

OSF10-I0W

Brand Features

Leviton's OSF10, Integral Occupancy Sensor, is designed to be mounted directly into a luminaire. The OSF10 offers a sensor and relay in one device. The wiring and housing of the sensor is installed adjacent to the ballast and hidden from view behind the reflector cover. Only the PIR detector dome lens and locking ring are visible on the exterior of the fixture.

Item Description

Fixture Mount Integral Luminaire Occupancy Sensor, 120-277V, Title 24 Compliant, ASHRAE 90.1 Compliant

Features and Benefits

- **Passive Infrared Technology (PIR):** The OSF10' uses Passive Infrared technology to detect motion.
- **Time Delay:** The time out occurs when motion is no longer detected by the sensor and the device counts a set amount of time before turning off the load. If the device sensor detects motion during this 'time delay' the count resets and the device initiates a new count. The Time Delay can be adjusted to 30 seconds, 10, 20, and 30 minutes respectively.
- **Zero-Crossing Circuitry:** Relay uses a zero-crossing circuitry to provide reliable, long-life operation.
- **LED:** A red LED blinks when motion is detected.
- **Fresnel Lens:** Detects small motion when mounted within 6' of occupants. When mounted at a height of 8', the coverage will be approximately 10' diameter but sensitivity may be diminished. The field-of-view below shows maximum coverage.

Color: White

UPC Code: 07847728658
