ICU Back Panel

spinal support

1. Aspen Cervical Collar

Designed to optimize support and comfort, two key components for better patient outcomes.

The structure of the collar was engineered to provide **substantial motion restriction without producing painful pressure points** that can lead to skin breakdown or poor patient compliance.

All contact surfaces are cushioned with cotton-lined, breathable foam padding.

Reference	Size
S-FIT-20-017-U2	Short
S-FIT-20-017-U3	Regular
S-FIT-20-017-U4	Tall
S-FIT-20-017-U5	Extra tall

Reference	Product
S-FIT-00-027	Universal spare padding

1

2. Aspen Pediatric Cervical Collar

Available in five sizes to provide a custom fit for all infants and children.

Features & benefits

- Safe for the delicate skin
- Gentle by design
- Effective motion restriction

Reference Collar	Reference Collar + Extra Pads	Age	Height	Weight

2

3. Vista CTO Universal

Has multiple adjustment points to ensure a comfortable, effective fit for the vast majority of patient anatomies.

The Vista CTO Universal is **fully adjustable** and only one size is required, reducing inventory costs and keeping patients care the main priority.

Features & benefits

- One size adjustable
- Locking sternal adjustment
- Flexible thoracic adjustment
- Effective skin care
- Increased motion restriction

Indications

- Post Surgical
- Cervicothoracic instability

Reference	Product
S-FIT-30-011-U9	Vista CTO Universal
S-FIT-00-019	Extra Replacement Pads Collar
S-FIT-00-037	Full Replacement Pads

4. Vista CTO 4 Post

The Vista CTO4 is designed to provide **increased motion restriction in all three planes of motion**—flexion/extension, lateral bending, and axial rotation.

It can easily be stepped down to the Vista CTO and then the Vista MultiPost Collar to support the progression of care.

Features & benefits

- Maximum motion restriction
- **Pivoting occipital panels:** pivot bilaterally and self-adjust to cradle all head shapes
- Fully adjustable front and back panels
- **Adjustable low profile back strut,** even in the supine position
- Progression of care: can be stepped down again to the collar quickly and without tools
- Fully padded at all patient contact points

Reference	Product
S-FIT-30-023-U9	Vista CTO Universal
S-FIT-00-035	Extra Replacement Pads Collar
S-FIT-00-037	Full Replacement Pads

spinal support

1. Aspen Elite Active

The Aspen Elite Active helps stabilize the pelvic and lumbar region through the unique combination of Aspen's patent pending **UltraKnit™ technology** and patented 4:1 mechanically advantaged **independent compression system**, which can be easily adjusted by patients to provide a therapeutic level of support.

This elegant design helps provide massaging pressure, stabilization and control for patients, helping to restore functional mobility.

Features & benefits

- Comfortable, Intimate Fit
- Essential Lumbar Stability
- **Lumbar Pad** for Massaging Pressure
- Targeted, Therapeutic Level of Compression
- Covers Complete Lumbar Region
- Hot/Cold Therapy Pack Option Available

Reference	Size	Waist circumference
ASP-591201	XS	70 - 80 cm
ASP-591202	S	80 - 90 cm
ASP-591203	M	90 - 100 cm
ASP-591204	L	100 - 110 cm
ASP-591205	XL	110 - 120 cm

2. Aspen Elite PRO+

The Aspen Elite Pro+ offers a unique support system that incorporates flexion or extension elements for maximum stability. This elegant design features Aspen's innovative **UltraKnit™ technology** and patented independent compression system that allows for easy adjustment and tensioning. The Aspen Elite Pro+ also provides **increased lateral coverage** and **anterior support**.

Features & benefits

- Flexion and Extension Elements
- Targeted, Therapeutic Level of Compression
- Covers Complete Lumbar Region
- **Adjustable Tightening Mechanism** with 4:1 Independent Compression
- Increased **Lateral Coverage** and **Anterior Support**

Reference	Size	Waist circumference
ASP-591501	XS	70 - 80 cm
ASP-591502	S	80 - 90 cm
ASP-591503	M	90 - 100 cm

spinal support

1. Aspen Lumbar Support

The Aspen Lumbar Support features a simple, elegant design with the essential elements required in a spinal brace to effectively relieve pain.

Aspen's **patented 4:1 tightening mechanism** allows the patient to independently adjust the top and bottom of the brace to provide localized compression where is needed for maximum pain relief.

Features & benefits

- **Simple, elegant design.**
Can easily be worn under clothing.
- **2-stage pain relief.** When first applied, the brace provides the comfort of an elastic brace. Extending the pull tabs gives a highly effective pain relief.

Reference	Size	Waist circumference

S-FIT-30-027-U6	XXL	117 - 132 cm

1

2. Aspen Horizon 456 TLSO

Creates a dynamic environment for healing within the thoracolumbar and lumbar spine. Targets patients with indications that have historically been a challenge to treat such as compression fractures, burst fractures and hyperkyphosis.

One Size Adjustable. Fits waists ranging from 61-127 cm and up to 178 cm with the extension panel.

Reference	Product
S-FIT-30-021-U9	Aspen Horizon 456 TLSO
S-FIT-00-036	Horizon Extension Panel

2

3. Aspen Horizon 637 LSO

Excellent for post-operative patients in need of lateral support, the Horizon™ 637 LSO provides relief for secondary back pain resulting from surgery or injury. The addition of moveable, rigid side panels provide lateral support and a comfortable environment for healing.

One Size Adjustable. Fits waists ranging from 61-127 cm and up to 178 cm with the extension panel.

Reference	Product
S-FIT-30-022-U9	Aspen Horizon 637 LSO
S-FIT-00-036	Horizon Extension Panel

3

4. Vista TLSO 464

Offers patients support within the thoracolumbar spine, providing a versatile system that accommodates appropriate motion restriction throughout the healing process. The three shoulder strap configurations and height adjustment technology accommodate all body styles for an effective and comfortable fit.

One Size Adjustable.

Fits waists ranging from 66 to 152 cm.

Features & benefits

- Three Shoulder Strap Configurations
- Height Adjustment Technology
- Wide Circumference Range

Reference	Product
S-FIT-30-018-U9	Vista TLSO 464

4

5. Sierra TLSO 464

Aspen Sierra™ offers quality with clinically effective motion restriction for post-operative patients. Featuring a side entry system from either the left or right side, Aspen Sierra braces are easy to apply on supine or ambulatory patients.

One Size adjustable.

Fits waists ranging from 71 - 137 cm.

Features & benefits

- Controlled Compression
- Easy to Locate Pull Tabs
- Posterior Wound Relief
- Lateral Panel Angulation

Reference	Product
ASP-501221	Sierra TLSO 464
ASP-501321	Update kit

spinal support

VULKAN BACK SUPPORTS

Your back is your foundation. It plays a huge role in how your entire body functions, stabilising your body during nearly all daily activities. Most of us will suffer with back pain at some point in our lives. The most common type of sudden-onset lower back pain by far is classed as “non-specific” accounting for around 19 in 20 cases.

1. Vulkan® Contoured Back Support 3013

This neoprene support provides **compression** and **warmth** to the lumbar area. Contoured for an improved fit with easy touch/close fastening. Ideal for **lower back pain** and **rheumatic pain**.

Reference	Size	Circumference
AO-006826XS	XS	60 - 70 cm
AO-006826S	S	70 - 80 cm
AO-006826M	M	80 - 90 cm
AO-006826L	L	90 - 100 cm
AO-006826XL	XL	100 - 110 cm
AO-006826XXL	XXL	> 110 cm

2. Vulkan® Criss Cross Back Brace 3093

Provides significant levels of lumbar support for those recovering from a **severe episode of back pain**. The **additional stays** and **compression strap** help to limit unwanted twisting and bending movements to allow recovery without strain.

Reference	Size	Circumference
AO-006841S	S	70 - 80 cm
AO-006841M	M	80 - 90 cm
AO-006841L	L	90 - 100 cm
AO-006841XL	XL	100 - 110 cm

3. Vulkan® Universal Back Support 3023

Provides increased support at the sides to reduce unwanted twisting movements. Relieves against **lumbago**, **sciatica** and **lower back muscular pain**. Useful for those working in a manual occupation where lifting may be involved. **One size fits all!**

Reference	Size
AO-014763	Universal size

1. Hyperextension Brace

1

Indications

- Traumatic fracture
- Compression fractures of the thoracic vertebrae dorsolumbar transition caused by osteoporosis or metastasis
- Osteomalacia
- Osteoarthritis in the thoracic and lumbar regions
- An alternative to a body cast

Features & benefits

- Immobilisation without hindering breathing or blood flow.
- Adjustable vertical stays and top bar.
- Innovative underarm hinges: Right amount of tilt, polymer spring, lighter and self flexing.
- Soft, water-repellent padding, moveable offset sternal pad.
- Less intrusive, equally effective rear strap.
- New side-release buckle with an orange safety button.
- Strap side fastening with 3-step self-fastening system.
- Dorsolumbar plate.

Reference	Size	Pelvis Circumference	Brace Height
S-FIT-30-001-U2	S	60 - 75 cm	34 - 42 cm
S-FIT-30-001-U3	M	75 - 90 cm	36 - 46 cm
S-FIT-30-001-U4	L	90 - 105 cm	40 - 52 cm
S-FIT-30-001-U5	XL	105 - 115 cm	42 - 54 cm

Short Version

Reference	Size	Pelvis Circumference	Brace Height
S-FIT-30-020-U3	M	75 - 90 cm	34 - 41 cm

S-FIT-30-020-U5	XL	105 - 115 cm	39 - 49 cm

2. Hyperextension Brace with Pubis

2

Indications

Vertebral compression fractures, osteoporosis and arthritis

Features & benefits

- Lumbar hyperextension of the spine by 3 support points
- Anodized duralumin keeps the spine in hyperextension, limiting anteroposterior and lateral movements.
- Adjustable sternal and lateral plates.
- Tilted sternal plate.

Reference	Size	Pelvis Circumference	Brace Height
S-FIT-30-019-U2	S	60 - 75 cm	34 - 42 cm

S-FIT-30-019-U5	XL	105 - 115 cm	42 - 54 cm

spinal support

3. E-stab

3-point hyperextension brace.

Indications

- Traumatic fractures (T10-L1/L2)
- Osteoporotic or metastatic-related compression fractures of the thoracic spine and the dorsolumbar transition (T10-L1/L2)
- Osteomalacia with fractures
- Dorsolumbar osteoarthritis
- Substitute for plaster corse

Features & benefits

- Shock-absorbing sternal plate for increased comfort
- Easy closure thanks to lightweight lever with safety button
- Anatomically shaped lumbar plate with central relief zones
- Pelvic band made out of flexible and resistant polymer

Reference short: 30 - 41 cm height	Reference long 41 - 54 cm height	Pelvic Circumference
22035-ISH	22035-I	50 - 75 cm
22035-IIISH	22035-II	75 - 105 cm
22035-IIIISH	22035-III	105 - 135 cm

With only 6 sizes, e-STAB covers all fits.

Measure the pelvis circumference and height to determine the right size by consulting the appropriate table.

1. Hip Brace

Indications

- Conservative & post operative treatment of the hip
- Traumatic hip dislocation
- Fracture of the femur head
- Hip dislocation after total hip replacement
- After reconstruction of the femur head

Features & benefits

- **Extension:**
0°, 15°, 30°, 45°, 60°, 75°, 90°

shoulder & elbow

1. Figure-of-8 Sling

Provides support to the shoulder, elbow and forearm. Supportive for orthopaedic and neurological conditions.

- Strapping system helps distribute pressure. Hook and loop construction provides wide adjustability.
- Soft and comfortable strapping material.

Size: measure the length from the elbow to the knuckles..

Reference	Size	Length Forearm
A5451	S/M	28 - 41 cm
A5452	L/XL	40 - 55 cm

2. Deluxe Sling and Swathe

Provides contention, stabilization and immobilization of the scapulohumeral joint. For shoulder dislocations and other pathologies requiring shoulder immobilization or forearm support.

- Shoulder strap crossed in back.
- Designed with a wide swathe.

Size: measure the length from the elbow to the knuckles.

Reference	Size	Length Forearm
S-FIT-40-010-U2	S/M	28 - 41 cm
S-FIT-40-010-U4	L/XL	40 - 55 cm

3. C.V.A. Sling

Provides soft cushioning for maximum comfort of the shoulder, hand and arm. Washable.

Reference	Size
A5492	Universal size, fits most adults

4. Vulkan® Pro Sling

Lightweight, comfortable, easy to apply and reversible. The material is soft and the sling is easily adjustable.

Reference	Size
011612	Universal size, fits most adults

5. UomoSling

Strap arm sling, appropriate for trauma at wrist, elbow or shoulder. Arm support in combination with a cast.

- Non-stretch foam maintains position of the limb while wearing, with no slipping
- **Wide, soft foam** distributes pressure evenly around neck.
- Attractive blue colour does not dirty as easily as some competitors and raises patient compliance
- **28 included Y-tab Velcro fasteners** allow an easy adjustment for clinician and patient

Size: one size fits most adults, both left and right side.

Reference	Size
LS4103	Universal - 2 rolls - 5,5 mm x 12 m

6. UomoFix

Shoulder immobiliser with push buttons.

Comfortable soft neck pad for neck protection.

- **Thumb loop** for extra comfort.
- Waist strap limits shoulder movement.
- **Extra deep pocket** improves arm positioning.
- Latex free.

Size: measure the length from elbow to knuckles.

Reference	Size	Length forearm
S-FIT-40-013-U1	XS	> 28 cm

S-FIT-40-013-U3	M	36 cm
S-FIT-40-013-U4	L	43 cm
S-FIT-40-013-U5	XL	51 cm

7. Deluxe Shoulder Immobiliser

Comfortable soft neck pad for added neck protection.

- **Thumb loop** for additional comfort.
- Waist strap limits shoulder movement.
- **Extra deep pocket** improves arm positioning.
- Latex free.

Size: measure the length from elbow to knuckles.

Reference	Size	Length Forearm
A545801	S	28 cm
A545802	M	36 cm
A545803	L	43 cm
A545804	XL	51 cm

8. Abduction Sling

Provides shoulder abduction positioning with support.

- Can be used for separations, dislocations and strains, as well as other shoulder injuries.
- Pillow portion rests on waist to support weight of arm.
- **Snap-open front panel** facilitates putting support on and taking it off.
- **Y-tabs** provide easy strap length adjustability.
- Sling positioning allows air exchange at axilla, and breathable cotton fabric provides a comfortable fit.
- Fits left and right.

Size: measure the length from the elbow to the knuckles.

Reference	Size	Length Forearm
A54931	M	36 cm

shoulder & elbow

UOMOFIT BY FITLINE

The UomoFit from the FitLine brand is a 3-in-1 sling. It is made of a skin friendly and breathable mesh base material. With **Thermal-moulded foam padding** for more support. Helps the healing process after surgery.

Indications

Immobilisation after:

- Rotator cuff repair
- Capsular shift
- Soft tissue repair / strain
- Shoulder instability / injury

Features & benefits

- Preformed underarm for better fitting
- Moulded removable elbow padding
- Magnetic closing
- Adjustable thumb and size.
- Fits left and right

WITH MAGNETIC BUCKLE

1. UomoFit Regular

The original UomoFit model.

- Preformed armsling with cork
- Small pillow
- Cork is processed in the sling
- Ball insert and exercise ball not included

Reference	Size	Length Forearm
S-FIT-40-004-U2	S/M	± 31 - 38 cm
S-FIT-40-004-U4	L/XL	± 38 - 44 cm

2. UomoFit Short

The UomoFit Regular with smaller preformed armsling.

- Ball insert and exercise ball not included

Reference	Size	Length Forearm
S-FIT-40-006-U2	S/M	± 31 - 38 cm
S-FIT-40-006-U4	L/XL	± 38 - 44 cm

3. UomoFit with zipper

Same product as the UomoFit but the sling has a zipper so the arm can be set free to make it possible to make arm movements.

- Preformed armsling without cork
- Large pillow
- With zipper for pendulum exercises
- Ball insert and exercise ball are included

Reference	Size	Length forearm
S-FIT-40-011-U1	XS	< 31 cm
S-FIT-40-011-U2	S/M	± 31 - 38 cm
S-FIT-40-011-U4	L/XL	± 38 - 44 cm

4. UomoFit with zipper II

The UomoFit with zipper but with a smaller pillow.

- Preformed armsling with cork
- Small pillow
- With zipper for pendulum exercises
- Ball insert and exercise ball not included

Reference	Size	Length forearm
S-FIT-40-012-U2	S/M	± 31 - 38 cm
S-FIT-40-012-U4	L/XL	± 38 - 44 cm

5. Accessories

Available for all of the UomoFit slings above. Both ball insert and exercise ball are **only included as standard in the regular UomoFit with zipper**.

Reference	Product
S-FIT-00-041	Ball insert
S-FIT-00-049	Exercise ball

6. UomoFit ER

Indications

- Initial shoulder dislocation
- Rotator cuff repair
- Capsular shift
- Soft tissue repair / strain
- Shoulder instability / injury

Features & benefits

- Preformed underarm for better fitting
- Moulded foam padding at the height of the elbow
- Adjustable sizes
- Adjustable thumb

Rot.	Reference	Side	Size	Length forearm

shoulder & elbow

1. FitLine ROM Elbow Brace

Indications

- Conservative treatment of ligamentous elbow injuries.
- Post-operative treatment after elbow arthroplasty.
- Functional aftercare of stable fractures of the distal humerus.
- Orthotic treatment of fractures of medial/lateral epicondyles.

Features & benefits

- Soft padded shoulder straps.
- Easy application.
- For comfortable immobilisation / ROM of the shoulder.

Reference	Side	Size	Length forearm
S-FIT-50-001-L2	Left	Small	< 34 cm
S-FIT-50-001-L4		Large	> 34 cm
S-FIT-50-001-R2	Right	Small	< 34 cm
S-FIT-50-001-R4		Large	> 34 cm

1

2. Functional Elbow Brace Telescopic

Ideal application

Conservative treatment for:

- Lateral and medial condyle stable fractures
- Lateral and medial epicondyle I, II stable fractures
- Reset elbow dislocation
- Tendon repair

Post-operative treatment for:

- Ligament reconstruction
- Biceps tendon repair

Features & benefits

- Lightweight metal alloy elbow brace with an angle-meter
- **Telescoping system** for both the arm and the forearm
- **Contains removable hand extension**
- Inner FOAM lining for better fit and comfort
- Adjustable Velcro straps suitable for all arm sizes
- **ROM control** every 10° increments
- Extension range of 0° – 90°
- Flexion range of 0° – 120°

shoulder & elbow

VULKAN SHOULDER & ELBOW SUPPORTS

Flexibility and strength. Our elbows and shoulders have a tough job and they have to be mobile and flexible.

By the way: did you know that the shoulder is the most mobile joint in the body? Vulkan supports keep you on the move!

1. Vulkan® Neoprene Full Shoulder Support 3021

Provides support following **shoulder dislocation** and helps alleviate **bursitis** and **tendonitis**. Adjustable closures for added comfort.

Reference	Size	Chest circumference
006828S	S	80 - 90 cm
006828M	M	90 - 100 cm
006828L	L	100 - 110 cm
006828XL	XL	110 - 120 cm

2. Vulkan® Neoprene Half Shoulder Support 3018/3019

Provides **warmth and support** to the shoulder joint. Adjustable closures for added comfort and fit. Individually left or right shoulder protection.

Reference Left 3018	Reference Right 3019	Size	Chest circumference
006831S	006832S	S	80 - 90 cm
006831M	006832M	M	90 - 100 cm
006831L	006832L	L	100 - 110 cm
006831XL	006832XL	XL	110 - 120 cm

3. Vulkan® Neoprene Elbow Support 3016/3017

Provides therapeutic heat and compression. The adjustable Velcro strap can be fastened tight to reduce the muscle action of the extensor tendons (that are responsible for bending the wrist back) of the forearm. Has a **unique spiral lining** which is critical in removing excess perspiration.

Reference Left 3016	Reference Right 3017	Size	Elbow circumference
003890S	006827S	S	80 - 90 cm
003890M	006827M	M	90 - 100 cm
003890L	006827L	L	100 - 110 cm
003890XL	006827XL	XL	110 - 120 cm

4. Vulkan® Neoprene Tennis Elbow Strap 3074

Helps to reduce the pressure on the tendon complex at the elbow during repeated movements. Ideal for tennis players and golfers.

Reference	Size
009750	Universal size

shoulder & elbow

1. Elbow and Heel Protectors Rolyan

Cushioned heel and elbow protectors with a foam or gel padding which can be used in hospitals, nursing homes and extended care facilities.

Comfortable, **stretchable stocking** is proportionately knitted for a close fit.

Helps protect the joint by **diffusing and distributing pressure**.

May be used following a sudden injury or trauma to the elbow or heel, or simply to protect the joint as it rests against the surface.

- Medication can be applied to pad when needed.
- Pad is removable for washing.

Sold in pairs.

Reference Foam padding	Reference Gel padding	Size	Max length
A731S	A730001	S	23 cm
A731M	A730002	M/L	28 cm
A731XL	A730003	XL	33 cm

1

2. Gel Heel and Elbow Protectors

A. Deluxe Gel Heel and Elbow Protectors

Designed to improve comfort and help reduce shearing and friction on the heel or elbow.

Features a **removable gel pack** and a **plush terry loop** material which is soft on the skin.

B. Regular Gel Heel and Elbow Protectors

The 3 mm thick **polyurethane pad** is held in place by a stretchable, soft terry loop material inside with a flat knit on the outside.

The foam pad is tacked to the material to prevent slippage, yet allows the user to move the joint without a shearing effect.

Sold in pairs.

Size: Measure limb circumference.

shoulder & elbow

3. Hot / Cold pack

Reusable cold/warm pack provides both cooling and warming options. Innovative built-in straps with mutli adjustment hook and loop allows the pack to be easily held in place.

Reference	Product
KIN-4665009807	Hot/Cold pack

4. Instant cold packs

Single use cold pack. Simply locate the inner liquid pouch and squeeze firmly to rupture. Apply as necessary and discard after use.

Reference	Product
DA050005	Pack of 24 cold packs

5. Cold Compression Therapy for shoulder

Indications

- Rotator cuff injury
- Frozen shoulder,
- Bursitis
- Tendonitis
- Sprains
- Strains
- Swelling

Features & benefits

- Easy to wear without having to take clothes off in emergencies
- Special drip-free factric: lets the skin breathe
- Sport professionals advice the R.I.C.E treatment method: Rest - Ice - Compression - Elevation

THE ANATOMICAL SHOULDER CPM MACHINE DESIGNED FOR USE IN PROFESSIONAL ENVIRONMENTS.

- Complete range of movements available
- Synchronised and anatomical motion
- Modular, build-to-your-need device with up to 3 extra modules available
- KINETEC DATA CAPTURE™ USB technology ready

Reference	Product
KIN-4621003002	Kinetec Centura™ - 2 motors
KIN-4640001464	Transport bag

Synchronised and anatomical motion

Remote control

Kinetec Data Capture™

Complete range of movements

The KINETEC CENTURA™ allows 5 anatomical movements covering most of the pathologies of the shoulder:

- Abduction/Adduction
- Abduction/Adduction with synchronised rotation
- Shoulder Rotation
- Shoulder Flexion/Extension
- Horizontal Abduction (optional)

Easy to switch between left and right arms

Patient set-up is anatomical, comfortable and quick with an intuitive colour-coded system.

Evolution compliant

The KINETEC CENTURA™ is available in different versions to fit with your daily requirement and use. The device has been designed with additional modules so the user can upgrade the product as required.

Kinetec Data Capture™ USB technology ready

The KINETEC CENTURA™ remote control features the latest USB technology enabling the use of the KINETEC DATA CAPTURE™ software and patient USBs to track patient progress as well as pre-program the entire patient rehabilitation protocol.

Technical specifications

- Automatically resets the parameters when the movement is changed. This prevents incompatible range of motion to the patients condition.
- Load reverse ensures patient safety when excessive force is exerted.
- Possibility to lock the adjustment of the parameters.
- 2-year full warranty.
- Type BF class II electrical device.
- **Speed:** 50° to 140° per minute.
- **Weight:** 28 kg.
- **Size of the device:** Length 56cm, width 100cm, height 76cm (variable).
- **Patient sizing:** from 1,4 to 2m; user weight: 135kg

KINETEC 6080™

THE ORIGINAL KINETEC® DESIGN DEDICATED TO THE ELBOW JOINT.

- Synchronised and anatomical movements
- Extension/flexion combined with pronation/supination
- Easy to use in bed or in a sitting position
- Patient friendly remote control & adjustments

Reference	Product
KIN-4621000802	Kinetec 6080™
KIN-4650000646	Exchange pads

Full flexion: 135°

Full extension: -10°

One-button
remote control

A design built for immediate post-operative treatment

Post-operative treatment using this device provides an effective deterrent to stiffness and loss of range of motion. Its 135° ROM enables countless applications, and variable speed control allows progressive changes in the therapy.

Synchronised movements for a more anatomically correct therapy

This unit can provide extension/flexion with synchronised pronation-supination.

As extension-flexion movement begins, the hand starts its rotation from full pronation to full supination.

Safety first

Lockable ROM settings prevent misuse and enhance patient safety.

The KINETEC 6080™ rolls on locking wheels and is usable in bed or a chair

Technical specifications

- Start/Stop and reverse always available for the patient.
- Load reverse ensures patient protection when excessive force is exerted on the joint.
- 2-year full warranty.
- Type B Class I electrical device.
- **Speed:** 35° to 135° per minute.
- **Weight :** 21 kg.
- **Size of the device:** Length 72 cm, width 65cm, height 130cm.
- **Patient sizing:** from 1,40m to 1,90m

hand & wrist

Moovartes as key figure in hand therapy

For over 20 years, Moovartes has been the allround trustworthy partner for hand therapists, offering them a complete range of splinting materials and accessories from the best brands.

We hand you the tools, as well as the know-how!

Not only do we offer the best materials for your practice, we also love sharing our knowledge and expertise that goes with it. Moovartes frequently organises incompany workshops on how to use our products as well as possible. Contact us for all the details!

About the Rolyan brand

Therapists turn to Rolyan to provide innovative therapeutic splinting materials and the creative canvas for optimal patient outcomes. By offering the most extensive spectrum of splinting products globally, we inspire therapists to mold and shape their patients' recoveries.

Therapists can select a material that suits their splinting needs from a broad, comprehensive range of high-quality thermoplastic splinting materials and accessories.

Because the people who need healing are just as unique as the healers, Rolyan makes it easy to find the right material for the right splint.

We know it is not just a piece of plastic. It is a critical tool that will get your patients back to doing what they love.

Overview in splinting materials

We recognize that therapists in various fields have different splint-making requirements, and the availability of a broad range of materials across a spectrum of handling and physical characteristics is essential.

The development of the Rolyan spectrum not only illustrates the relationship between splinting material families, but it also serves as a tool for clinicians to identify materials that will support their needs.

Handling Characteristics

Resistance to stretch: how easily material stretches when heated

- Higher resistances means the clinician must work more forcefully and steadily to stretch the material. Comparatively, lower resistance means the clinician can use less force to shape the material.
- Materials with higher resistance typically have greater tensile strength.

Conformability: ease at which heated splinting material conforms to surface contours while a force is applied

- Specifically, drape is conformability where the force applied is gravity alone.
- Materials with high conformability work best with gentle handling because they conform easily. By contrast, materials with low conformity require firmer handling.

Rigidity: strength of splint once formed and cooled

- High rigidity means the splint will be less likely than lowrigidity material to deform or fracture after the clinician exerts force on it.
- Based on the mechanical property, Young's Modulus (kpsi), Rolyan materials now have been evaluated for strength. The higher the kpsi value, the stronger the material.

Memory: the ability of the material to return to its original shape and size after being reheated

- When the material is put back into the hot water bath, it "remembers" and returns to its original shape.
- Clinicians can correct mistakes made while molding and perform frequent remolding when necessary.
- Useful trait for first-time or less experienced therapists

Physical characteristics

Sheet thickness

- Rolyan materials are available in three thicknesses: 3.2 mm, 1.6 mm and 2.4 mm.
- Thinner materials are better for smaller orthoses, such as those for fingers and thumbs.
- Larger orthoses may require thicker material.
- Thinner materials soften and harden quicker than thicker materials, meaning their working time is typically shorter.

Perforations

- Perforations are holes in the splinting material designed to make the splint lighter and to offer some degree of ventilation of the skin.
- Perforations are identified as a percentage (1 percent, 19 percent, etc.), which indicates the amount of material removed due to the perforation. The higher the percentage, the more material has been removed.
- Perforations can affect the drape and handling of the material.

Bonding

- Coated: Splinting material can be treated with a non-stick coating to prevent accidental bonding to itself when heated.
- A coated material will not feel tacky when warm. A temporary bond can be formed by pinching together the heated material.
- A permanent bond can be formed by scrubbing off the coating or removing it with a bond solvent.
- Uncoated: Splinting material that is not treated with a non-stick coating will stick to itself when heated without additional preparation. The heated material will feel tacky and produce an instant bond.

hand & wrist

Polyform™

Maximum stretch. Coated.

Characteristics

- **The splinting material with the most stretch and maximum rigidity when cool.**
- Drapes naturally, leaving the clinician's hands free to mold the intricate contours of the splint gently.
- Provides a precise fit for increased comfort and fewer pressure areas.
- **Minimum memory** allows ability to be reheated and reshaped but will not return to original shape.
- **With coating:** Create a temporary bond by pinching together heated.

Clinical recommendations

- Acute trauma
- Pain and joint disease
- Patients that cannot endure rigid splints
- Dynamic outrigger bases
- **1,6 mm: for light weight splints**
Ideal for conditions that require light material
pe. elderly, children, oncology,...

Heating

- 1,6 mm: 65°C to 70°C for 30 seconds
- 3,2 mm: 65°C to 70°C for 1 minute

Handling time

- 1,6 mm: 1 minute
- 3,2 mm: 3 to 5 minutes

Bonding capacity

- Temporary bonding: pinch warm surfaces together
- Permanent bonding: take off the coating with spiritus or by scraping with a sharp instrument

Minimum resistance,
maximum strength.

Aquaplast™ ProDrape™-T

Maximum stretch. Coated.

Characteristics

- **Stretches and conforms easily** to surface contours and detail with excellent draping.
- Retains shape without reinforcement..
- **100% memory** allows for repeated reheating and reshaping for splint revisions.
- White colour **turns transparent** when heated, making pressure points and markings visible.
- **With coating:** Create a temporary bond by pinching together heated.

Heating

- 1.6 mm: 65°C to 70°C for 30 seconds
- 2.4 mm: 70°C to 75°C for 1 minute
- 3.2 mm: 70°C to 75°C for 1 minute

Handling time

- 1.6 mm: 1 minute
- 2.4 mm: 2 to 3 minutes
- 3.2 mm: 4 to 5 minutes

Slight resistance,
100% memory.

Clinical recommendations

- Acute trauma
- Pain and joint disease
- Thumb, finger, wrist and hand splints
- Dynamic outrigger bases
- Light pediatric splints

Bonding capacity

- Temporary bonding: pinch warm surfaces together
- Permanent bonding: take off the coating with spiritus or by scraping with a sharp instrument

- Pain and joint disease
- Dynamic outrigger bases
- Neurological pathologies
- Collars and face masks
- Thumb, finger, wrist and hand splints
- **1,6 mm: for light weight splints**
Ideal for conditions that require light material pe. elderly, children, oncology,...

Bonding capacity

- Temporary bonding:
pinch warm surfaces together
- Permanent bonding:
take off the coating with spiritus or by scraping with a sharp instrument

Outstanding drape,
rigid when cool.

TailorSplint™

Moderate stretch. Coated.

Characteristics

- **The most versatile material**, perfect balance between stretch and conformability.
- Easy to handle: appropriate for beginners.
- Retains shape without reinforcement.
- **Minumum memory** allows ability to be reheated and reshaped but will not return to original shape.
- **With coating**: Create a temporary bond by pinching together heated.

Heating

- 1,6 mm: 70°C to 75°C for 35 seconds
- 2,4 mm: 70°C to 75°C for 1 minute
- 3,2 mm: 70°C to 75°C for 1 minute

Handling time

- 1,6 mm: 1 to 2 minutes
- 2,4 mm: 2 to 3 minutes
- 3,2 mm: 4 to 6 minutes

Clinical recommendations

- Acute trauma
- Pain and joint disease
- Dynamic outrigger bases
- Neurological pathologies
- Wide range of medium and large splints

Bonding capacity

- Temporary bonding: pinch warm surfaces together
- Permanent bonding: take off the coating with spiritus or by scraping with a sharp instrument

The most versatile
splinting material

hand & wrist

Aquaplast™

Moderate stretch. Uncoated.

Characteristics

- **Versatile** material: Has a moderate stretch, flexibility and conformability.
- Retains shape without reinforcement.
- Tan colour **turns transparent** when heated, making pressure points and markings visible.
- **100% memory** allows for repeated reheating and reshaping for splint revisions.
- **Without coating:** Bonds permanently by pinching together heated surfaces.

Special features

- Gets sticky when heated, making it easier for the therapist to mold and shape the splint.
- **Has the same characteristics as the Aquaplast-T™ but with an immediate and permanent stickiness.**
- Perforated materials allow for ventilation and less weight of the finished splint.
- No unwanted fingerprints.

Clinical recommendations

- Ideal for dynamic splints and attaching outriggers.
- Appropriate for various pathologies of the upper and lower extremities.

Bonding capacity

- Uncoated: Bonds permanently by pinching together heated surfaces.

Heating

- 1,6 mm: 70°C to 75°C for 35 seconds

Aquaplast-T™

Moderate stretch. Coated.

Characteristics

- **Versatile** material: Has a moderate stretch, flexibility and conformability.
- Retains shape without reinforcement.
- White colour **turns transparent** when heated, making pressure points and markings visible.
- **100% memory** allows for repeated reheating and reshaping for splint revisions.
- **With coating:** Create a temporary bond by pinching together heated.

Heating

- 1,6 mm: 70°C to 75°C for 35 seconds
- 2,4 mm: 70°C to 75°C for 1 minute
- 3,2 mm: 70°C to 75°C for 1 minute
- 4,8 mm: 70°C to 75°C for 1-2 minutes

Handling time

- 1,6 mm: 1 to 2 minutes
- 2,4 mm: 2 to 3 minutes
- 3,2 mm: 4 to 6 minutes
- 4,8 mm: 4 to 7 minutes

Special features

- **Combination of strong conformability and elasticity**
- 13% UltraPerf®: ideal for light finger or hand splints made of breathable material
- 19% OptiPerf™: excellent ventilation while maintaining material strength
- Easy to cut edges

Clinical recommendations

- Serial splints
- Hand, wrist, finger and thumb splints
- Dynamic outrigger bases

Bonding capacity

- Temporary bonding: pinch warm surfaces together
- Permanent bonding: take off the coating with spiritus or by scraping with a sharp instrument

100% memory,
with coating.

hand & wrist

Aquaplast-T™ Watercolors™

Moderate stretch. Coated.

Characteristics

- **Versatile** material: Has a moderate stretch, flexibility and conformability.
- Retains shape without reinforcement.
- Colours **turn transparent** when heated, making pressure points and markings visible.
- **100% memory** allows for repeated reheating and reshaping for splint revisions.
- **With coating:** Create a temporary bond by pinching together heated.

Special features

- **Fun colours for children and adults**
- Combination of strong conformability and elasticity
- **13% UltraPerf™:** ideal for light finger or hand splints made of breathable material
- **19% OptiPerf™:** excellent ventilation while maintaining material strength
- Easy to cut edges

Heating

- 1,6 mm: 70°C to 75°C for 35 seconds
- 2,4 mm: 70°C to 75°C for 1 minute
- 3,2 mm: 70°C to 75°C for 1 minute

Handling time

- 1,6 mm: 1 to 2 minutes
- 2,4 mm: 2 to 3 minutes
- 3,2 mm: 4 to 6 minutes

Clinical recommendations

- Finger and hand splints made out of breathable material
- Hand and upper limb splinting
- Occupational splints where conventional white materials can show stains

Bonding capacity

- Temporary bonding: pinch warm surfaces together
- Permanent bonding: take off the coating with spiritus or by scraping with a sharp instrument

Ezeform™

Minimum stretch. Uncoated.

Characteristics

- High resistance in stretch and moderate conformability.
- **Stays in place while shaping**, giving the clinician more control. Still easy to mold when some force is applied.
- **Uncoated** sticky surface acts like an extra pair of hands during splint fabrication. Create a permanent bond by pinching together heated surfaces.

Heating

- 1,6 mm: 70°C to 75°C for 35 seconds
- 2,4 mm: 70°C to 75°C for 30-45 seconds
- 3,2 mm: 70°C to 75°C for 1 minute

Handling time

- 1,6 mm: 1 to 2 minutes
- 2,4 mm: 2 to 3 minutes
- 3,2 mm: 4 to 6 minutes

Clinical recommendations

- Upper and lower limb splinting
- Splints that require a firm approach
- Functional support and positioning splints

Bonding capacity

- Uncoated: Bonds permanently by pinching together heated surfaces.

High resistance to stretch,
with a moderate conformability.

Aquaplast-T™ Resilient™

Minimum stretch. Coated or uncoated.

Characteristics

- **Does not stretch or deform**, giving the clinician even more control.
- **100% memory** allows for repeated reheating and reshaping for splint revisions.
- White sheets **turn transparent** when heated, making pressure points and markings visible.
- Material with high rigidity for large splints, **available with and without coating.**

Heating

- 1,6 mm: 65°C to 70°C for 35 seconds
- 3,2 mm: 70°C to 75°C for 1 minute

Handling time

- 1,6 mm: 1 to 2 minutes
- 3,2 mm: 4 to 6 minutes

Clinical recommendations

- Splints that require frequent revisions
- Medium and large splints for upper and lower limbs, including fracture bracing

Bonding capacity

- Resilient™: Coated for permanent bonding
- Resilient-T™: Uncoated for temporary bonding bond by pinching together heated material; however, it will come apart when cooled.

For medium and large splints, requiring frequent revisions.

hand & wrist

Synergy™

Minimum stretch. Uncoated.

Characteristics

- Minimum stretch, conformability and drape.
- Will not stretch out of shape until placed and molded, **allowing firm handling** of the material.
- The cooled splint is rigid and strong.
- **Minimum memory** allows ability to be reheated and reshaped but will not return to original shape.
- **Without coating:** Bonds permanently by pinching together heated surfaces.

Heating

3,2 mm: 70°C to 75°C for 1 minuut

Handling time

3,2 mm: 4 to 6 minutes

Clinical recommendations

- Indications that require a strong splint
- Functional support and positioning splints
- Splints for upper and lower limbs, spinal braces

Bonding capacity

- Synergy has no protective coating and will bond to itself instantly without surface preparation.
- Bonds permanently by pinching together heated surfaces.

High resistance to stretch
for ultimate control.

San-Splint™

Minimum stretch. Uncoated.

Characteristics

- **Highest resistance to stretch and lowest conformability.**
- Allows handling with force without leaving fingerprints on the material. The cooled splint is rigid and strong.
- Can also be softened in a **dry heat oven**.
- **Minumum memory** allows ability to be reheated and reshaped but will not return to original shape.
- **Without coating:** Gets sticky when heated, making it easier for the therapist to mold and shape the splint.

Heating

3,2 mm: 70°C to 75°C for 1 minute

Handling time

3,2 mm: 3 to 5 minutes

Clinical recommendations

- **Indications that require a strong splint**
- Functional support and positioning splints
- Splints for upper and lower limbs, spinal braces

Bonding capacity

- San-Splint has no protective coating and will bond to itself instantly without surface preparation.
- Bonds permanently by pinching together heated surfaces.

hand & wrist

ThermoFit™ Sticky

Permanent bonding. Uncoated.

Characteristics

- Moderate stretch with moderate flexibility and good conformability.
- **100% memory** allows for repeated reheating and reshaping for splint revisions.
- Reduces waste for less experienced therapists.
- All sheets **turn transparent** when heated, making pressure points and markings visible.
- **Without coating:** bond permanently by pinching together heated and dry surfaces.

1

Dimensions

Measure across the second to fifth MCP.

S	7,6 - 8,9 cm
M	9 - 10,8 cm
L	From 11,4 cm

2. Immo+ thumb immobilizer

Indications

- Immobilization of the thumb
- After soft tissue injury

Features & benefits

- The material can be cut when hot or cold using scissors or a box cutter knife.
- By pressing firmly together the hot surfaces of the material, a permanent bond may be made.
- Rough edges may be polished or leveled by hand
- Material: 1,6 mm thickness - micro perforation
- Colour: Black

1. Gauntlet Thumb Spica

Splint is designed to immobilize the thumb MCP joint, and to treat **arthritis** or **tenosynovitis**. The Pre-Cut Plus versions have a perforation pattern for **increased air circulation** under the splint. The solid edges are useful for edge-finishing. Latex free.

Size: measure across the dorsal surface of the MCP joints including the soft tissue.

2. Rolyan Thumb Support Splint

The Rolyan Thumb Support Splint is constructed of a **flexible, supportive thermoplastic** that can be molded to any thumb for any need.

Designed to provide support and stabilization to the CMC and MP joints of the thumb, while **allowing the range of motion** in the wrist and other fingers to be unhindered by the splint.

Perfect for **CMC arthritis** and **ligamentous injuries**, this splint can help alleviate joint pain, promote healing, and aid individuals suffering from these conditions.

Latex free.

Size: universal, can be cut to size.

Reference	Material	Colour	Quantity
550465	TailorSplint 2,4 mm	Tan	Pack of 3
091169184	ProDrape-T 2,4 mm	Black	Pack of 3

Rolyan

3. Dorsal Wrist Cock-Up Splint

The Rolyan Dorsal Cock-Up Wrist Splint leaves the palm and thumb free while offering support for dorsal wrist pain. Ideal base for dynamic splinting or for injuries of the soft tissues. Latex free.

Size: measure the width of the second to fifth MCP.

Reference	Size	Circumference	Quantity
Aquaplast-T 3,2 mm - solid			
A1521	S	5,1 - 7,3 cm	Per piece

NEOPRENE SPLINTING

Neoprene splinting can be a good addition to thermoplastic splinting. Suited for various indications such as:

- Osteoarthritis & rheumatic disorders
- Congenital hand injuries
- Nerve damage
- Stiff joints
- Swelling

1. Regular neoprene sheets

Reference	Colour	Thickness	Dimensions
091165992	Green	1 mm	46 x 61 cm

3. Black neoprene roll

This black neoprene material has a loop side and nylon lining. **Its moderate elasticity** allows for controlled movements. Ideal for **gentle immobilisation**, wrapping the wrist and other applications.

Reference	Dimensions
M300000022	3 mm x 5 cm x 200 cm

4. Tan neoprene roll

Indications

- Can be used either as strapping or for soft splints.
- Warmth may be beneficial with hypertonicity.

Features & benefits

- Degree of elasticity enables controlled movements.
- Consists of **nylon lining** on one side and **pile material** on the other over a **rubber core**.
- Easy hook attachment.
- Lightweight and thin, enhancing joint function and providing warmth that is ideal for arthritic joints.
- Latex free and with loop material.

Reference	Dimensions
A8105	3 mm x 5 cm x 3,2 m

4

5. Iron-on seam tape

Ideal for **fusing two pieces of neoprene together** when making customised splints.

- Made from a nylon knitted fabric with a heat activated glue on the reverse.
- Place over the butted seam and heat with an iron.
- For maximum bond use tape on either side.
- Neoprene sheets sold separately.

Reference	Dimensions
091170448	20 mm x 5 m

5

6. Neoprene sealing iron

Ideal for **fusing sheets together** while fabricating your own splint from neoprene sheets and seam tape.

- The iron is lightweight and easy to use.
- Ideal for fixing iron-on tapes and fasteners to customised soft splints made from neoprene.
- For safe storage, the iron is supplied with a metal stand and cotton sock that reduces heat.

Reference	Specifications
091184043	UK-plug + EU-adaptor

6

7. Iron-on hook strap

Attach to neoprene, breathoprene (opposite) or other fabrics with an iron on medium setting.

Reference	Dimensions
HK-HO-AIO-25-0002	25 mm x 4,5 m

7

8. Neoprene glue

Can be used to glue two sheets of neoprene together. Must be applied to both surfaces and allowed some time to dry before the two surfaces are pushed together.

VELCRO® BRAND HOOK & LOOP STRAPS

This high quality VELCRO brand hook and loop offers superior, adjustable closure over a long life cycle. Ideal for everyday, long term use on medical applications such as splints, casts and equipment.

The quick setting rubber based adhesive backing can be used on a variety of surfaces including steel, plaster and textiles.

The tape can be washed or dry cleaned. **Latex free.**

For a full strapping closure:

Combine self-adhesive hook with sew-on loop strapping. These are separate item codes.

NEW! Pink Velcro® Strapping

Non-adhesive loop strap in a cheerful pink colour. Fabricated in highest quality by the VELCRO brand.

Reference	Dimensions
M000000040	25 mm x 25 meter

1. Velcro® Rapid Strap™ Kit

Allows you to adjust straps to any length you need without sewing. This versatile system lets you attach the hook tip and D-ring onto the loop strapping using the unique double hook grip fastener.

The kit includes:

- 5m of sewn double faced loop
- 5m of laminated double faced loop
- 10 double hook grip tips
- 10 double hook D-rings

Reference	Colour	Dimensions	Quantity
091317452	Black	25 mm	Per kit
091317460	Black	50 mm	Per kit

2. Velcro® One-Wrap™ Continuous Tape

Reusable hook and loop tape featuring the patented Ultra Mate low profile hooks, which give consistent strength and infinite adjustability. This fabric fastener will not separate or delaminate, no adhesive is used and the hook and loop elements are integrally fused. The soft fabric loop is comfortable if worn close to the skin.

The continuous tape creates no costly wastage - you just cut the tape to create the strap size you require.

Reference	Colour	Dimensions	Quantity
AA9468A	White	25 mm x 10 m	Per roll

M500000021	7,6 cm x 22,86 m	Per roll

ROLYAN HEAT PANS

Rolyan Digital Heat Pans are made from durable stainless steel with hinged lid and perforated tray.

Concealed heating element with over-heat protection and also features **recessed handles to facilitate moving** from one location to another.

- Hinged lid models ensure that spillage does not occur outside of the pan. Open the lid slowly to avoid water splashing.
- Compliant to the European Electromagnetic Compatibility Directive (EMCD).
- Two year warranty as standard.

Should NEVER be switched on without water.

1. 5L Compact heat pan

Compact and easy to transport, ideal for small splints.

- **Internal dimensions:**
Height 65 mm, Depth 300 mm, Width 325 mm
- **External dimensions:**
Height 135 mm, Depth 332 mm, Width 361 mm
- **Weight:** 4 kg
- **Capacity:** 5 liter
- **Characteristics:** single hinged lid, syphon drainage.

Reference	Product
091441773	See image 1

1

2. 9L Shallow heat pan

Compact, but extra wide design for bigger splints.

- **Internal dimensions:**
Height 65 mm, Length 500 mm, Width 300 mm
- **External dimensions:**
Height 135 mm, Length 535 mm, Width 332 mm
- **Weight:** 5 kg
- **Capacity:** 9 liter
- **Characteristics:** single hinged lid, syphon drainage.

Reference	Product
AA9413	See image 2

STEINEL HEAT GUNS

1. HL1620S

High-quality finish. With optimized center of gravity for one-handed work without getting hand fatigue. With integrated thermal protection to prevent overheating.

- **Temperature settings:** 300°C and 500°C
- **Airflow settings (2):** 240 l/min and 450 l/min

Suited for the following nozzles:

- **AA942608 (C)** Reflector nozzle
- **AA942609 (D)** Surface nozzle

Reference	Power
091555044	1600 Watt (EU-stekker)

2. HL1920E

High-quality finish. With optimized center of gravity for one-handed work without getting hand fatigue. With suspension loop.

Temperature settings: Generates a temperature of 80°C and 600°C that can be adjusted with the thumb wheel.

Airflow settings (2): 150 l/min, 150-300 l/min, 300-500 l/min

Suited for the following nozzles:

- **AA942605 (A)** Reduction nozzle
- **AA942606 (B)** Reduction nozzle
- **AA942608 (C)** Reflector nozzle
- **AA942609 (D)** Surface nozzle

Reference	Power
091555069	2000 Watt (EU-stekker)

3. Nozzles

The nozzles expand the capabilities of hot air guns for the fabrication and finishing of splints.

M40112520	20 cm
-----------	-------

2. Stainless Steel Straight Shears

High quality shears suitable for cutting tough materials. **Short sturdy blades, with long handles for leverage**. Robust and easy to clean. Ergonomic steel handles. German made, life time guarantee

Length 21 cm - Blade length 7,5 cm.

Reference	Dimensions
-----------	------------

M400000013	21 cm
------------	-------

3. Curved Mayo Scissors

Back in our assortment! Curved Mayo scissors with small curved knives for **trimming braces and splints as hardening begins**. Create cuts to the left or right. Made of stainless steel. Length 17 cm.

Reference	Dimensions
-----------	------------

CAT-617110	17 cm
------------	-------

4. Curved Shears

High quality shears suitable for cutting warm splinting material. **Short sturdy, curved blades**.

Length 20 cm - blade length 7 cm.

Reference	Dimensions
-----------	------------

M400000012	20 cm
------------	-------

5. Super Shears

Excellent for trimming splints evenly as hardening begins. Double plated chrome over nickel. Length 20 cm.

Reference	Dimensions
-----------	------------

A3715	20 cm
-------	-------

6. Short-Bladed Shears

Pointed, sturdy, short blades for detailed cutting across most materials. Ice-tempered stainless-steel blades. Large handles with rubber inlays, provide a secure, comfortable grip.

Length 20 cm - Blade length 8,5 cm

Reference	Dimensions
-----------	------------

M40773718	20 cm
-----------	-------

1. Heavy Duty Shears

Ideal for cutting cold plastics up to 3,2 mm thick. Self-opening, with short, sturdy blades hot forged for endurance.

Length 24 cm - Blade length 4,5 cm

Reference	Dimensions
-----------	------------

S-602040	24 cm
----------	-------

2. Fiskars™ Scissors

High-quality, ultra-light stainless-steel scissors ideal for cutting **heated, low-temperature thermoplastic material**. Leaves a **smooth edge** after cutting. Length 20 cm.

Reference	Dimensions	Model
-----------	------------	-------

727301	20 cm	Right handed
--------	-------	--------------

727302	20 cm	Left handed
--------	-------	-------------

3. Fiskars™ Non-Stick Scissors

Scissors cut through hook and loop, glue, tape and other adhesives without damaging the blades. Sticky material can be wiped off easily with damp cloth. The offset handles of large scissors increases cutting efficiency on flat surfaces.

The small version is ideal for arts, crafts, and cutting in small places.

Reference	Image	Dimensions

hand & wrist

1. Utility Knife

Well constructed, steel utility knife with **ergonomic shape** to aid cutting. Easy to replace blades.

Reference	Product
M400000004	Utility knife
M400000005	Spare blades (pack of 10)

2. ThermoFit Rolls

Thermoplastic material with foam coating, designed to be applied as a first aid for immobilization of the injuries to fingers and wrist.

Tape-based orthoses provide quick means for precise and tight-fitting modeling. Can be applied on the intact skin, or post-operatively.

The **ease of application** also facilitates post-traumatic/operation rehabilitation whereby the ease of re-application of the orthosis may support a progressive range of motion.

Micro-perforation - 0,8 mm thickness - peach color

Reference	Dimensions	Quantity
081075120	7,5 cm x 120 cm x 0,8 mm	Per roll
081010150	10 cm x 150 cm x 0,8 mm	Per roll
081030300	3 cm x 300 cm x 0,8 mm	Per roll
081050300	5 cm x 300 cm x 0,8 mm	Per roll

3. ThermoFit Strips

ThermoFit strips are perfectly suited for molding small splints (e.g., fingers, nose, etc.).

ThermoFit strips are thin, light and stable. They are micro-perforated for **improved air circulation**. They can be easily cut to size with scissors without preheating.

Double-sided foam coating on ThermoFit products is hypo-allergenic and prevents adhesion to body hair and bandages, it protects a patient's skin from macerations.

Micro-perforation - 0,8 mm and 1,6 mm thickness

Reference	Thickness	Colour	Quantity
72332	0,8 mm	skin	Pack of 20
72362	1,6 mm	skin	Pack of 20
72361	1,6 mm	skin	Pack of 10
72361A	1,6 mm	rainbow	Pack of 10

4. Splint Pattern Marker

For tracing patterns onto splinting and thermoplastic material. Marks stay on when immersed in water. Yellow in Colour.

Reference	Quantity
A37147	Pack of 12

5. Deluxe Revolving Hole Punch

With a **side spring that automatically adjusts tubes in position for punching**, the Deluxe Revolving Hole Punch is always positioned and ready for punching. For reliable service, the hole punch is made with steel.

- Total length: 22 cm
- Throat depth: 3,8 cm

Reference	Product
A4452	Hole Punch - Tubes included

6. Speedy Rivets

The nickel plated Speedy Rivets are used for **fastening straps onto an orthosis**. To make sure there are no internal projections of rivets, the cap can be set inside hand hammered until flush with the splinting material.

Reference	Size	Diameter	Length	Grip range
7767	S	6,4 mm	4 mm	3,2-4,7 mm
7768	M	4 mm	4,7 mm	4-5,5 mm
7769	L	4 mm	11 mm	4,7-6,0 mm
015602-400	XL			

7. Individual Units for Flexion and Extension

Typically ideal for one or two digits, the pre-bent outriggers can be placed on the fingers or over the metacarpals. For perfect positioning of MCP, PIP, or DIP joint in flexion or extension, each outrigger can hold one rod adjuster.

Kit includes each item

- Pre-bent outriggers (5)
- Rods (5)
- Rod adjusters (5)
- Tip protectors (5)
- 10 cm tension-adjustable finger loops (5)
- D-string straps (5)
- Allen key (1)

The rest of the splinting material, straps, and rubber bands are **not included** within the kit.

Reference	Product
A6012	Kit: 5 pieces of each part
553235	5 Pre-bent outriggers

8. Adjustable Outrigger Kit

For replacing the Rolyan Adjustable Outrigger.

Kit includes each item

- Rod adjusters (5)
- Extender rods (5)
- Five tip protectors (5)

Reference	Product
A6013	Kit: 5 pieces of each part

hand & wrist

1. Rolyan Wrap-on Finger Hooks

Alternative to gluing hooks directly onto fingernails.

Great for use with burn patient's and amputees as well as people with sensitive nail beds and general hand trauma.

Made of thin strapping material and lined with slip resistant material to help prevent migration.

Secure to fingertips with a hook strap. Adequately sized for large fingers; easy to trim to fit any size.

Reference	Quantity
A4283	Pack of 10

2. Tension Adjustable Finger Loops

Eliminate the need to tie the monofilament to the finger loops, saving you time.

To achieve the correct traction forces, the monofilament is slid through the connecting pieces. The finger loops are made from Ultrasuede material.

Reference	Dimensions	Quantity
A44410	76 mm	Pack of 10
A44411	102 mm	Pack of 10

3. Individual Line Guides

To make splinting easier, faster and more precise.

These durable accessories are compatible with Rolyan splinting material and are designed to be used by medical professionals.

Reference	Quantity
A1791	Pack of 10

4. Colour-coded Rubber Bands

Packs of 85g colour-coded rubber bands. No latex.
± 134 pieces per package.

Reference	Colour	Width
A3482	Yellow	3,2 mm
A3483	Red	6,4 mm
A3484	Green	9,5 mm
A3485	Blue	1,3 mm

5. Adjustable Outrigger Kit for extension

5

Designed for low profile dynamic splinting.

Outrigger comes in a complete kit and can be used with all low temperature splinting materials.

- Fully adjustable to accommodate extension of the MCP, PIP or DIP joints. Detachable rod adjusters allow individual positioning of fingers. Extender rods are secured in the rod adjusters to position the 10cm tension adjustable finger loops for the desired MCP, PIP or DIP extension.
- Convenient hook and D-Ring attachment provide ease of attachment and replacement of rubber bands or graded springs. Multiple finger kit fits most adult hands.
- Complete kit for several fingers, suited for most adult hands.

Splinting materials, straps and springs available separately.

Referentie	Quantity
A6011	Kit for several fingers

6. Adjustable Outrigger Kit for MCP Flexion

6

Provides ample space for four finger rod adjusters, yet does not limit thumb motion.

An optional thumb positioner can be applied to the vertical bar of the outrigger. Extender rods and rod adjusters are simple to apply and adjust

Kit includes each item

- Pre-bent outrigger wires (2)
- Rods (5)
- Rod adjusters (5)
- Tip protectors (5)
- 10 cm tension-adjustable finger loops (5)
- D-string strap (1)
- Complete fabrication instructions

Material for static base, rubber bands, and straps sold separately.

Referentie	Quantity
A8321	Kit for several fingers

 **Fitline**[®]
move - feel - live

The revolutionary FITLINE[®] product range covers a wide variety of orthopaedic applications.

All products are designed to obtain a maximum of comfort and help you to continue your productivity or maintain your normal lifestyle. FITLINE[®] is a product from the prominent Belgian company Moovartes.

hand & wrist

1. D-Ring™ Wrist Brace

The classic choice for treating the pain and discomfort of **carpal tunnel syndrome, arthritis, tendonitis** and other wrist disorders.

- A **non-elastic construction** that does not restrict circulation.
- Circumferential design holds the brace in position during application.
- **D-Ring closures** provide **tension control** to adjust the amount of support required.
- A double layer of **cotton stockinette** under closures cushions the straps and the forearm length is proportional to the brace size.
- Removable, adjustable **aluminium support bar**.
- Fabricated from a polyester / cotton fabric laminated to 1 cm foam.

Size: measure circumference of the wrist.

4. Prisma Stabil Plus

Extra stable wrist brace with innovative lacing system.

Indications

- After hand injuries or surgery
- Chronic pain
- Osteoarthritis
- Overuse problems

Features & Benefits

- Pre-bent, formable volar aluminum splint
- 2 removable dorsal aluminum splint
- 2 replaceable plastic splints are included for lighter support
- Ulnar splint pocket enable reinforced support
- Divisible strap enable adjustments for larger forearm
- Back elastic insert in proximal area of thigh

5. Vulkan® Neoprene Wrist Support 3014

Designed for light sprains, strains and rheumatism.

This support will help relieve swelling and provides compression and support.

Size: measure wrist circumference

Reference	Size	Wrist circumference
003889S	S	13 - 15 cm
003889M	M	15 - 19 cm
003889L	L	19 - 22 cm

6. Thermoskin Gloves

Thermoskin Thermal Compression Gloves are anatomically shaped to provide **warmth and even compression** for the temporary relief of **arthritic pain**.

A **textured inner layer** provides additional grip for everyday activities and finger tips cut out, allow a better sense of touch.

Sold in a pair.

Indications

Arthritic Pain Management:

- Pain, stiffness
- Inflammation and damage to joint cartilage and surrounding structures.
- Joint weakness and instability
- Visible deformities.

Trioxon Advantage

Exclusive **3 dimensional lining** that provides insulation and wicking of moisture via air circulation. This allows the skin to remain well oxygenated and comfortable for extended periods.

AA9297R	Right	Unversal

5

6. Palm Shield

Foam splint helps increase comfort for people who have **moderate to severe hand tightness** by separating and positioning the fingers and thumb. **Large thumb piece** provides excellent thumb positioning. One size fits most adults.

Per stuk.

Reference	Side	Size
A812401	Left	Universal
A812402	Right	Unversal

6

hand & wrist

1. Sof-Stretch™ Extension Splint

Dynamic force assists the PIP joint into extension with minimal extension of the MCP joint.

- The splint is ideal for PIP joint tightness, contractures, and boutonniere deformity.
- The plastic coated wires of the Rolyan Sof-Stretch Extension Splint simplify modification for finger size and fluctuations in edema.
- The angled distal pad applies pressure evenly, providing complete surface contact.
- “P” on proximal pad reminds patient to apply the splint with the P near the palm.

Size: measure from the MCP crease to the distal finger crease on the volar surface.

References Per Piece		References Packs of 5		Dimensions

2. Sof-Stretch™ Short Extension Splint

Provides dynamic force to assist the PIP into extension while allowing full motion of the MCP joint.

- Easily adjusts for finger width as plastic-coated wires accommodate finger size and fluctuations in edema. Ideal for PIP joint tightness and boutonniere deformity.
- Angled distal pad reduces pressure by providing complete surface contact on the middle phalanx, applying pressure evenly.
- The “P” on the proximal pad reminds the patient to apply the splint with the P near the palm.

Size: measure from the MCP crease to the distal finger crease on the volar surface.

Ref. white	Ref. black	Dimensions		Quantity

A99783	A99788	L	5,7 cm	
A99784	A99789	XL	7,0 cm	

3. Sof-Stretch™ Coil Extension Splint (Capener)

Coil springs placed laterally to the PIP joint move with the joint to help increase PIP extension.

Helps reduce tightness in the PIP joint and surrounding soft tissue from flexor tendon tightness, flexion contractures and boutonniere deformity.

- Best suited for contractures up to 45° that feel elastic when stretched.
- Contoured proximal and distal pads distribute pressure evenly.
- The splint doesn't move when moving the finger.

Size: measure from the MCP crease to the distal finger crease on the volar surface.

4. Sof-Stretch™ Long Coil Extension Splint

The coil springs of the Rolyan Sof-Stretch Long Coil Extension Splint assist PIP and DIP joints into full extension.

The splint is ideal for helping reduce tightness from flexor tendon and volar joint, and soft tissue tightness.

- Best suited for contractures up to 45° that feel elastic when stretched.
- Contoured proximal and distal pads distribute pressure evenly.
- The splint doesn't move when moving the finger.

Size: from distal palmar crease to middle of distal phalanx.

Reference	Size	Length	Quantity

hand & wrist

1. Aluminium Padded Splints

The Rolyan Aluminum Finger Splint has malleable aluminum finger strips that are padded with closed cell foam. Ideal for use in the immobilization of digits as a finger cast. The strips can be cut to size with heavy-duty scissors.

Reference	Size	Dimensions	Quantity
A8991	S	1,3 x 46 cm	Pack of 12
A8992	M	1,9 x 46 cm	Pack of 12
A8993	L	2,5 x 46 cm	Pack of 12

2. Toad Finger Splint

Foam-lined aluminium splint, easily contoured to maintain finger joints in position.

Size: Measure the immobilized part of the finger.

Reference	Size	Length	Quantity
S-FIT-63-004-U2	S	5,7 cm	Pack of 12
S-FIT-63-004-U3	M	7,6 cm	Pack of 12
S-FIT-63-004-U4	L	8,3 cm	Pack of 12

3. Baseball Padded Splint

Malleable aluminium splint for correct fitting and positioning.

Can be moulded to fit the desired amount of extension & hyperextension. No tape needed.

Size: Measure the immobilized part of the finger.

Reference	Size	Length	Quantity
S-FIT-63-001-U2	S	8,9 cm	Pack of 12
S-FIT-63-001-U3	M	10 cm	Pack of 12
S-FIT-63-001-U4	L	12,7 cm	Pack of 12

4. Stax Finger Splint

Supports the distal joint of the finger in extension while permitting unrestricted movement of the PIP.

The splint is normally used without padding and is fixed to the middle phalanx with a self-adhesive strap. Pack of 12.

Reference	Size	Length	Quantity

5. Finger Gutter Splint

Contoured finger splint provides a comfortable fit with firm, stable immobilization.

- Made of **Ezeform™** light splinting material, which can be adjusted easily to accommodate swollen digits.
- Useful for fractures, dislocations, ligamentous injuries, fingertip injuries and other soft tissue injuries.
- Self-adhesive straps sold separately.
- 2 straps required per splint.
- Individual packagings

Size: measure from the web to the tip of the finger.

6. Buddy Straps

Holds two fingers securely together with little bulk.

The fingers are strapped together by hook and loop material yet separated by a piece of soft strapping material.

Can be trimmed easily to accommodate any size finger. Length 127 mm. Width 13 mm.

Reference	Quantity
A3171	Pack of 5

7. Buddy Loop® 3PPT™

Comfortably holds fingers or toes together for protection following injury, eliminating the need for tape or uncomfortable hook and loop straps.

Lined with highly comfortable, non-slip material which is breathable and washable. One-piece design eliminates excess bulk between digits. Stays in place even during work and athletic activities. Latex free.

Oval-8® Splints

Strong and nearly invisible splints stabilise and align the DIP or PIP joint to enhance hand function. Moulded from 1.6 mm translucent plastic without seams.

- Can be used to correct lateral deviation, swan-neck deformity and flexible boutonniere deformity, support mallet finger injury, and help prevent trigger finger.
- 2 Oval-8 finger splints can be used to provide full immobilisation at the PIP or DIP for rest and control.
- Each Oval-8 splint fits a full size and, when rotated 180°, an additional half size, to accommodate fluctuations in oedema and temperature that can affect finger size.

1. Oval-8® Kit

This cost effective kit includes 44 Oval-8 finger splints (with the majority in the most common sizes of 5-10), carrying case, and instruction booklet.

Reference	Product
927279	Oval-8 Kit

2. Oval-8® Sizing Set

Includes one of each of the 14 sizes on an easy-to-open binder ring. Allows clinicians to use the actual splint to accurately and quickly size each client and then order the correct splint(s) to be issued. Instructions included.

Reference	Product
927280	Oval-8 Sizing set

3. Pediatric Oval-8® Kit

Contains three each of sizes 3 through to size 7.

Reference	Product
554584	Per kit

4. Oval-8® Individual Rings

Oval-8 finger splints in sizes 2 to 15.

1. Mobilis Rolyan Therapy Putty

Designed to meet a wide range of **strengthening needs**, putty can be squeezed, stretched, twisted or pinched. Clean, **non toxic, non-oily and bleedproof** therapy putty leaves no colour or residue on the client's hands. It will not fragment, separate or stick to the skin.

With **6 distinct colours** to reflect established standards in resistive exercise, and **progress in resistance** from super soft tan to extra firm grey. Combine any of the colours to create custom resistance to meet individual needs.

Warning: avoid contact with materials eg. fabric, paper. Latex free. Price depends on the weight.

2. Rolyan Putty Containers

Large quantities of putty can be bought and distributed to individuals this way, saving money.

These soft, plastic containers will not dent or break. They are easy-to-open and flat enough to fit in a pocket. The lid features a label where client and therapist details can be recorded.

Reference	Quantity
A32810	Pack of 10 (85 grams)

hand & wrist

1. Basic Hand Exerciser

Provides progressive resistive hand strengthening.

Lightweight frame uses clips to block flexion and extension and permits a custom fit for different hand sizes.

Includes 3 pairs of **graded, colour-coded rubber bands**, which can be changed to adjust resistance, and two clips.

Reference	Product
A3488	Full set
A3486	Pack of 4 spare clips

2. Ergonomic Hand Exerciser

The same hand exerciser as above but **with a padded handle** that fits comfortably in the palm of the hand.

Includes 3 pairs of **graded, colour-coded rubber bands**, which can be changed to adjust resistance, and two clips.

Reference	Product
A3481	Full set
A3486	Pack of 4 spare clips

Replacement rubber bands

Packs of 85g or ± 134 colour-coded rubber bands.
No latex.

Reference	Colour	Resistance
A3482	Yellow	X Light
A3483	Red	Light
A3484	Green	Medium
A3485	Blue	Heavy

3. Graded Pinch Exerciser

Designed for graded resistive exercise for **increasing pinch strength and co-ordination**. Features five graded springs in colour-coded pinchpins. Three metal rods of different diameters accommodate the various openings of each pinchpin.

Reference	Product
10-0840	Complete set with 50 pinchpins
10-0846	Set of 5 pinchpins excl. tub

Replacement pinchpins

Packs of five pinchpins.

4. Handmaster™ Plus

Provides complete reciprocal muscle group exercise for the hand through full, natural planes of motion.

It is recommended for improving strength, balance, coordination, speed, and general blood flow, stimulates all peripheral nerves to the hand and allows for unattended therapy.

Designed for daily outpatient use to complement the treatment of hand, wrist, and forearm conditions.

The Handmaster Plus is great for **stroke rehabilitation**, as well as the treatment and prevention of **carpal tunnel syndrome, tennis elbow and RSI**.

Each package contains one resistant ball, two flexible cords (for varying hand sizes) and complete instructions.

Reference	Colour	Indication	Resistance
929600	Purple	Early rehabilitation	Soft
929601	Red	Late rehabilitation	Medium
929602	Orange	Strength training	Firm

4

5. Gel Ball Hand Exerciser

Gel balls colour coded to provide variable resistance training for hands, fingers and forearms.

The balls are pleasant to touch and return back to their original shape after each squeeze.

Perfect for use in the clinic or at home.

Reference	Colour	Resistance
AA9800	Pink	Very soft
AA9801	Blue	Soft
AA9802	Green	Medium
AA9803	Orange	Firm

KINETEC Maestra™

THE HAND & WRIST CPM WITH THE MOST EXTENSIVE EXERCISES AVAILABLE ON THE MARKET.

The KINETEC MAESTRA™ is a complete solution for wrist, fingers and thumb passive rehabilitation. It is the most extensive CPM device on the market and fulfils most of the requirements in hand & wrist passive therapy.

Reference	Product
4621005002	Kinetec Maestra™

Ulnar deviation

Digital remote control

The digital remote control technology from KINETEC® has been featured in the device to provide a visual feedback to the patient as well as movement accuracy during therapy. The top panel is dedicated to each movement available with the unit.

Thumb Opposition

Interactive guide

The device is also delivered with an educational DVD guiding the user through the patient set up and therapy. This useful tool also provides tips and advice from health professionals on the pathologies and protocols to be covered by the device.

Technical specifications

- Possibility to block the adjustment of the parameters.
- Start/Stop and reverse are always available to the patient.
- Precise adjustment of the parameters of the movement: ROM, speed, pauses at the limit of extension or flexion, for improved outcomes.
- Internally contained medical grade transformer eliminates handling extra components.
- 2-year full warranty.
- Type BF class II electrical device.
- **Speed:** 150° to 440° per minute.
- **Weight:** 8 kg without the case.
- **Size of the device:**
Length 35 cm, width 41 cm, height 30 cm.
- **Patient size:** All hand sizes from 7 years.

HAND DYNAMOMETERS

For measuring hand and grip strength.

1. JAMAR® Hydraulic hand dynamometer

Ideal for routine screening of grip strength and initial and ongoing evaluation of clients with hand trauma and dysfunction.

Virtually leak proof hydraulics and isometric design ensure accurate, reproducible results and years of reliable service.

In today's health care environment, accurate and objective data is required for reimbursable rehabilitation service, making the JAMAR Hydraulic Hand Dynamometer an indispensable tool.

Built to last, a shock resistant rubber cap protects the stainless steel gauge and a wrist strap prevents accidental damage if dropped. The JAMAR Hydraulic Hand Dynamometer combines precision with convenient features:

- Dual scale readout displays isometric grip force from 0 to 90 kg
- Peak hold needle automatically retains the highest reading until reset
- Handle easily adjusts to five grip positions, from 35 to 87 mm, in 13 mm increments
- One year warranty. The warranty does not cover calibration.
- At minimum, an annual calibration and tune up is recommended to ensure long term accuracy of the unit.
- Includes: carrying/storage case and complete instructions.

Reference	Brand
5030J1	Jamar

2. Baseline® Hydraulic hand dynamometer

Used to assess hand grip strength.

Baseline and JAMAR dynamometer measurements are interchangeable, permitting use of previously collected data.

- Increase grip spacing using five positions, 35 to 87 mm
- Tests strength to 90 kg

Adult norms included. moulded hard-plastic case.

3 year warranty.

Reference	Brand
AA72910	Baseline

1

2

An annual calibration is recommended to ensure long term accuracy of the unit. Please contact customer service for full details of this service.

Precize testing of grip strength has never been so easy!

3. JAMAR® Plus+ Digital hand dynamometer

The Jamar Plus+ Digital Hand Dynamometer provides **improved accuracy** in measuring strength improvements and features an **easy-to-read display** for easier patient care. It gives PTs, OTs, and CHTs an easy way to track and document their patient's progress.

Advantages of Using a Digital Hand Dynamometer

If you already have a hydraulic hand dynamometer, you're probably wondering about the benefits of upgrading to a digital dynamometer. There are several benefits including more precise grip strength measurements. The Jamar digital hand dynamometer has **electronic load cells which increase accuracy** when measuring grip strength. The electric hand dynamometer also eliminates mathematical calculation errors by **automatically calculating statistics**, like average, standard deviation, and coefficient of variation, for you. Plus, without hydraulics, there is **no need to worry about leaking**. Upgrade your evaluation tools with the Jamar Plus+ Digital Hand Dynamometer.

Easier Clinician and Patient Use

This digital handheld dynamometer has a clear, **easy-to-read LCD display**. The **automatic calculations** save time so you can focus on your patients. Quickly measure changes as the result of your therapy and your patient's therapy putty work at home. Adjust the grip handle to one of **five different positions** to fit each user's hand. The Jamar digital hand grip dynamometer makes strength testing easy.

Referentie Features

091178458 Digital, does not work with tablet

4. JAMAR® SMART Digital hand dynamometer

The Jamar Smart can be used with the Jamar Smart App for a more detailed display of testing and results.

Download the Jamar® Smart app and use the Jamar® Smart hand dynamometer with your iPad tablet. This app allows you to display, store and track various results on your tablet. For boosted and improved patient evaluations.

For iPad Air, iPad Mini, original iPad version 3 or later versions. **2 year warranty**, does not cover calibration

Referentie Features

091556034 Digital, works with or without tablet

Measure grip strength with your tablet!

The free app allows users to

- Calculate the average, standard deviation and coefficient of variation
- Adjust the number of reps from 1 to 5
- Decide which hand and position to test
- Contrast results to averages

The fully featured app allows more features:

- The ability to save and redo tests with the same parameters
- Save patient profiles
- Graph results
- Save results as PDFs
- Perform 5 position grip, sustained grip
- Rapid exchange tests

hand & wrist

1. JAMAR® Smedley hand dynamometer

Spin handle increases or decreases grip width as needed. Scale dial remains at the maximum reading.

Calibrated to 100kg.

Includes instructions, norms and Client Record Charts.

Comes in an attractive storage/carrying case. Latex free.

Reference	Product
AA964901	See image 1

1

2. Baseline® Pneumatic hand dynamometer

For measuring hand strength, even where grasping power has been severely impaired or other disabilities inhibit gripping effort.

It is lightweight and should be used when accuracy and repeatability are required.

Maximum reading remains until reset. The smallest bulb may be used for children and to test pinching function of intrinsic muscles.

Scale is calibrated in an international unit of energy (bars).

Includes carrying case with instructions.

Bulb contains natural rubber latex.

Reference	Product
AA96001	See image 2

2

HAND EVALUATION KITS

Everything you need for hand & finger strength measuring included in one convenient set.

3. Baseline® 7-Piece hand evaluation kit

Complete kit of 7 instruments necessary to measure hand strength and range of motion.

The kit includes one:

- Hydraulic hand dynamometer AA72910
- 13,6 kg finger pinch gauge 7486
- 15 cm stainless steel goniometer
- 2-point discriminator with 3rd point
- Wartenburg pinwheel
- Finger circumference gauge
- Functional finger motion gauge

Comes in an attractive storage/carrying case.

AA72910 has 3 year warranty, does not cover calibration. All the other components have 1 year warranty.

Reference	Product
A44140	See image 3

3

4. JAMAR® hand evaluation kit

For easy ROM-measurement of the metacarpal, phalangeal and interphalangeal joint.

This set includes:

- JAMAR Hydraulic hand dynamometer 5030J1
- JAMAR Hydraulic pinch gauge 749805
- JAMAR 140 mm metal finger goniometer

Comes in an attractive storage/carrying case.

Reference	Product
5030KIT	See image 3

4

5. JAMAR® hand evaluation kit II

Reliable and accurate dynamometer that features a dual scale readout and displays isometric force from 0 - 90 kg.

The **Jamar Pinch Gauge** is designed to measure isometric tip, key, and palmar pinch strength in pounds and kilograms.

Deluxe Small Joint Goniometer features linear inch and centimeter markings on both sides of the protractor in opposite directions, with measurements from 0° to 150° in 5° increments.

The kit includes one:

- JAMAR Hydraulic hand dynamometer 5030J1
- JAMAR Finger pinch gauge of choice: 13,6 kg (091546977), 20,4 kg (091547009) or 27 kg (091546985)
- JAMAR Deluxe Goniometer for small joints

Comes in an attractive storage/carrying case.

Reference	Included pinch gauge
091555119	0 - 13,6 kg
091555135	0 - 20,4 kg
091555143	0 - 27 kg

5

6. JAMAR® Plus+ hand evaluation kit

With de JAMAR® Plus+ digital dynamometer which has a clear, **easy-to-read LCD display**. The **automatic calculations** save time so you can focus on your patients.

This set includes:

- JAMAR Plus+ Digital hand dynamometer 091178458
- JAMAR Digital pinch gauge 091536754
- JAMAR 150 mm metal finger goniometer

Comes in an attractive storage/carrying case.

hand & wrist

FINGER PINCH GAUGES

For measuring finger pinch strength.

1. JAMAR® Hydraulic Pinch Gauge

Unlike other traditional pinch gauges, this one has a **unique design that frees the client to perform a true pinch pattern because the therapist, not the client, supports the weight of the gauge.**

This results in a very accurate measuring of pinch strength. Dual scale readout measures in both pounds and kilograms, up to 20 kg, with a peak hold needle that retains highest reading until reset.

Instructions and storage/carrying case included.

1 year warranty, does not cover calibration.

Reference	Product
749805	See image 1

2. JAMAR® Digital Pinch Gauge

The Jamar Digital Pinch Gauge has an **easy-to-read LCD display** and features an **electronic zero calibration system.** The push-button console includes a button to zero the last reading stored in memory and two toggle buttons used to accurately **store up to 99 readings.**

Handy wrist strap included
1 year warranty, does not cover calibration.

Reference	Product
091536754	See image 2

3. JAMAR® Pinch Gauges

Measures force in pounds and kilograms, and is used for isometric tip, key, and palmar pinch strength evaluation. The red pointer stays at the highest achieved force after the tool has been squeezed to measure maximum pinch capabilities.

Reference	Force
091546977	0 - 13,6 kg
091547009	0 - 20,4 kg
091546985	0 - 27 kg

4. Baseline® Pinch Gauges

The Pinch Gauge by Baseline® is a precision instrument that is designed to record isometric lateral, chuck or tip pinch in pounds and kilograms. The red pointer stops at the maximum pinch recorded for the highest degree of accuracy, and is designed for medical professionals.

Comes in an attractive storage/carrying case.

3 year warranty, does not cover calibration.

Reference	Force
7486	0 - 13,6 kg
7485	0 - 27 kg

DISCRIMINATORS

1. Baseline® Discrim-A-Gon™

Discrim-A-Gon 2-point discrimination set includes two discrimination octagons (wheels).

Each octagon measures a different range of 8 labeled, fixed 2-point intervals ranging from 1 mm to 25 mm.

The easy-to-use, lightweight plastic wheel is the perfect sensory evaluation tool to test static and dynamic 1 and 2-point discrimination.

Reference	Product
091182997	See image 1

2. Baseline® 2- and 3-point Discriminator

Evaluate cutaneous sensitivity and touch threshold. Plastic points minimize influence of temperature.

Two point discriminator with third point permits alternating between single and double point stimulation without changing setting.

Measures up to 14 centimeter discrimination

Reference	Product
AA9661	Two point
AA9662	Three point

MONOFILAMENTS

Monofilaments are used to measure skin sensitivity and determine peripheral nerve involvement.

3. Baseline® Tactile Monofilaments

The Baseline tactile monofilament evaluator is used to measure cutaneous sensory perception threshold.

Each monofilament represents a unique amount of force and has a fitted protective case enables safe storage and transport.

5-piece Set of hand monofilaments:
2.83, 3.61, 4.31, 4.56, 6.65 gram

Reference	Product
12-1662	See image 3

4. WEST™ Monofilaments

Weinstein Enhanced Sensory Test (WEST) offers an improved version of the Semmes-Weinstein monofilaments.

Monofilaments are used to measure skin sensitivity and determine peripheral nerve involvement.

WEST monofilaments provide reliable test results with textured, round monofilament tips.

METAL GONIOMETERS

1. Baseline® Metal 'Robinson' Goniometer 15 cm

A goniometer measures range-of-motion (ROM) of various joints. Tension between the arms is controlled by the thumb knob.

- Length: 15 cm
- Schale: 180°
- Increments: per 5°

Reference	Product
12-1042	See image 3

2. Baseline® Metal Goniometer 20 cm

- Length: 20 cm
- Schale: 180°
- Increments: per 1°

Reference	Product
12-1040	See image 4

3. Baseline® Metal 'Conzett' Goniometer 35 cm

- Length: 35 cm
- Schale: 180°
- Increments: per 1°

Reference	Product
12-1041	See image 5

4. Baseline® Metal Goniometer 35 cm - 360°

- Length: 35 cm
- Schale: 360°
- Increments: per 1°

Reference	Product
12-1050	See image 6

5. Baseline® Metal Goniometer Set

Set of **6 Baseline goniometers** includes the following metal goniometers:

- 12-1042: Goniometer 'Robinson' 15 cm - 180°
- 12-1041: Goniometer 'Conzett' 35 cm - 180°
- 12-1050: Goniometer 35 cm - 360°
- 12-1040: Goniometer 20 cm - 180°
- 12-1014: Finger goniometer 15 cm
- 12-1031: X-Ray goniometer 20 cm - 180°

All 6 instruments are in a protective carry case.

FINGER GONIOMETERS

6. Baseline® Finger Goniometer

A finger goniometer measures **range-of-motion (ROM) of finger joints** (metacarpophalangeal and interphalangeal) and other small joints including toes.

- Length: 15 cm
- Head with opposing scales: 180° - 30°
- Increments: per 5°

Reference	Product
12-1010	See image 6

6

7. Baseline® Finger Goniometer - 1 finger design

Unique design allows measurements to be taken by the therapist **using only one hand**; this frees up the therapist's other hand to stabilize the patient during measurement or to record the measurement.

- Length: 15 cm
- 110° flexion - 40° hyperextension
- Increments: per 5°

DIGITAL GONIOMETERS

8. Baseline® Digital Plastic Goniometer 25 cm

This plastic goniometer permits observation of a joint's axis of motion and its range of motion.

The 360 degree head permits reversible readings, allowing for the device to be flipped so the display is read more easily.

The digital display reads continuously as arms are adjusted. This is an essential tool for treatment, rehab and surgical recovery and evaluation.

This goniometer lets you measure joint limits and range-of-motion as well as check extension, flexion, abduction, adduction and rotation.

The arms have a linear scale in both inches and centimeters. **They also will remain at the last measurement position until reset.**

The plastic of the goniometer allows the device to be placed directly on a joint or limb for easy observation.

- Length: 25 cm
- Schale: 360°
- Increments: per 0,5°

Reference	Product
12-1049	See image 8

PEG TESTS

1. Jamar® 9-Hole Peg Test

This hand testing kit is easy to understand for patients and gives accurate feedback for practitioners.

It is designed to test and develop an individual's **fine motor skills** or help diagnose **neurocognitive disorders**. This is accomplished with timed hand-eye coordination tests that gauge hand dexterity and control.

Includes the peg board, 9 pegs, and a stopwatch.

Reference	Product
A8515	Full kit
A8516	Spare pegs (per 9)
A8423	Spare stopwatch

2. Jamar® Grooved Peg Board

More challenging and requires **more complete visual motor coordination** than most pegboards. This model contains holes with randomly positioned slots. The pegs must be rotated before they can be inserted.

Includes the peg board and grooved pegs.

Reference	Product
7446	Full kit
A9685	Spare pegs (per 30)

3. Jamar® Pegboard Test

Provides **both gross and fine motor skill tests**. Can be used to test arms, hands, fingers, and wrists. Great addition to any physical therapy center or clinical setting.

Includes 55 pins, 45 washers, 25 collars, 25 record blanks, Quick Reference Guide, normative data, instruction manual.

Reference	Product
A9291	Full kit

4. Jamar® Tweezers Dexterity Test

Pins have to be placed in holes using tweezers. Specialised test requires using tweezers to place pins in holes. Requires precision, steadiness and a high degree of hand/eye coordination.

Includes tweezers, 100 pins and manual with norms.

Reference	Product
7521	Full kit

5. Jamar® Wooden 9-Hole Peg Test

The Jamar 9-Hole Pegboard is ideal for motor coordination and evaluations. The wooden pegboard helps with **finger dexterity exercises**. With 2 two side slots for storage.

Includes tweezers, 100 pins and manual with norms.

Reference	Product
5309	Full kit
927037	Spare pegs (per 9)

hand & wrist

1. Rolyan Horizontal Ring Tree

Horizontal Ring Tree features three height-adjustable horizontal bars on which to place the sliding rings. The rings assist in graded coordination tasks to improve **cognitive motor skills** and **perceptual motor skills**.

Ideal for use by individuals in need of upper extremity rehabilitation, including those with **neurological disorders**, burns, and **orthopedic issues**.

Includes 36 plastic rings (12 with 3, 4 and 5 cm diameters)

Reference	Dimensions
A4055	72,4 cm length

2. Rolyan Vertical Ring Tree

Vertical Ring Tree allows users to place rings on different diameter rods. The ring tree can help increase **ROM** (range of motion), **hand/eye coordination**, **endurance**, **sequencing**, and **manipulation**. The set can easily be disassembled and stored in the base.

Includes 6 rods and 12 rings per rod

Reference	Dimensions
A4142	55 x 37 x 4 cm base

3. Rolyan Climbing Board and Bar

The Rolyan Climbing Board assists in rehabilitation of the shoulders and arms. The horizontal bar can be guided to the top of the board to improve range of motion and upper extremity endurance. Padded handle grips on the bar allow for easier grasp and greater comfort. Two drilled holes in the base allow for permanent attachment to an exercise table.

Reference	Dimensions
A3591	See image 3

4. Incline Board

Designed for **upper extremity progressive resistance exercise**, the incline board can be used to test shoulder strength and range of motion. The board allows for **bilateral** and **unilateral use** and can be positioned at various angles, from flat to 45°. Ideal for shoulder and arm rehabilitation after surgery or injury.

Reference	Dimensions
A4101	79 x 21,5 cm with 61 cm base

5. E-Z Exer-Board

Provides resistive finger flexion, extension and lateral prehension, forearm supination and pronation, and wrist flexion and extension. Use 2.5cm hook strip and small object for increased resistive motion. Suction-cup base provides stability during exercise. Easy to use for home exercise programmes.

Reference	Dimensions
A7251	See image 5

1. Rolyan Pronation/Supination Wheel

Shoulder rehabilitation device allows for pronation and supination exercises and features a **non-slip rubber exterior** for smooth, stable motions.

The wheel allows for targeted training of the **pronator teres and pronator quadratus** during injury and surgery recovery.

A comfortable middle handle accommodates any hand size and can be used with a flexion glove when necessary.

Reference	Dimensions
A4141	See image 1

2. Jux-A-Cisor Arm Exerciser

This exercise game will challenge its user's ability to **mobilize his/her upper extremities** as well as improve stamina and promote **joint strengthening**.

Simply manipulate the white circular disk around the bends in the wire. Its basic, straightforward design is excellent for someone who is attempting to **regain their motor skills** after suffering a **stroke** or sustaining a **brain injury**.

Plastic-coated, tempered-steel wire has 25 different twists and turns that will test its user's upper extremity strength and range of motion.

Reference	Dimensions
5288	32 cm height

3. Small textured Stacking Cones

These Plastic Stacking Cones are designed to be used to increase infant's and children's **tactile stimulation skills**. This product is made of a safe, textured cone that provides a **non-slip grip**. Each set includes 30 cones and includes 6 colors. The cones are washable for multiple uses and are excellent for therapy or at school use.

Reference	Length	Top Circum.	Base Circum.
5153	18 cm	9,5 cm	15 cm

4. Roeder Manipulative Aptitude Test

For arm and hand rehabilitation or pre-employment assessments, the test measures the **speed and dexterity in hand and finger movements**.

The movements include twisting and thrusting one's arm, hands, or fingers. The test is a durable plastic board with 4 receptacles for washers, rods, caps, and nuts. For special tests, a T-bar is included.

Includes T-bar, manual, norms, record, rods, rings.

Reference	Dimensions
A8982	53 x 30 x 5 cm

A woman with her hair in a ponytail, wearing a white tank top and grey shorts, is shown in profile from the waist down. She is wearing a silver and black knee brace on her right knee. Her right hand is raised in a gesture. She is wearing black sneakers with white socks.

 **Fitline**[®]

Knee braces

1. LigaFit

Polycentric physioglide hinges based on the principle of 4-chain linkage.

Low profile, lightweight frame and hinge construction. Numbered straps ensure a simple and correct fastening of the brace. Air supracondyle pad minimises migration.

New soft-grip padding material gives excellent comfort.

Indications

Conservative pre- and postoperative treatment of knee instabilities.

ACL, PCL or CI injuries and ruptured colateral ligaments.

Features & benefits

- Extension stops: 0°, 10°, 20°, 30° and 45°
- Flexion stops: 0°, 10°, 20°, 30°, 45°, 60°, 75°, 90° & 120°
- Immobilisation at: 0°, 10°, 20°, 30° & 45°
- Anatomically pre-moulded frame
- Malleable aluminium frame allows correct patient fitting
- Straps are numbered for easy application
- Polycentric hinge and 4-chain linkage system
- Prevents anterior and posterior tibial translation: 4-point system
- Low profile, lightweight

Size: measure circumference 15 cm above the mid-patella.

2. ArtroFit

To support moderate to severe levels of osteoarthritis.

Indications

- Conservative treatment of advanced unilateral osteoarthritis
- Post-operative pressure relief & compartmental protection
- Instability of the cruciate ligaments
- Functional pre- or post-operative care of knee instabilities

Features & benefits

- Extension stops: 0°, 10°, 20°, 30° and 45°
- Flexion stops: 0°, 10°, 20°, 30°, 45°, 60°, 75°, 90° and 120°
- Immobilisation at: 0°, 10°, 20°, 30° and 45°
- High quality, 100% aluminium frame
- Pressure relief of the medial or lateral hinge compartment by the 3-point principle which off-loads the knee into varus or valgus position between 5-15°

3. Fitline ROM knee brace

Knee brace with control of Range of Movement.

Indications

Pre- and post-operative immobilisation.

Features & benefits

- Controlled range of motion possible
- Also provides collateral stability
- Extension stops: 0°, 10°, 20°, 30°
- Flexion stops: 0°, 10°, 20°, 30°, 45°, 60°, 75°, 90°, 105° & 120°
- Immobilisation at: 0°, 10°, 20°, 30°

4. Functional Knee Brace Telescopic

Functional ROM knee brace with telescoping system

Indications

Conservative treatment for:

- Stable thigh condyle fractures
- Tibial PLATEAU fractures

Post-operative treatment for:

- ACL, PCL, MCL, LCL injuries
- Condylar fractures
- Patella tendon injuries

Features & benefits

- Easy to use functional knee brace with a ROM mechanism
- Fits all sizes
- Thigh and Calf pads for better fit and comfort
- Velcro straps for better support and stability of the brace
- Telescopic hinged mechanism allows for length adjustability of 45 – 60 cm
- Goniometer allowing for extension range of 0° - 90° and a flexion range of 0° - 120°
- Quick lock system at 0°, 20°, 40°
- Removable nonslip pads

Reference	Size
MB9020	Universal

1. FitLine Knee Brace

Indications

Injuries of the collateral ligaments
Mild instabilities of the cruciate ligaments and meniscal injuries

Features & benefits

- Compact functional soft brace, made of breathable material
- Extension stops: 0°, 10°, 20°, 30° and 45°
- Flexion stops: 0°, 10°, 20°, 30°, 45°, 60°, 75°, 90° and 120°
- Immobilisation at: 0°, 10°, 20°, 30° and 45°
- Wrap-around system with popliteal cut out
- Ideal for contact sports due to integrated adjustable hinges
- Fits left and right

2. Pluspoint 4

Pluspoint 4 is a light, functional knee brace with a thin polycentric joint which works according to the **4-point support principle**.

It provides effective relief and complete, natural stabilisation of the knee joint. The **ergonomic construction**, and the use of an ultra-light aluminium alloy all ensure stability.

Both flexion and extension can be set gradually in multiple stages. This makes Pluspoint 4 ideal for post-operative rehabilitation, support of conservative therapy as well as for use in sports.

Length: 40 cm.

Size: measure circumference 15 cm above the mid-patella.

4. GenuSkill 16

Indications

- Lateral-medial instability of the patella
- Femoro-patellar arthrosis
- Gonarthrosis

Features & benefits

- CompresSkill, the stretchy multi-fibre yarn for compression
- BreathSkill, the 3D fabric with a woven mesh covering
- Patella alignment system: lateral J-shaped foam support and pressure for the kneecap with hook-and-loop straps (adjustable)
- Lateral and medial stabilising stays

Size: Measure circumference 15 cm above the mid-patella.

5. Genufit 27A

Knee Brace in AirX™ fabric with polycentric hinged bars and F-E control.

Indications

- Functional treatment of sprain injuries grade I and II of the collateral medial/lateral ligament
- Prevention of relapsing MCL and LCL sprains during sports activities
- Chronic latero-medial instability
- Femoro-patellar arthrosis
- Arthritic instability (inoperable knee)

Features & benefits

- Anatomical design adjusts to the joint, allowing flexible movement
- Breathable, skin-friendly AirX™ fabric and Velcro® straps
- Soft elastic border and seamless popliteal insert made of Soft-X fabric
- Patella opening with foam stabiliser
- Polycentric hinge which can be easily adjusted externally using pins
- Extension, flexion & immobilisation at: 0°, 15°, 30°, 60°, 90°

Size: Measure circumference 15 cm above the mid-patella.

2. Aspen OA Knee Wrap

This premium brace is ideal for patients with mild-to-moderate Osteoarthritis.

The low profile, universal design allows for less inventory and better patient compliance.

The OA Knee Wrap takes a dual approach to managing symptoms of Osteoarthritis with its two point hinge adjustment for even pressure distribution and its comfortable wrap design that delivers all-around compression to help decrease symptoms of pain and inflammation.

With non-slip pads.

3. Aspen CI Knee

The Aspen CI Knee Orthosis was developed to treat different types of instabilities (e.g. cruciate ligament and meniscus injuries).

It improves the patient's selfconfidence during increased mobility demands.

The double strut construction helps to maintain knee stability, while flexion / extension limits can be easily adjusted at the joint to control the range of motion.

Remote Control

Range of motion

From -10° to 120° of flexion.

The KINETEC SPECTRA™ range of motion allows treatment of most knee & hip pathologies. Anatomically correct alignment increases patient compliance and decreases joint stress.

Patient feedback & unique features

The digital remote control provides a precise yet clear feedback to the patient as well as helping the therapy with unique functions such as warm-up or by-pass.

Technical specifications

- Patient lock-out prevents accidental program changes and potential injury.
- Start/Stop and reverse are always available to the patient.
- Internally contained medical grade transformer eliminates handling extra components.
- 2-year full warranty.
- Type BF class II electrical device.
- **ROM knee:** -10° to 120°, **Hip:** 75° to 10°.
- **Foot positioning:** Plantar flexion: 40°, Dorsal flexion : 30°, Abduction/adduction: 30°
- **Speed:** 45° to 155° per minute.
- **Weight:** 12 kg without the case.
- **Size of the device:**
Length 95cm, width 33cm, height 33cm.
- **Patient size:** Full patient: 145 to 195 cm, User weight: 135 kg

POST-OPERATIVE SHOES

Different injuries and surgical procedures often require specific footwear. Think of Plantar fasciitis, Achilles tendonitis and Osteotomies.

Our shoes from the post-operative line are specifically designed for post-operative use. The wide design allows a proper fit with a cast or bandage.

Several models available with a flat sole or off-load sole for forefoot pressure relief. All shoes have comfortable padding and durable straps.

1. Fitline F.P.R. Shoe

For Forefoot Pressure Relief.

Indications

Minimizes pain and discomfort of plantar fasciitis and Achilles tendonitis.

Features & benefits

- Soft padded material on the inside
- Fits left and right

Sold per piece.

ankle & foot

TECNICA DIABETIC SHOE LINE

It is one of the complications in patients with diabetes.

It consists of the progressive loss of sensitivity of the foot, which presents ulcers and skin alterations that must be kept under control.

If they don't heal, they can progress to foot muscle atrophy or a very serious infection that sometimes leads to amputation of the limb. The causes are found in the classic effects of diabetes itself, namely the narrowing of the arteries.

These are no longer able to supply blood to the lower limbs which therefore find themselves having a very reduced sensitivity and therefore being subject to the cold and to traumas or wounds that find it difficult to heal.

1. Plantare S-Cloud

The innovative S-Cloud insole allows to remove little squares in the lower part of the entire insole surface thanks to the pre-incision of the 6 mm Evaform.

The orthopedic technician will identify the squares to be removed in order to off-load immediately the pressures on the ulcerated area or at risk of ulceration, allowing to create a precise zone of unloading of the necessary size in a precise point.

The 3 mm self-modeling memory foam inside the insole, reduces the forces of the edges of the unloading area on the plantar area, distributing thus the body weight over a wider surface avoiding in this way pressure peaks.

Features & benefits

- The On-Steam coverage is breathable, antibacterial, antimicrobial, anti-odor and hypoallergic
- 3 mm self-shaping memory foam
- Modular inserts in Evaform with dimensions
- 10 mm x 10 mm, thickness 6 mm
- Adhesive base in fiber to stabilize the Evaform modules
- Washable by hand, maximum 30 degrees
- Available in version for Biomed shoe and DIAB shoe

Sold per piece

2. Tecnica Biomed

Indications

- Post-operative treatment of **hallux valgus** (minimal-invasive protocol).
- Protection of **bone structures** and **surrounding tissues** of the forefoot.
- Post-operative treatment after a **Morton's neuroma**.
- **Swelling and injury of the forefoot** that make wearing a shoe impossible.
- **Protection and support** of the foot, the toes and the forefoot in an adequate position for rehabilitation.

Features & benefits

Lightweight shoe with an **ergonomic and wide fit**. Made to be easily worn with a cast or bandage. Highly adjustable thanks to the velcro strap.

Ambidextrous design: can be worn left and right. **Sold per shoe.**

3. Tecnica Heel

Indications

- Post-surgery rehabilitation and/or wounds or ulcers of the heel area
- Post-surgery fractures and/or calcaneus ulcers (second treatment) and ulcers at the insertion of the Achilles tendon
- Bursitis

Features & benefits

The balance of the weight is moved to the front of the foot thanks to the **unloading insole** and the outsole, which is designed to totally release the heel from the pressure load. The square shape offers space for bandages. **Movable rear-cover** to preserve the heel from impacts. **Non-slip outsole** to ensure safety. Total opening with velcro-straps. Removable insole. **Sold per shoe.**

4. Tecnica DIAB

Indications

- (Diabetic) plantar ulcer
- Post-amputation rehabilitation (up to trans-metatarsal amputation)
- Post-operative rehabilitation or fractures of the tarsus
- Management of the chronic phase of Charcot's foot
- Malleolus fracture

Features & benefits

High and **lightweight** leg-foot brace allows the displacement of part of the load on the ankles and calves. The outsole, thanks to the features of **movement control** and **pressure redistribution** decompresses the areas affected by the injury, improving significantly the ambulation.

The **difference in leg length remains limited** in comparison to other walking boots. High thermoformable stiffener. **Rigid, anti-flexion and rocking outsole.** **D-rings** for good closure. Variable volume. **Sold per shoe.**

ankle & foot

TECNICA REHABILITATION SHOE LINE

The Rehabilitation line has been designed for the treatment of the majority of foot pathologies and unifies the comfort and softness of a slipper with the stability and resistance of a shoe.

This line of footwear is mainly used to better walking of the elderly and of people who suffer from rheumatism.

They are also indicated as post-surgery and rehabilitation footwear.

The non-slip outsole, with its wide shape, is made of a shock-absorbing compound that, combined with the thermoformable and firm heel, guarantee a safer walking.

The breathable upper is made with materials which wrap the forefoot and allow to accommodate deformities or bandages without pain.

The velcro-closure and the upper with its total opening, allow those with articular mobility problems, to wear the shoe easily and comfortably, adjusting the Velcro-closure in the most optimal way. All shoes are washable by hand at maximum 30 degrees.

1. Tecnica Technique 11

Indications

- Metatarsalgias
- Vasculopathies
- Rheumatic foot

Features & benefits

The TECHNICAL 11 shoe is indicated in the post-operative phases and in the presence of wounds they **can be used with the foot bandaged** during long healing periods to allow the reduction of the load on the foot while walking.

Very stable footwear thanks to the **thermoformable buttress** and **light** at the same time.

The **open toe** makes them particularly suitable for deformities in the forefoot area. Microfiber upper

Sold per pair.

sorbothane®

Performance Insoles

MEDICAL PROFESSIONALS RECOMMEND SORBOTHANE.

Sorbothane insoles can help limit the trauma caused to a body during exercise, such as back problems, joint pain, tendonitis, fatigue fractures and knee pain. They help prevent and re-occurrence of old injuries and offer unrivalled comfort.

Shockwaves are created every time your feet strike the ground, causing damage to joints, muscles, ligaments and tendons.

Sorbothane's unique visco-elastic material mimics the characteristics of human flesh, and at the moment of impact changes shape to disperse shockwaves sideways.

- Unrivalled shock absorption
- 100% effective with every stride
- Up to 30% lighter
- Nano silver antibacterial technology for maximum comfort
- New cutting edge pack design

SORBOTHANE SHOCK STOPPER

- Anti-bacterial
- Suitable for all sports footwear
- Trim to fit lines
- Sold as a pair

1. Single Strike Shock Stopper

Ideally suited for **low shock** absorption sport & activities.

Ideal for activities where the heel is subjected to impact shock.

Replaces existing insole.

Indications

Ideally suited for maximum shock absorption sport & activities

Features & benefits

- Pronation control insoles with Sorbothane shock impact protection
- Suitable for all sports footwear
- Replaces existing insole
- Trim to fit lines
- Anti-bacterial

Sorbothane Reactor Pads

Highly-responsive, technical forefoot compound inlaid to compliment your foot's natural energy return during 'toe-off'.

Sorbothane Impact Protection

Sorbothane's unique shock absorbent compound contains a unique molecular structure that gives sustained cushioning with impact protection and unrivalled comfort.

Sorbothane Biofit Technology

Foot-related pain can affect the way you run, walk and stand, which can often lead to pain in your ankles, knees, hips and back. When your foundation is correctly supported, aligned and cushioned, it starts a chain reaction of pain relief throughout your entire body. Sorbo-Pro's carefully crafted insole geometry is central to achieving its biomechanical aim. The insole holds the heel in position after the foot hits the ground and the stabilising arc cradles the bones of the arch of the foot to reduce excessive foot pronation.

Sorbothane Total Control Topsheet

Sorbothane's total control anti-bacterial top system contains advanced nano silver technology to wick away moisture and provide maximum comfort.

Sold as a pair.

2. Elbow and Heel Protectors Rolyan

2

Cushioned heel and elbow protectors with a foam or gel padding which can be used in hospitals, nursing homes and extended care facilities.

Comfortable, **stretchable stocking** is proportionately knitted for a close fit.

Helps protect the joint by **diffusing and distributing pressure**.

May be used following a sudden injury or trauma to the elbow or heel, or simply to protect the joint as it rests against the surface.

- Medication can be applied to pad when needed.
- Pad is removable for washing.

Sold in pairs.

3. Gel Heel and Elbow Protectors

3

A. Deluxe Gel Heel and Elbow Protectors

Designed to improve comfort and help reduce shearing and friction on the heel or elbow.

Features a **removable gel pack** and a **plush terry loop** material which is soft on the skin.

B. Regular Gel Heel and Elbow Protectors

The 3 mm thick **polyurethane pad** is held in place by a stretchable, soft terry loop material inside with a flat knit on the outside.

The foam pad is tacked to the material to prevent slippage, yet allows the user to move the joint without a shearing effect.

Sold in pairs.

Size: Measure limb circumference.

KINETEC Breva™

THE KINETEC BREVA™ PROVIDES ANATOMICALLY CORRECT MOVEMENTS FOR THE ANKLE AND REAR FOOT.

- Plantar Flexion 40° to Dorsiflexion 30°
- Eversion 25° to Inversion 25°
- Intuitive remote control with unique features

Reference	Product
4621006502	Kinetec Breva™

Inversion 25°

Eversion 25°

Anatomical and precise motion

The KINETEC BREVA™ enables ankle and rear foot motion in 2 dimensions from the most common plantar/dorsi flexion (-40° to 30°) to the more advanced eversion/inversion movement. (-25° to 25°).

Patient feedback and unique features

The digital remote control provides a precise yet clear feedback to the patient as well as it helps the therapy with unique functions such as warm-up or by-pass.

Safety First

The remote control features a keyboard locking system preventing misuse and enhancing patient safety.

Technical specifications

- Remote control dedicated storage place when the machine is not used or during transport.
- Possibility to block the adjustment of the parameters.
- Start/Stop and reverse are always available to the patient.
- Precise adjustment of the parameters of the movement: ROM, speed, pauses at the limit of extension or flexion, for improved outcomes.
- Load reverse ensures patient protection when excessive force is exerted on the joint.
- Supplied with washable hygienic pads.
- 2-year full warranty.
- Type BF class II electrical device.
- **Speed:** 50° to 150° per minute.
- **Weight:** 11 kg without the case.
- **Size of the device:**
Length 56 cm, width 37cm, height 45cm.
- **Foot sizing:** from 19 cm(7 Inch) to 29 cm (11 Inch)
