

Physical Network Security Solutions

RJ45 Plug Lock-In Device

Reduce network downtime, data security breaches, and hardware theft with the RJ45 plug lock-in device. The versatile design works with most patch cords, faceplates, patch panels, IP cameras and other IP devices. It is also compatible with VoIP phones helping to prevent unauthorized removal and ensure E911 continuity.

Key Features	Benefits
Tamper-resistant	Prevents unauthorized removal of cable, IP phone, other networking equipment or critical connection; compatible with VoIP phones to deter unauthorized users from moving or stealing phones, helping maintain E911 availability and compliance
Compact design	Can be installed without interfering with adjacent jacks and plugs, even in high-density applications
Installation/removal tool	Allows plug to be locked into or released from jack for enhanced physical security
Color assortment	Enables color-coding for visual identification; available in eight colors

Installation and Removal Instructions

To install device onto plug: Insert the tool and rotate clockwise 90°. Snap the plug into the device. Rotate tool back to original position and remove it.

To install into jack: Insert plug into the jack as usual.

To remove plug from jack: Insert the tool into the device and rotate clockwise 180°. Remove the plug from the jack. Rotate the tool back to original position and remove it from the device.

RJ45 Plug Lock-In Device

RJ45 Jack Blockout Device

Protect network integrity and prevent unauthorized access to the network by securing open jacks with a simple and secure blockout device. The jack module blockout device saves time and money associated with downtime, data security breaches, hardware replacement and infrastructure repair. The innovative design snaps into RJ45 jacks and is released with the removal tool, ensuring the safety and security of your network infrastructure.

Key Features

Benefits

Tamper-resistant	Device blocks unauthorized access to jacks and potentially harmful foreign objects, saving time and money associated with data security breaches, network downtime, repair and hardware replacement
Versatile functionality	Compatible with most RJ45 jacks to accommodate a variety of applications and does not interfere with jack contacts
Compact, low profile design	Device can be installed or removed without interfering with adjacent jacks or hardware
Removal tool	Device may only be released with the special removal tool, ensuring the safety and security of your network infrastructure
Color assortment	Enables color-coding for visual identification; available in eight colors
