

DECONTACTOR[™] Series Switch Rated Plugs & Receptacles

Switch rated plugs and receptacles

DS Series Decontactors provide a useful combination of capacity and ruggedness. DS are often used to connect motors and welders in the metals, quarry, automotive, and mining industries. They are designed for applications requiring large wiring capacities. The DS's environmental rating is achieved as soon as the plug and receptacle are fully engaged, making them an excellent choice for outdoor applications where rainproof performance is required.

Main Advantages

- Switch & Hp rated (AC only)
- 65 kA to 100 kA short circuit rated*
- Up to 6 auxiliary contacts
- Amperage ratings up to 200A
- Metal or Poly construction

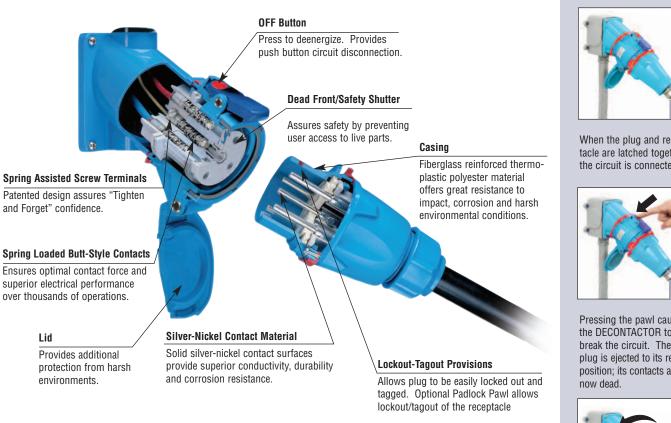

* See note under General Ratings on the next page

Highlighted Advantage

Simplify Compliance to NFPA 70E & CSA Z462

See pgs 19-20 for more information

Product Features

General Ratings

Amperage	20 to 200A
Voltage	600 VAC (480 VAC for DS200)
Frequency	50-400 Hz
Horsepower	1/2 to 25 hp
Short-Circuit (Make & Withstand)	65kA to 100kA*
Environmental	NEMA 3R, IP54/IP55**, NEMA 4X optional
Temperature	min -40°F/max 140°F

DS20, 30, 60 & 100C are rated 100kA. Testing was performed with RK1 current limiting fuses sized at 400% of the highest full load motor ampacity associated with the devices hp rating.

DS100 & 200 are rated 65kA. Testing was performed with RK5 time delay fuses sized at 100% of the devices rated ampacity.

IP54 rated when receptacle and plug are mated, when not mated receptacle alone is IP55 rated provided that the lid is latched closed.

Highlighted Feature

Typical Device Labels

DS Decontactors are UL & CSA rated for "motor circuit" and "branch circuit" disconnect switching - up to 25 hp and up to 200A

Operating Instructions

When the plug and receptacle are latched together, the circuit is connected.

Pressing the pawl causes the DECONTACTOR to break the circuit. The plug is ejected to its rest position; its contacts are

Rotating the 'dead' plug 30° counterclockwise closes the safety shutter and frees the plug to be withdrawn from the receptacle.

The plug and the receptacle are separated. The safety shutter prevents access to live parts.

To reconnect, insert plug into receptacle, rotate 30° clockwise, and apply insertion force.

Feature Spotlight – Easy Closing Mechanism

A new and simplified closing mechanism is now standard on the DS100 and DS200 plugs and receptacles. This compact mechanism enables easy connection of the plug to the receptacle.

Note: After connection, the mechanism must be released to allow disconnection of the device.

The plug is partially inserted, clamps are placed around tab, ready to pull the plug into the receptacle

2

The handles are pushed down, the plug is fully drawn into the receptacle

• For a guideline of NPT sizes based on cable ranges, see DS30 on pg 40.
