

**MopTite™**

## **NEW 68P®**

### Dual Voltage Kits

Thomas & Betts announces the 68P Dual voltage Divider designed to be used with the 68P non-metallic round floor box. It accommodates one standard duplex or GFCI style receptacle, and four data/communication jacks.

As with T&B rectangular flush service floor boxes, the new 68P Dual Voltage Kit utilizes the T&B exclusive “one-step” installation method. No glue required! The mounting ring comes equipped with barbs that allow the installer to “press-fit” in place.

#### **68P Dual Voltage Kits include these features:**

- The voltage divider has easy-cut score lines to accommodate concrete depths of 3 to 6 inches.
- Faceplate has removable data plates and can accommodate GFCI or standard duplex receptacles.
- Kit comes equipped with 4 standard keystone size openings in the data plates. Other styles available include openings sized for Ortronics, Avaya, Panduit, and Hubbell.
- Easily change out data plates after installation, unlike the competition.
- MopTite™ cover uses a “snap-lock” to close the lid. No screws to turn...just push down the lid and it snaps in place. The cover uses a factory-installed gasket and exceeds all UL scrub-water exclusion requirements for carpet, wood and tile floors.
- MopTite™ cover available in solid brass.
- Includes everything required for a standard installation (68P floor box, data jacks and receptacles not included).

## 68P Dual Voltage Kits

Cat. No.	Description	UPC Code	Std. Pack Qty.
68P-DV-KIT-BRS	Dual voltage divider kit with MopTite Brass Cover	8599103246	1
